

# **STUDY GUIDE 2007-2008**

STUDY PROGRAMMES AND COURSES IN ENGLISH

### **University of Technology and Economics**

Lappeenranta University of Technology is a university specialised in technology and economics. Education in technology began in 1969, and business administration education was launched in 1991. Over 5000 students study on the Skinnarila campus today. By the end of 2005, the university has produced 5500 Masters of Science in Technology, 900 Masters of Science in Economics and Business Administration, 188 licentiates and 227 doctors.

Expertise in technology and business are combined in a unique way in training and research at Lappeenranta University of Technology (LUT). The university's areas of emphasis involve the forest and metal cluster, energy and information and communication technology. Expertise in Russian business and industry and the promotion of entrepreneurship play an important role in all of the university's fields of specialisation.

Values that impact the activity of Lappeenranta University of Technology are ethics, high quality and the "Skinnarila spirit". The Skinnarila spirit embodies industriousness, innovation, commitment, cooperation, encouragement, openness and the cheerful and friendly Karelian way of life. In keeping with this spirit, the university trains international specialists with a strong ethical foundation and the ability to continuously learn and develop themselves.

## THE UNIVERSITY'S ACADEMIC YEAR 1 August 2007 – 31 July 2008

The periods and exam and intensive course weeks for the academic year 2007-2008:

### AUTUMN SEMESTER 2007

#### Periods

1 <sup>st</sup>	3 Sep. – 19 Oct. 2007
2 <sup>nd</sup>	29 Oct. – 14 Dec. 2007

#### Intensive Week

Week 43 22 – 26 Oct. 2007

#### Exam Weeks

Week 35	27 – 31 Aug. 2007
Week 43	22 – 26 Oct. 2007
Week 51	17 – 21 Dec. 2007

### SPRING SEMESTER 2008

#### Periods

3 <sup>rd</sup>	14 Jan. – 29 Feb. 2008
4 <sup>th</sup>	10 Mar. – 2 May 2008

#### Intensive Weeks

Week 2	7 – 11 Jan. 2008
Week 10	3 – 7 Mar. 2008
Week 19	5 – 9 May 2008

#### Exam Weeks

Week 2	7 – 11 Jan. 2008
Week 10	3 – 7 Mar. 2008
Weeks 12-13	20 and 25-26 Mar. 2008
Week 19	5 – 9 May 2008
Week 20	12 – 16 May 2008

**Examinations** are organised during the periods on Mondays and Wednesdays at 16.15 (five-hour exams start at 15.15) and on Fridays at 14.15. On exam weeks examinations are organised Monday-Friday at 9.15 and 16.15 (five-hour exams start at 15.15). No exams are arranged on 7 December 2007, 30 April 2008 or 2 May 2008. On the **Easter exam week** 20 March and 25-26 March 2008, examinations are organised Monday-Friday at 9.15 and 16.15 (five-hour exams start at 15.15). **No lectures** are given during this time.

**Saturday exams** may be organised on 27 Oct. 2007 and 8 Mar. 2008; the degree programmes and faculties will decide on the arrangements at a later date.

The **exam and course schedules** will be available on the university web site.

**Orientation for new students is organised 27–31 August 2007.**

# 1 Studying at Lappeenranta University of Technology

## Study Entitlement and Registration for the Academic Year

LUT degree students must register each academic year as attending or non-attending. Each student who wishes to take part in lectures, assignments, examinations or other forms of teaching must register as attending and pay the student union membership fee. Students registered as non-attending cannot take part in instruction or exams.

Registration for the academic year 2007-2008 starts 1 June 2007 and ends 27 August 2007. **The student union membership fee must be paid by all students registered as attending.** You may not register for courses or exams before you have registered for the academic year and paid the student union fee. Students who have not registered by the deadline (27 August) will be removed from the student register and will no longer be entitled to study at LUT.

Under the Universities Act, students who have been admitted to complete both the Bachelor's degree (180 ECTS cr) and the Master's degree (120 ECTS cr) must carry out their studies in 7 years. Those who complete only the Master's degree (120 ECTS cr) have 4 years to do so. The time limit does not apply to students completing the so-called old Master's degree worth 180 credit units.

Further information on registration for the academic year and the limit of the study right is available from the Student Affairs Office and the university web site.

## Study Guidance

Orientation for new students will be organised at the beginning of the academic year. The students will learn more about the university, departments and studies, and they will be helped with practical arrangements related to starting studies at LUT. There will also be briefings regarding important issues later on during the studies. Students will be informed of them separately.

You can find answers to many general questions on studies from this guide and the university web site. Individual study guidance is offered by the degree programmes' study coordinators, student advisers, heads of study affairs at the faculties, tutors and teachers. Furthermore, the university psychologist, the staff of the Student Affairs Office and the entire university is there to help students with issues related to their tasks.

Each faculty has a **head of study affairs** who manages the faculty's study affairs. Their tasks differ a bit in each faculty. They can, however, tell you who to turn to with different questions.

**Study coordinators** are experts in studies provided by their degree programme. **They offer study guidance from the very beginning of the studies until graduation. They help with e.g. the individual study plan (credit transfer from previous studies and other universities, substituting courses, etc.) and with students' applications and other administrative issues.** The faculties and degree programmes also have **study affairs secretaries** who attend to study affairs.

**Student tutors** assist new students with practical arrangements at the beginning of their studies. During orientation, freshmen are divided into small groups led by older students or tutors. The tutors help new students start their studies. *Teachers and assistants are naturally the best sources of information in their own field and courses, and instruct students with matters related to them.* **Students can consult them during their office hours.**

### Study coordinators of international students:

- |  |                                 |
|--|---------------------------------|
| • Faculty of Technology                            | Ms Minna Loikkanen 05 621 2444  |
| • Faculty of Technology Management                 | Ms Riitta Salminen 05 621 2659  |
| • School of Business                               | Ms Minna Ranta 05 621 7214      |
| • International Business and Technology Management | Ms Virpi Maunuksela 05 621 6083 |

The services of the **university psychologist** will be available from the beginning of the 2007 autumn semester. You can turn to the psychologist e.g. if you have lost your motivation or no longer know why you are studying in the first place or what your goal is. You can talk to the psychologist about different learning styles and techniques, or talk confidentially about other issues that have an impact on your studies.

## WebOodi

WebOodi is the user interface for LUT students through which they register for exams, courses and the academic year, modify their contact information in the student register and monitor the records on the courses they complete. In WebOodi you can also request that an unofficial transcript of records be sent to you directly via e-mail.

WebOodi and its instructions can be accessed at [www.lut.fi](http://www.lut.fi). New students will receive instruction on the use of WebOodi during orientation.

You should primarily register through WebOodi. If for some reason you cannot do so, you can also register before the relevant deadline at the Student Affairs Office either in person, by telephone or by sending e-mail to [opinto@lut.fi](mailto:opinto@lut.fi).

If your contact information changes, you should make sure that the Student Affairs Office gets the new information and that it is updated in the student register. You can update the information (e.g. address, municipality of residence, e-mail and telephone) in WebOodi. If you cannot access WebOodi, you should give the information directly to the Student Affairs Office.

## Registration for Courses

The times and places of the courses are given in the course schedule on the university web site.

You must register for courses before they begin. You should register for courses again each year if you wish to take part in the related lectures, tutorials or other instruction. If you plan to retake an exam, you should only register for the exam.

You can register for courses through WebOodi.

Registration for courses in the academic year 2007-2008 starts 1 August 2007 and ends as follows for each period:

Registration for courses in Period 1 ends	2 Sep. 2007 at 23.59
Registration for courses in Period 2 ends	28 Oct. 2007 at 23.59
Registration for courses in Period 3 ends	13 Jan. 2008 at 23.59
Registration for courses in Period 4 ends	9 Mar. 2008 at 23.59

In the autumn semester, lectures start on 3 September 2007, and in the spring semester on 14 January 2008.

Further instructions on registering for language courses are provided in the Language Centre study guide and web site.

Remember to register for courses and exams separately.

## Registration for Examinations

The dates and times of examinations are given in the exam schedule on the university web site, and registration is in WebOodi.

Registration starts 4 weeks before the exam date and ends 1 week before the exam.

**If you have registered for an exam but are unable to take it, you must cancel your registration through WebOodi.** You can cancel your registration 3 working days before the exam.

<b>Exam Date</b>	<b>Registration Deadline</b>	<b>Cancellations</b>
Monday	Monday, a week before the exam	Wednesday, a week before the exam
Tuesday	Tuesday, a week before the exam	Thursday, a week before the exam
Wednesday	Wednesday, a week before the exam	Friday, the week before the exam
Thursday	Thursday, a week before the exam	Monday, the week of the exam
Friday	Friday, the week before the exam	Tuesday, the week of the exam

You can only take one exam during one exam session (morning or afternoon exam). This means you can take one morning and one afternoon exam in the same day.

## **Evaluation of Completed Courses**

Courses are evaluated either on the scale excellent (5), very good (4), good (3), satisfactory (2), sufficient (1) and failed (0), or passed (H). The basis for the course evaluation (exam, assignment etc.) is explained in the course descriptions in the study guide.

Language skills in the other official language of Finland (Finnish or Swedish, whichever is not the student's native language) are graded good (H) or satisfactory (T). Oral and written communication skills are evaluated separately.

If students are not satisfied with their grades, they may request a correction from the teacher who gave the grade. Students can make the request orally or in writing within 14 days of the day the grade was made known. They also have the right to find out why they were given the grade. If the student is not satisfied with the teacher's reply to the correction request, he or she may take the matter up with the university's degree committee. The correction request must be submitted to the Student Affairs Office within 14 days of receiving the teacher's reply. The decision of the degree committee is final, no appeal can be made.

## **Regulations on Studies**

The provisions laid down in the Universities Act and the decree on universities apply to LUT.

Provisions on education, studying and degrees are laid down in the Government Decree on University Degrees (794/2004) and LUT's regulations for teaching and studying (approved 24 January 2007). The decree and regulations are available on the university web site.

## **Disciplinary Measures**

LUT's regulations for teaching and studying (section 91) include provisions on disciplinary measures.

Students in breach of rules and regulations related to studies or research can be cautioned or expelled for up to one academic year. The decision to caution a student is made by the rector and to expel him or her is made by the university senate.

Before the issue is processed, the student is told what he or she is accused of and given the opportunity to be heard on the matter.

If a student is caught cheating in an exam, the invigilator must remove the student from the exam hall immediately. If the offence is noticed after the exam is over, the teacher who grades the exam must fail the student. The dean is to be notified of these measures.

When the invigilator or another teacher notices or has cause to suspect that a student has committed an offence, he or she shall notify the teacher who prepared the exam, the dean of the student's faculty and the administrative director in writing.

The administrative director together with the rector decides on the appropriate measure depending on the case. If needed, the matter will be brought before the university senate and the student may be expelled for a fixed period. As for exchange students, the home university will be notified of the offence.

In practice, expulsion for a specified period means that the student will receive a mark in his or her record: he or she will not be mentioned in the student register as an enrolled student during the period. The student's username and passwords will be revoked and the magnetic key confiscated. No student financial aid is granted for the period of expulsion.

## Degree Certificates

Students receive separate degree certificates for the Bachelor's degree (180 cr) and Master's degree (120 cr).

The certificate will show e.g. the graduate's degree, degree programme, major and minor subjects and their overall grades, and the topic of the thesis and its grade.

The student is given an overall grade, which is the weighted average of all the student's LUT courses that were graded with a number, excluding the thesis.

Average	Grade
1.00 – 1.49	Satisfactory
1.50 – 2.49	Very Satisfactory
2.50 – 3.49	Good
3.50 – 4.49	Very Good
4.50 – 5.00	Excellent

Also major and minor subjects are given an overall grade according to the table above. The overall grade is the average of all the LUT courses completed by the student in the subject in question, weighted according to the workload of each course.

Students will receive a special mention in their Master's degree (120 ECTS cr) certificate of having carried out their studies *with distinction* if their overall grade is at least 4 and the grade for their Master's thesis is 4 or 5. In addition to this, at least 40 credits included in the degree must be carried out at LUT and graded on a scale of 1–5.

International degree students will receive their Master's degree certificate both in English and in Finnish.

As an appendix to the degree certificate, students will receive a transcript of records in Finnish and English, a Diploma Supplement in English, and on request a separate transcript of courses completed outside Lappeenranta University of Technology.

Students must fill out an application for the degree certificate. The forms are available on the university web site.

## 2 Student Support Services

### Student Affairs Office

The Student Affairs Office is located on the 1<sup>st</sup> floor of the university's main building. It provides general guidance and services for students in e.g. the following matters:

- registration for the academic year
- registration for courses and exams
- WebOodi
- registration certificates
- study guides
- records of completed courses
- official transcripts of records
- the exam schedule
- degree certificates

You may visit the office from Monday to Thursday between 12.00 and 15.00 and on Friday between 12.00 and 14.00. At other times you can reach the office staff by telephone.

The Student Affairs Office phone numbers are 05 621 6061, 05 621 6062 and 05 621 6063, and you can send e-mail to [opinto@lut.fi](mailto:opinto@lut.fi).

### Transcript of Records and Registration Certificate

You can order a transcript of records in Finnish or English from the Student Affairs Office. A fee is charged for an official transcript.

You can also ask for a registration certificate if you need to prove you are a registered student at the university. The registration certificate is available in Finnish or English. There are different registration certificates for different purposes, so please mention why you need it.

### International and Career Services

The International and Career Services of Lappeenranta University of Technology are in charge of student exchange and international internships and help students find employment and employers find specialists for various professional tasks.

**International Services** provide guidance and counselling in practical matters to all international students studying at LUT. International services are in charge of the university's international student exchange – both students going abroad to study and those coming to Lappeenranta. Thanks to an extensive cooperation network, LUT students have the opportunity to take part in exchange programmes around the world and welcomes international exchange students from over 140 partner universities.

Students of Master's degree programmes in English are not, however, entitled to participate in student exchange. Students participating in MITIM Double Degree programme made an exception; part of their studies is carried out abroad.

International Services are responsible for the International Business and Technology Management programme. Both international exchange students and LUT's own students may take courses in the programme.

---

**Career Services** help students land internships, Master's thesis work and other employment as well as international internships. They provide facilities and tools for searching for information on jobs, employers and looking for work. Students may use the telephone, copy machine, fax and computers free of charge. Career Services also cooperate with State Employment Services.

Career Services give students tools for looking for employment and for planning their career. In practice, this means that students are offered training and personal guidance related to job searching and working life. Furthermore, Career Services annually organise various recruitment and corporate events.

LUT's International and Career Services are located on the third floor of the university's main building, the 3<sup>rd</sup> floor of the 1<sup>st</sup> section. The office is open from Monday to Thursday 9.30-15.00 and on Friday 9.30-14.00.

## **Origo and the Learning Centre**

Origo provides LUT students and staff a working and study environment with information services. The facilities have state-of-the-art equipment and programmes for online studies, information retrieval and processing, and independent studies and electronic student services. Student can also take their maturity test and a number of other exams on a computer in the exam aquarium. Origo houses both the LUT library and the Learning Centre.

LUT's Learning Centre supports the university's students and teachers in the development of teaching and learning. The Learning Centre's services include a university psychologist, online instruction and study support, and feedback system and exam aquarium support. The development of studying and teaching is also supported through different projects. These projects promote the development of e.g. study guidance, tutoring, the evaluation of teaching and learning, and virtual teaching. The Learning Centre also coordinates LUT's peer tutoring and offers related training in cooperation with the faculties.

## **Library**

The library provides a wide range of services and has an extensive collection of electronic and printed publications for the students and staff to use. The LUT library is a scientific library open to the public.

Students need the library when they loan course books or search for information for their assignments or theses. Books are loaned and returned at the check-out desk or the self-service machine. The library also provides instruction on information retrieval for studies. Tailored education is available at different stages of studies. The information desk provides help on a daily basis.

Material that is not available in the library's own collections can be loaned from other libraries through LUT's loaning service.

The opening hours during the semester are Mon-Thu 8.30-18.00 and Fri 8.30-15.30. Information on changes in the regular opening hours will be posted by the library entrances and on the library's web site.

## 3 Degrees in Technology

### General Information

At Lappeenranta University of Technology, the lower university degree in technology is Bachelor of Science (Technology), 180 ECTS credits, and the higher university degree is Master of Science (Technology), 120 ECTS credits. Students first complete the Bachelor's degree studies, which are followed by the Master's degree studies.

Students are admitted into degree programmes, which lead to these degrees. A degree programme is an entity of courses with scholarly and professional aims. Students specialise in a professional field of technology and its development. The degree programmes at LUT are:

- the Degree Programme in Energy Technology
- the Degree Programme in Chemical Technology
- the Degree Programme in Mechanical Engineering
- the Degree Programme in Electrical Engineering
- the Degree Programme in Information Technology
- the Degree Programme in Industrial Engineering and Management
- the Degree Programme in Environmental Technology

The Master's degree programmes in English are:

- Master's Degree Programme in Bioenergy Technology
- Master's Degree Programme in Chemical and Process Engineering
- Master's Degree Programme in Electrical Engineering
- Master's Degree Programme in Information Technology
- Master's Degree Programme in Mechanical Engineering
- Master's Degree Programme in New Packaging Solutions
- CBU Master's Degree Programme in Information and Communications Technology

### Measurement of Studies

The studies are measured in ECTS credits (cr). The average annual workload of a student is 1600 hours of work, which is worth 60 ECTS credits. One credit refers to an average input of 26 hours of work by a student. Credits are recorded only in whole numbers, not decimals.

Courses included in the degrees are compulsory, optional or elective.

### Major Subjects

The degree programmes are divided into major subjects. In the Bachelor's degree, the major studies contain basic and intermediate studies. In the Master's degree, the major studies are advanced studies.

Students must apply for a major subject, and the head of the degree programme decides on admissions. The application period and admissions are usually in the spring semester. Further information will be provided by the degree programmes.

### Minor Subjects

Minor studies in the Bachelor of Science (Technology) degree are at least 20 ECTS credits, with the exception of Industrial Engineering and Management where the minor studies in technology are 30 ECTS credits. A minor subject in the degree of Master of Science (Technology) is at least 20 ECTS credits.

Some minor subjects started in the Bachelor's degree studies may be continued in the Master's degree. The minor studies in the Bachelor's and Master's degrees both worth 20 ECTS credits will

then compose an extensive minor subject (a minimum of 20+20 ECTS credits, or for the technology minor in Industrial Engineering and Management, 30+20 ECTS credits).

There may be restrictions in selecting a minor subject in certain programmes. Further details on these restrictions are provided in the section of each degree programme.

Minor subjects for degree programmes in technology are listed in this guide in the section of each degree programme. Other minor subjects are listed at the end of the guide under "Other Minor Subjects for Technology Students".

### **Individual Study Plan (HOPS and eHOPS)**

The individual study plan allows students to plan their studies. The plan contains the courses included in the student's degree.

The study plan is made for the entire duration of the studies, i.e. until the higher university degree is completed. The faculties will give further information on how to prepare and update the individual study plan. Further details are available on the degree programme web sites and from study counsellors and coordinators.

From autumn 2007, LUT will be piloting the WebOodi eHOPS tool in some degree programmes. The adoption of eHOPS is at different stages in the degree programmes; further information will be provided by your student advisor.

### **Credit Transfer**

Credits from studies in other Finnish or foreign universities or institutes can be transferred into LUT degrees. In such cases, students must submit an application to the degree programme. The Language Centre decides on credit transfer for compulsory language studies.

However, the Bachelor of Science (Technology) degree must include at least 90 ECTS credits completed at LUT (80 ECTS credits and a Bachelor's thesis and seminar 10 ECTS credits).

A Master's degree (120 ECTS credits) must contain at least 70 ECTS credits completed at LUT (Master's thesis 30 ECTS credits and other studies 40 ECTS credits, of which at least 15 must be major studies). A maximum of 30 ECTS credits can be transferred to the M.Sc. degree from a higher university degree in another Finnish university.

Transferred courses will be entered into the student's records and given the grade 'passed' (H).

More information on credit transfer is given by the study guidance staff.

### **Internship**

The degree of Bachelor of Science (Technology) can include an internship worth 2 ECTS credits. During the internship students learn about their professional field, the workplace and its relationships, conventions, problems and solutions.

The degree of Master of Science (Technology) includes a compulsory internship (at least 2 ECTS credits). Students may receive a maximum of 10 ECTS credits for their internship in the Master's degree. The internship aims at furthering the student's professional skills and teaching the student to apply theoretical knowledge to practical issues. Further information on the extent of the compulsory internship in Master's degree programmes in English – if any required – is given in the section of degree structures of each study programme.

Two weeks of full-time work corresponds to one credit. If the employment relationship is less than 15 working days, it will not be approved as an internship.

The internship is assessed and approved by a person appointed by the head of the degree programme.

Employment prior to the studies may be accepted by the appointed coordinator as an internship if it has not been included in any previous degrees.

Further information on internships is provided by the head of the degree programme. Details are also available from your study guidance staff and the university web site.

### **Maturity Tests**

Students must take a written maturity test to demonstrate their language skills and how well they know the topic of their thesis. The maturity test is taken in the language in which the student has received his or her education in Finland. If the student has received his or her education in a language other than Finnish or Swedish, the head of the degree programme determines the language of the maturity test. In such cases, only the contents of the maturity test is evaluated, not the language.

The maturity test for the Bachelor's degree is supervised and students are not allowed to use reference material. The maturity test is evaluated by the supervisor of the thesis with regard to the content, and a language specialist appointed by the university with regard to the language.

Students must take a written maturity test to demonstrate their language skills and how well they know the topic of their thesis. If the student has demonstrated his or her Finnish or Swedish skills in connection with the Bachelor's degree or another previous university degree, only the content of the maturity test will be evaluated, and the head of the degree programme may allow the student to substitute his/her presentation in the Master's degree seminar for the maturity test. Degree programmes may also have other ways of substituting the maturity test.

If a student has not passed the maturity test in the Bachelor's degree or in another previous university degree, he or she must take a supervised maturity test. No reference material is allowed and both the contents and language will be evaluated. The contents will be assessed by the 1<sup>st</sup> examiner of the Master's thesis and the language will be evaluated by a language consultant assigned by the university.

The maturity test is evaluated pass/fail.

Further instructions on the maturity test are available in the Language Centre study guide and on the university web site.

## **Bachelor of Science (Technology)**

The workload of the degree of Bachelor of Science (Technology) is 180 ECTS cr. The degree usually takes three years of full-time studies to complete. It is composed of the following studies:

- general studies, at least 100 ECTS cr or in Industrial Engineering and Management at least 90 ECTS cr
- major subject and supporting studies 40-50 ECTS cr
- minor subject, at least 20 ECTS cr or in Industrial Engineering and Management at least 30 ECTS cr
- elective studies 10-20 ECTS cr

Language and communication studies and the internship are included in general studies. The Bachelor's thesis and the related seminar are included in the major studies.

### **Bachelor's Thesis**

At the end of their lower university studies students prepare a Bachelor's thesis. The Bachelor's thesis is an independent course or an assignment connected with a course in the student's major studies (which is not included in the course in question). The workload of the thesis and the related seminar is 10 ECTS cr.

The thesis is supervised and examined by the instructor of the course in question or someone else assigned by the degree programme. The thesis is evaluated on the scale excellent (5), very good (4), good (3), satisfactory (2), sufficient (1) and failed (0).

Students from all faculties prepare their Bachelor's thesis according to the instructions given by the vice-rector in charge of teaching. The instructions are available at the end of this guide and on the university web site. Faculties may give their own instructions for the Bachelor's thesis.

## **Master of Science (Technology)**

The workload of the degree of Master of Science (Technology) is 120 ECTS cr. The degree usually takes two years of full-time studies to complete. It is composed of the following studies:

- general studies, at least 20 ECTS cr
- major subject and supporting studies at least 60-70 ECTS cr
- minor subject, at least 20 ECTS cr
- elective studies at least 10-20 ECTS cr

Language and communication studies and the internship are included in general studies. The major studies include a Master's thesis, which is worth 30 ECTS cr.

### **Complementary Studies for Students Admitted Directly into a Master's Programme**

If a student has been admitted into the university only to complete the Master's degree (120 ECTS cr), the degree programme in question may require complementary studies depending on the student's previous studies. The student may need to carry out up to 60 ECTS credits of complementary studies. They are not included in the Master's degree, but are an addition to it.

### **Master's thesis**

The Master's thesis is the final project of the Master's degree studies. It demonstrates the student's knowledge of a scientifically or socially important topic related to his or her professional field. The Master's thesis is a research project which requires approximately 6 months of work and it is worth 30 credits. The Master's thesis is related to the student's major subject and its topic is agreed on by the supervisor and the student together.

The topic of the Master's thesis is approved by the head of the degree programme, who will also appoint a supervisor from among the university's professors or adjunct professors. The head of the degree programme will appoint two examiners, the first of which is always the supervisor.

The Bachelor's degree and possible complementary studies must be completed before applying for the approval of the thesis topic. Other conditions are specified in the instructions for preparing a Master's thesis issued by the vice-rector.

The Master's thesis can also be a group project of two or more students. However, in such cases one should be able to distinguish the parts of the thesis prepared independently by each student. These parts should be evaluated separately. The thesis can be prepared in Finnish, Swedish or English. Permission for using other languages is granted by the head of the degree programme. In Master's programmes taught in English, the Master's thesis is also prepared in English.

The faculty council will assess the thesis. The thesis is evaluated on the scale excellent (5), very good (4), good (3), satisfactory (2), sufficient (1) and failed (0).

Before starting their thesis, students must read the related instructions given by the vice-rector in charge of teaching. The instructions are available at the end of this guide and on the university web site. Faculties may also give their own instructions for the Master's thesis.

## Postgraduate Degrees

After the Master's degree, LUT offers extensive possibilities for completing the postgraduate degrees of Licentiate of Science (Technology), Doctor of Science (Technology) and Doctor of Philosophy.

The licentiate degree usually requires two years of full-time studies. The doctoral degree, on the other hand, requires approximately four years of full-time studies. The workload of the postgraduate studies is 60 ECTS credits, which is divided into 35-40 ECTS credits of major studies and 20-25 ECTS credits of supporting studies. The studies are composed of courses organised by a graduate school or equivalent, university courses, literature exams or other scientific courses. In addition, postgraduate students must prepare a licentiate thesis or a doctoral dissertation, which is defended in a public examination.

If you wish to take part in postgraduate studies, you should consult the professor of the major subject in question and submit your application and study plan to the faculty council. The rector decides whether or not to grant the right to postgraduate studies after hearing the faculty council.

Details are also available from the faculty study guidance staff and the university web site.

## 4 Master's Degree Programme in Information Technology

Master's Degree Programme in Information Technology is a two-year programme in English meant for both Finnish and foreign students, who have a Bachelor's degree in Information Technology, Computer Science or equivalent discipline. The programme is worth of 120 ECTS credits and includes coursework of 90 ECTS credits and a Master's thesis of 30 ECTS credits, leading to a Master of Science in Technology degree.

### The Aims of the Master's Degree Programme

The aim of the Master's Degree Programme is to prepare the student professionally and academically in those areas of information technology, which are required in positions in industry. Another aim of the Master's Degree Programme is to provide the student with the readiness to undertake post-graduate studies and independent studies in some area of information technology.

### Professional Scope of the Master's Degree Programme

The professional scope of the Master's Degree Programme is diverse and rapidly developing. Information systems in industry form a key area in which information processing and telecommunication is combined. Depending on the chosen field of specialisation, the graduate's tasks may include software design and implementation, product design and development as well as specific application of information technology, computational modelling and electronics in monitoring, design and control of production systems. Furthermore, a graduate may also work in the field of research, consulting, sales, and teaching as well as their own business.

### Fields of Specialisation

The following alternative fields of specialisation (major subjects) are available at LUT

1. **Information Processing**
2. **Communications Engineering**

1. **Students of Information Processing** get a broad idea of the applications and methods of information processing as well as information processing systems and their design. Advanced studies focus on intelligent information processing and its applications. The graduates can work in:

- Research and development of information processing systems and software
- Project planning and management
- Research and teaching in universities

2. **Students of Communications Engineering** gain knowledge and will become experts in the following areas:

- Design, development and maintenance of communications systems
- Development of communications software and hardware products

Students will get specialized in designing and implementing communications software. They will gain in-depth view of network architectures including wired, wireless and optical networks. Students will learn how to develop secure services to wireless terminals. In courses related to Parallel and Distributed Computing students will learn the basic concepts of parallel computing and different ways to harness the power of various parallel computer platforms. Students gain knowledge on parallel algorithms and deepen it on more advanced courses. Existing

programming skills will be enhanced to utilize parallel methods in distributed and shared memory machines by implementing algorithms on our laboratory's parallel computing environment. Various changing themes relating to parallel computing and data communications are discussed in seminar courses.

## Students starting in Master's Degree Programme are expected to have following skills

### Information Processing

Students majoring in Information Processing are expected to have a command of engineering mathematics, especially statistics, matrix calculations and numerical methods. The students are expected to be able to program and justify a choice of data structures and algorithms that solve a given information processing problem. Furthermore, the students must have basic knowledge in theoretical computer science as well as understanding of information technology as a whole including hardware, operating systems, and software levels.

A student in Information Processing must be able to design and implement a program that solves an information processing problem based on a given specification. A student must be able to work both independently and as a part of a team in different kinds of projects. The education is given in English, thus good communication skills in English are necessary both orally and in writing.

### Communications Engineering

Students with major in Communications Engineering are expected to master engineering mathematics, especially statistics, discrete mathematics, and trigonometric series. From physics the areas covered are both electronics and wave motion. A student is expected to have basic knowledge in wired and wireless communication systems and in protocols in communications.

A student should be able to design and implement a program that is transferring information between two or more computers or terminals. He/she can work independently and act as a responsible member of a group. He/she is able to communicate in English both orally and in written form.

### Complementary Studies

Students with a Finnish Polytechnic degree will have to study complementary studies.

## The Degree Structure

### Master of Science 120 ECTS cr

	<i>ECTS cr</i>
General studies	25/14
Major subject	65
Minor subject	20
Elective studies	10/21
<i>Total</i>	<i>120</i>

Elective studies: Any course given in Lappeenranta University of Technology can be included in elective studies. We recommend courses given by the department of Information Technology and Finnish for Foreigners –language courses.

**MAJOR: Information Processing****General studies (25 ECTS cr)**

<i>Obligatory</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BK10A0300	Introduction to M.Sc. Studies	M.Sc. (Tech.) 1	1	1
CT20A2500	Object-Oriented Programming Techniques	M.Sc. (Tech.) 1	1-2	5
CT20A3000	Unix and System Programming	M.Sc. (Tech.) 1	2-3	5
CT20A3100	Introduction to Machine Vision and Machine Learning	M.Sc. (Tech.) 1	3-4	6
FV11A9000	Academic Seminar for International Programs		2-4	6
FV10A 2EC	Language and Communication Studies			2

<sup>1)</sup> The course Teknisk svenska is obligatory for Finnish students who have not attained proficiency in Swedish in their previous degree. The course Finnish for Foreigners is obligatory for foreign students.

**Major subject 65 ECTS cr**

<i>Obligatory (52 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
CT10A9500	Research Methods	M.Sc. (Tech.) 1	1	3
CT20A6000	Pattern Recognition	M.Sc. (Tech.) 1	3-4	7
CT20A6100 <sup>1)</sup>	Machine Vision and Digital Image Analysis	M.Sc. (Tech.) 2	1-2	7
CT20A6200 <sup>1)</sup>	Computer and Robot Vision	M.Sc. (Tech.) 1	1-2	7
CT20A6400	Languages, Compilers and Interpreters	M.Sc. (Tech.) 1	3-4	5
Thesis	Master's Thesis			30

<sup>1)</sup> Exchangeable

<i>Elective courses (min. 13 ECTS cr should be selected)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
CT10A9600	Research Methods, Laboratory Project	M.Sc. (Tech.) 1	2-4	5
CT20A6100	Machine Vision and Digital Image Analysis	M.Sc. (Tech.) 1	1-2	7
CT20A6200	Computer and Robot Vision	M.Sc. (Tech.) 1	1-2	7
CT20A6300	Evolutionary Algorithms	M.Sc. (Tech.) 1	1-2	5
CT20A7000	Information Systems Research	M.Sc. (Tech.) 1	1-2	7
CT20A7200	Architecture in Systems and Software Development	M.Sc. (Tech.) 1	3-4	5
CT20A7300	Software Quality, Processes, and Organizations	M.Sc. (Tech.) 2	1-2	5
CT30A7000	Parallel Computing	M.Sc. (Tech.) 1	1-2	6
CT30A7100	Parallel Programming	M.Sc. (Tech.) 1	3-4	5

**Minor Subject 20 ECTS cr**

*One of the minors should be selected*

**Communications Engineering, minor subject**

<i>Obligatory (10 ECTS cr)</i>		<i>per.</i>	<i>ECTS cr</i>
CT30A5000	Network Programming	2-3	5
CT30A5800	Communications Software and Architecture	1-2	5

<i>Elective (10 ECTS cr)</i>		<i>per.</i>	<i>ECTS cr</i>
CT10A9600	Research Methods, Laboratory Project	2-4	5
CT30A2700	Network Design and Traffic Engineering	3-4	5
CT30A5900	Communication Software Laboratory Work	3-4	5
CT30A6500	Performance Analysis of Telecommunication Systems	1-2	5
CT30A7000	Parallel Computing	1-2	6
CT30A7100	Parallel Programming	3-4	5

CT30A7400	Distributed Object Programming	1-2	6
CT30A8800	Secured Communications	1-2	6
CT10A9700	Summer School on Communications Engineering	int.	2

### Elective (minimum total must be 20 ECTS cr)

<i>International Marketing</i>		<i>per.</i>	<i>ECTS cr</i>
AC40A0100	Cross-Cultural Marketing Strategies	2	5
AC40A0150	Integrated Marketing Communication	4	5
AC40A0200	Internationalization of the Firm	2	5
AC40A0250	Sales Management and Personal Selling	3-4	5

<i>Finance</i>		<i>per.</i>	<i>ECTS cr</i>
AB30A0200	Asset Pricing Theory and Portfolio Management	2	7
AB30A0300	International Finance and Emerging Markets	2	5
AB30A0500	Financial Econometrics	1	5
AB30A0550	International Financial Management	3	6

<i>Strategy Research</i>		<i>per.</i>	<i>ECTS cr</i>
AB40A0500	Innovation and Competitiveness	3	5

<i>Management and Organization</i>		<i>per.</i>	<i>ECTS cr</i>
AC30A0450	Management Consulting	January 6 2008	

<i>Knowledge Management</i>		<i>per.</i>	<i>ECTS cr</i>
AC50A0050	Introduction to Knowledge Management, book exam	1-4	4
AC50A0300	Organizational Learning and Competence Management	4	6
AC50A0500	Activity Theoretical Approach to Knowledge Creation and Innovation	2	4

### Elective studies 10 ECTS cr

### MAJOR: Communications Engineering

#### General studies (14 ECTS cr)

<i>Obligatory</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BK10A0300	Introduction to M.Sc. Studies	M.Sc. (Tech.) 1	1	1
CT30A5000	Network Programming	M.Sc. (Tech.) 1	2-3	5
FV11A9000	Academic Seminar for International Programs	M.Sc. (Tech.) 1	2-4	6
FV10A 2EC	Language and Communication Studies			2

’) The course Teknisk svenska is obligatory for Finnish students who have not attained proficiency in Swedish in their previous degree. The course Finnish for Foreigners is obligatory for foreign students.

## Course Descriptions

<b>CT10A9500</b>	<b>RESEARCH METHODS</b>	<b>3 ECTS cr</b>
	<b>Research Methods, Tutkimusmenetelmät</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Lecturer, D.Sc. (Tech.) Arto Kaarna	
<b>Aims</b>	To familiarize the student with the research work and the basic methods in research. To prepare the student to the research approach of her/his master's thesis.	
<b>Contents</b>	Research work, philosophy of research. Research process. Designing research, research questions and hypothesis. Qualitative and quantitative research methods. Reporting scientific work.	
<b>Teaching Methods</b>	Lectures 14 h, practical assignment, 1st period. Exam.	
<b>Assessment</b>	0 - 5. Exam 50 %, practical assignment 50 %.	
<b>Course Material</b>	Creswell, J.W.: Research Design: Qualitative, Quantitative, and Mixed Methods Approaches, SAGE, 2003. Hirsjärvi, S., Remes, P., Sajavaara, P.: Tutki ja kirjoita, 10. painos, Tammi, 2004.	
<b>Prerequisites</b>	Research reports. B.Sc. studies finished.	

<b>CT10A9600</b>	<b>RESEARCH METHODS, LABORATORY PROJECT</b>	<b>5 ECTS cr</b>
	<b>Research Methods, Laboratory Project, Tutkimusmenetelmät, laboratoriotyö</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Heikki Kälviäinen, Professor, D.Sc. (Tech.) Jari Porras	
<b>Aims</b>	To execute a well-defined research task in the laboratory of Information Processing or Communications Engineering.	
<b>Contents</b>	Research work in the topic defined by the laboratory. When starting the course contact one of the professors. Reporting and a seminar presentation of the work implemented.	
<b>Teaching Methods</b>	Participation in the work of the research group, 2nd - 4th period.	
<b>Assessment</b>	Passed/failed. Research report and seminar presentation.	
<b>Course Material</b>	Literature related to the research topic, agreed with the supervisor of the work.	
<b>Prerequisites</b>	CT10A9500 Research Methods finished, excellent grades in studies, evidence of successful research work.	
<b>CT10A9700</b>	<b>SUMMER SCHOOL ON COMMUNICATIONS ENGINEERING</b>	<b>2 ECTS cr</b>
	<b>Summer School on Communications Engineering, Tietoliikennetekniikan kesäkoulu</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period int.	
<b>Lecturer(s)</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Jari Porras	
<b>Aims</b>	Student actively participates all three days of summer school event. Student learns the basics and the current status of the selected topic of the summer school. Student gains practical experience by participating code camp.	
<b>Contents</b>	Content changes every year. Basics, current status and research activities. Practical working on a code camp. Lectures will be held by visiting lecturers and researchers.	
<b>Teaching Methods</b>	Lectures 16 h, practical assignment 20 h, written report about event.	
<b>Assessment</b>	Passed/failed.	
<b>Course Material</b>	<a href="http://www.it.lut.fi/ssotc/">http://www.it.lut.fi/ssotc/</a>	
<b>Prerequisites</b>	Basic programming skills. Recommended CT10A9500 Research Methods.	
<b>CT20A2500</b>	<b>OBJECT-ORIENTED PROGRAMMING TECHNIQUES</b>	<b>5 ECTS cr</b>
	<b>Object-Oriented Programming Techniques, Ohjelmoinnin menetelmät</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 1-2	
<b>Lecturer(s)</b>	Professor, Ph.D. Kari Smolander	
<b>Aims</b>	The student understands advanced concepts and techniques of object-oriented programming and can apply these techniques in solving practical programming tasks.	
<b>Contents</b>	Java run-time object model. Reusability. Collections and containers. Polymorphic algorithms. Reflection. Serialization. Data and transaction management. Basics of distributed objects and component programming. Design patterns.	
<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, 1st period.	
<b>Assessment</b>	Lectures 14 h, exercises 14 h, practical assignment, 2nd period. Exam. 0 - 5. Exam 50 %, exercises and practical assignment 50 %.	
<b>Course Material</b>	Lecture notes. Eckel, B.: Thinking in Java, Prentice Hall. Gamma, E. et al.: Design Patterns, Addison-Wesley.	
<b>Prerequisites</b>	CT20A2400 Ohjelmoinnin perusteet.	

<b>CT20A3000</b>	<b>UNIX AND SYSTEM PROGRAMMING</b>	<b>5 ECTS cr</b>
	<b>Unix and System Programming, Unix ja systeemiohjelmointi</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 2-3	
<b>Lecturer(s)</b>	Researcher/Teacher, Docent, D.Sc. (Tech.) Joni Kämäräinen	
<b>Aims</b>	To familiarize the student with advanced methods of Unix employment, based mainly on C and shell programming.	
<b>Contents</b>	Shells, commands and scripts. Filters and interpreted languages. System calls and library functions for I/O operations. Threads, processes and basic interprocess communication. Streams, sockets, network fundamentals.	
<b>Teaching Methods</b>	Lectures 28 h, exercises 28 h, homeworks, 2nd period.	
<b>Assessment</b>	Terminal project, 3rd period. Exam.	
<b>Course Material</b>	0 - 5. Exam 100 %. Homeworks and project. Kernighan, B.W., Pike, R.: The UNIX Programming Environment, Prentice Hall, 1984. Stevens, W.R.: Advanced Programming in the UNIX Environment, Addison Wesley, 1997. Robbins, K.A., Robbins, S.: Practical UNIX Programming, Prentice Hall, 1996. Glass, G., Ables, K.: UNIX for Programmers and Users, Prentice Hall, 1999.	
<b>Prerequisites</b>	CT20A0210 Käytännön ohjelmointi, CT20A2600 Käyttöjärjestelmät.	
<b>CT20A3100</b>	<b>INTRODUCTION TO MACHINE VISION AND MACHINE LEARNING</b>	<b>6 ECTS cr</b>
	<b>Introduction to Machine Vision and Machine Learning, Johdanto konenäköön ja koneoppimiseen</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 3-4	
<b>Lecturer(s)</b>	Researcher/Teacher, Docent, D.Sc. (Tech.) Joni Kämäräinen	
<b>Aims</b>	Students should know the application areas, restrictions, and structure of machine vision systems. Students should be able to operate on digital images: capture images and extract basic visual information from them. Students should know the basics of machine learning and approaches to decision making using computer.	
<b>Contents</b>	Applications of machine vision. Parts of machine vision system and their properties. Basics of digital imaging and image processing. Applications of machine learning. Describing intelligence and decision making in a computer. Approaches: statistical, rule-based, decision trees, neural networks, continuous-value problems, clustering, decision-support systems. Expert systems.	
<b>Teaching Methods</b>	Lectures 21 h, exercises 14 h, homeworks, 3rd period.	
<b>Assessment</b>	Lectures 21 h, exercises 14 h, homeworks, 4th period. Exam.	
<b>Course Material</b>	0 - 5. Exam 100 %. Homeworks. Davies, E.R.: Machine Vision, 3rd Edition, Elsevier, 2005. Mitchell, T.M.: Machine Learning, McGraw-Hill, 1997.	
<b>Prerequisites</b>	Matematiikka A and B, CT20A0200 Ohjelmoinnin perusteet.	
<b>CT20A6000</b>	<b>PATTERN RECOGNITION</b>	<b>7 ECTS cr</b>
	<b>Pattern Recognition, Hahmontunnistus</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Senior Assistant, Docent, D.Sc. (Tech.) Ville Kyrki	
<b>Aims</b>	The course has three basic aims: firstly to understand the field of pattern recognition in general, secondly to get familiar with pattern recognition techniques, and thirdly to obtain the ability to apply techniques to applications.	
<b>Contents</b>	Introduction. Bayesian inference and statistical pattern recognition. Discriminants and neural pattern recognition. Decision tree, syntactic and structural approaches. Context-dependent classification. Reinforcement	

<b>Teaching Methods Assessment Course Material</b>	learning. Unsupervised learning. Lectures 21 h, exercises 14 h, 3rd period. Lectures 21 h, exercises 14 h, 4th period. Practical assignment. Exam. 0 - 5. Exam 50 %, exercises 50 %. Practical assignment. Lecture notes. Duda, R.O., Hart, P.E., Stork, D.G.: Pattern Classification, Wiley, 2001. Theodoridis, S., Koutroumbas, K.: Pattern Recognition, Academic Press, 2003.
<b>Prerequisites</b>	Matematiikka A and B, CT20A0210 Käytännön ohjelmointi, BM20A1400 Tilastomatematiikka I. Recommended CT20A3100 Introduction to Machine Vision and Machine Learning, BM20A1500 Numeerinen analyysi I, BM20A1600 Matriisilaskenta.

<b>CT20A6100</b>	<b>MACHINE VISION AND DIGITAL IMAGE ANALYSIS</b>	<b>7 ECTS cr</b>
	<b>Machine Vision and Digital Image Analysis, Digitaalinen kuvankäsittely ja analyysi</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Heikki Kälviäinen	
<b>Aims</b>	To introduce students to the field of machine vision and image analysis and its application areas.	
<b>Contents</b>	Digital image processing: digital image, image transforms, image enhancement, image compression. Image analysis: segmentation, representation and description, recognition and interpretation. Hardware, software and applications.	
<b>Teaching Methods</b>	Lectures and seminars 21 h, exercises 14 h, 1st period. Lectures and seminars 21 h, exercises 14 h, practical assignment, 2nd period. Exam.	
<b>Assessment</b>	0 - 5. Exam 100 %. Seminar presentation. Practical assignment.	
<b>Course Material</b>	Gonzales, R.C., Woods, R.E.: Digital image processing, Prentice-Hall, 2002. Jain, A.K.: Fundamentals of digital image processing, Prentice-Hall, 1989.	
<b>Prerequisites</b>	Recommended CT20A2700 Tietokonegrafiikan perusteet, CT20A3100 Introduction to Machine Vision and Machine Learning, CT20A6000 Pattern Recognition, BM30A0500 Applied Optics.	

<b>CT20A6200</b>	<b>COMPUTER AND ROBOT VISION</b>	<b>7 ECTS cr</b>
	<b>Computer and Robot Vision, Tietokone- ja robottinäkö</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Senior Assistant, Docent, D.Sc. (Tech.) Ville Kyrki	
<b>Aims</b>	To understand the theoretical basis and motivation to use geometric and dynamic computer vision, to know the applications of vision in robotics, and to know the basics of using the methods in practice.	
<b>Contents</b>	Vision in Robotics. Imaging models and calibration. Coordinate frames and geometrical primitives. Single and multi-view geometry. Pose estimation. Dynamic vision and tracking. Visual servoing.	
<b>Teaching Methods</b>	Lectures 21 h, exercises 14 h, 1st period. Lectures 21 h, exercises 14 h, 2nd period. Practical assignment. Exam.	
<b>Assessment</b>	0 - 5. Exam 50 %, exercises 50 %. Practical assignment.	
<b>Course Material</b>	Lecture notes. Trucco, E., Verri, A.: Introductory Techniques for 3-D Computer Vision, Prentice-Hall, 1998.	
<b>Prerequisites</b>	Matematiikka A and B, CT20A0200 Ohjelmoinnin perusteet. Recommended CT20A3100 Introduction to Machine Vision and Machine Learning, BM20A1400 Tilastomatematiikka I, BM20A1500 Numeerinen analyysi I, BM20A1600 Matriisilaskenta.	

<b>CT20A6300</b>	<b>EVOLUTIONARY ALGORITHMS</b>	<b>5 ECTS cr</b>
	<b>Evolutionary Algorithms, Evoluutioalgoritmit</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Lecturer, D.Sc. (Econ. & Bus. Adm.) Jouni Lampinen	
<b>Aims</b>	Familiarize with the basics and applications of evolutionary algorithms. Learn to apply, implement, and modify evolutionary algorithms. Learn their application areas and restrictions. Learn to apply evolutionary algorithms to complex problems and to solve practical problems in the student's own specialization.	
<b>Contents</b>	Introduction to evolutionary algorithms and their applications. Evolutionary algorithms in learning, intelligent, adaptive, and self-organizing systems. Structure, components, and characteristics of evolutionary algorithms. Genetic algorithms and evolutionary strategies. Evolutionary problem solving, searching, and optimization. Design and implementation of an information system applying evolutionary algorithms. Practical problem solving using evolutionary algorithms.	
<b>Teaching Methods</b>	Lectures 28 h, 1st period. Exercises 10 h, 2nd period. Project work seminars 7 h, 2nd period. Project work. Exam.	
<b>Assessment</b>	0 - 5. Exam 100 %. Project work.	
<b>Course Material</b>	Haupt, R.L., Haupt, S.E.: Practical Genetic Algorithms, Wiley, 1998. Eiben, A.E., Smith, J.E.: Introduction to Evolutionary Computing, Springer-Verlag, 2003. Price, K.S., Storn, R.M., Lampinen, J.A.: Differential Evolution, A Practical Approach to Global Optimization, Springer, 2005. Other material given in lectures.	
<b>Prerequisites</b>	Programming using a procedural language, e.g. C, FORTRAN, Pascal, Basic, etc., CT20A0200 Ohjelmoinnin perusteet, CT20A0210 Käytännön ohjelmointi. Recommended CT20A2310 Tietorakenteet ja algoritmit, BM20A2800 Nonlinear Optimization.	
<b>CT20A6400</b>	<b>LANGUAGES, COMPILERS AND INTERPRETERS</b>	<b>5 ECTS cr</b>
	<b>Languages, Compilers and Interpreters, Kielet, kääntäjät ja tulkit</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Researcher/Teacher, Docent, D.Sc. (Tech.) Joni Kämäräinen	
<b>Aims</b>	To familiarize the student with theory of compilers and languages for selected formal languages.	
<b>Contents</b>	Languages and grammars. Regular languages and lexical analysis. Introduction to parsing. Tools for compiler generation. Syntax directed translation, attribute grammars, intermediate representation. Machine independent optimization.	
<b>Teaching Methods</b>	Lectures 21 h, exercises 14 h, 3rd period. Lectures 21 h, exercises 14 h and a terminal project, 4th period. Exam.	
<b>Assessment</b>	0 - 5. Exam 100 %. Project.	
<b>Course Material</b>	Aho, A.V., Sethi, R., Ullman, J.D.: Compilers: Principles, Techniques, and Tools, Addison Wesley, 1987.	
<b>Prerequisites</b>	CT20A2000 Tietojenkäsittelyn perusteet I, CT20A2310 Tietorakenteet ja algoritmit.	
<b>CT20A7000</b>	<b>INFORMATION SYSTEMS RESEARCH</b>	<b>7 ECTS cr</b>
	<b>Information Systems Research, Tietojärjestelmien tutkimus</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Lecturer, D.Sc. (Tech.) Erja Mustonen-Ollila	
<b>Aims</b>	Getting familiar with the IS research methods, the IS research approaches, reference literature, data collection, data validation, and data reliability issues,	

<b>Contents</b>	<p>statistical analyses, a research proposal and a scientific report writing procedures. Promoting the publishing procedures, and understanding the different stages of the research process. Applying qualitative and quantitative research approaches, and discovering the proper research questions or the hypotheses, and the research problems. Finding out the suitable research organisations, or partners, and a research topic. The main goal is that the student is capable independently together with the supervisor to continue her/his M.Sc. and/or Ph.D. research study in the area of Information Systems, Software Engineering, or some reference disciplines.</p> <p>Qualitative and quantitative research. IS research methods, and approaches. Constructing a conceptual framework, the research models, and the concepts. Data gathering techniques, data validation and reliability. Measurement. Statistical processing of observations. Research philosophies and philosophical methods. Scientific writing and the process of writing. The content of the research proposal. The content of a working paper. Publication procedures.</p>
<b>Teaching Methods</b>	<p>Lectures 21 h, exercises 14 h, 1st period. Lectures 21 h, exercises 14 h, 2nd period. Practical assignment (research proposal). Exam.</p>
<b>Assessment</b>	0 - 5. Exam 50 %, practical assignment 50 %.
<b>Course Material</b>	<p>Mumford, Hirshheim, Fitzgerald, Wood-Harper (ed.): Research Methods in Information Systems, 1985. Nissen, H.-E., Klein, H.K., Hirschheim, R. (ed.): Information Systems Research: Contemporary Approaches &amp; Emergent Traditions, 1991. Boland, R.J., Hirschheim, R.A. (ed.): Critical Issues in Information Systems Research, Wiley, 1987. The Information Systems Research Challenge (Harvard 1989): Vol. 1: Qualitative Research Methods (ed. Cash, J.I., Lawrence, P.R.), Vol. 2: Experimental Research Methods (ed. Benbasat, I.), Vol. 3: Survey Research Methods (ed. Kraemer, K.L.). Järvinen, P.: On Research Methods, Opinpaja, 2004. Scientific articles in each of the sub areas.</p>
<b>Prerequisites</b>	CT20A4000 Ohjelmistotuotanto.

<b>CT20A7200</b>	<b>ARCHITECTURE IN SYSTEMS AND SOFTWARE DEVELOPMENT</b>	<b>5 ECTS cr</b>
<b>Year and Period</b>	Architecture in Systems and Software Development, Arkkitehtuuri järjestelmien ja ohjelmistojen kehityksessä	
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 3-4 Professor, Ph.D. Kari Smolander	
<b>Aims</b>	The student understands the role of architecture in the development of software and information systems and has the basic skills of how to design and describe architecture.	
<b>Contents</b>	The role of architecture in development. Software architecture. Systems architecture. Enterprise architecture. Application integration. Architecture design. Architecture documentation. Architectural styles and patterns.	
<b>Teaching Methods</b>	Lectures, lecture exercises and presentations at lectures 21 h, 3rd period. Lectures, lecture exercises and presentations at lectures 21 h, 4th period. Practical assignment and presentation. Exam.	
<b>Assessment</b>	0 - 5. Exam 50 %, practical assignment 30 %, presentation 20 %.	
<b>Course Material</b>	Lecture notes based on the following books: Bass, L., Clements, P., Kazman, R.: Software Architecture in Practice, 2nd Ed., Addison-Wesley, 2003. Linthicum, D.S.: Next Generation Application Integration: From Simple Information to Web Services, Addison-Wesley, 2003. Ross, J.W., Weill, P., Robertson, D.: Enterprise Architecture As Strategy: Creating a Foundation for Business Execution, Harvard Business School Press, 2006.	
<b>Prerequisites</b>	CT20A4100 Ohjelmistotuotannon menetelmät or equivalent.	

<b>CT20A7300</b>	<b>SOFTWARE QUALITY, PROCESSES, AND ORGANIZATIONS</b>	<b>5 ECTS cr</b>
	<b>Software Quality, Processes, and Organizations, Ohjelmistojen laatu, prosessit ja organisaatiot</b>	
	<b>To be lectured first time in fall 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Senior Assistant, D.Sc. (Tech.) Uolevi Nikula	
<b>Aims</b>	After the course student can explain quality, process, and organization related issues in software development and how such issues can be solved based on literature. Students can also synthesize the studied literature and develop quality and process documentation for a software company.	
<b>Contents</b>	Software development issues. Software development processes, their history, maturity, and state of the practice. Quality in software development, approaches to assure and improve quality. Processes and organizations.	
<b>Teaching Methods</b>	Lectures and seminars 21 h, 1st period. Lectures and seminars 21 h, 2nd period.	
<b>Assessment</b>	Two projects and two presentations. Exam.	
<b>Course Material</b>	0 - 5. Exam 50 %, projects 30 %, presentation 20 %.	
<b>Prerequisites</b>	To be announced at lectures. CT20A4100 Ohjelmistotuotannon menetelmät or equivalent.	
<b>CT30A2700</b>	<b>NETWORK DESIGN AND TRAFFIC ENGINEERING</b>	<b>5 ECTS cr</b>
	<b>Network Design and Traffic Engineering, Verkko suunnittelu</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Senior Assistant, D.Sc. (Tech.) Kari Heikkinen	
<b>Aims</b>	To make students familiar with fundamental methods in the design of telecommunication networks and traffic engineering.	
<b>Contents</b>	Introduction to the network planning problem, network algorithms, network reliability, capacity planning, network optimization, and traffic engineering.	
<b>Teaching Methods</b>	Lectures 7 h, exercises 14 h, 3rd period. Lectures 7 h, exercises 14 h and practical assignment, 4th period. Exam.	
<b>Assessment</b>	0 - 5. Exam 50 %, exercises 50 %. Practical assignment.	
<b>Course Material</b>	Robertazzi, T.G.: Planning Telecommunication Networks, IEEE Press, 1999. Kenyon, T.: High Performance Data Network Design, Butterworth-Heinemann, 2000.	
<b>CT30A5000</b>	<b>NETWORK PROGRAMMING</b>	<b>5 ECTS cr</b>
	<b>Network Programming, Tietoliikenneohjelmointi</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 2-3	
<b>Lecturer(s)</b>	Researcher/Teacher, Docent, D.Sc. (Tech.) Jouni Ikonen	
<b>Aims</b>	Understand problematics of networked applications. Ability to read and implement protocols described in standards.	
<b>Contents</b>	Use of Internet Protocol in communications programming. Server models. Socket interface usage and event-based programming. Synchronous and asynchronous operations, layers, parallelism and security in network programming. Realization of protocols according standards.	
<b>Teaching Methods</b>	Lectures 14 h, exercises 10 h, 2nd period. Exercises 8 h, 3rd period.	
<b>Assessment</b>	6 practical assignments. Final assignment. Assignments can not be combined from multiple years.	
<b>Course Material</b>	0 - 5. Practical assignments 70 %, final assignment 30 %. Exercises. Stevens, W.R.: Unix Network Programming, The Sockets Networking API, Vol. 1, 3rd Ed., Prentice Hall, 2004.	

<b>Prerequisites</b>	Internetworking with TCP/IP Vol. 3: Client-Server Programming and Application, Linux/POSIX Socket Version (Comer, D.E., Stevens, D.), 2000. C-language. Basic unix workstation usage skills. Recommended CT20A3000 Unix and System Programming, CT30A2500 TCP/IP -perusteet.	
<b>CT30A5800</b>	<b>COMMUNICATIONS SOFTWARE AND ARCHITECTURE</b>	<b>5 ECTS cr</b>
<b>Year and Period</b>	<b>Communications Software and Architecture, Tietoliikenneohjelmistot</b>	
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Aims</b>	Assistant, M.Sc. (Tech.) Oleg Chistokhvalov To give a student the basic knowledge about software, design and development.	
<b>Contents</b>	Message Sequence Chart, Finite State Machines, Petri Nets, Specification and Description Language, Abstract Syntax Notation 1, Protocol Design, Implementation and Verification, Protocol Layering Concept, Client/Server Paradigm, Protocol Standards.	
<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, 1st period. Lectures 14 h, exercises 14 h, project assignment, extra tasks, 2nd period. Exam.	
<b>Assessment</b>	0 - 5. Exam 70 %, project 30 %.	
<b>Course Material</b>	Lecture hand-outs.	
<b>Prerequisites</b>	Recommended CT20A4000 Ohjelmistotuotanto, CT30A2000 Tietoliikennetekniikan perusteet 1, CT30A2300 Tietokoneverkot ja datasiirto.	
<b>CT30A5900</b>	<b>COMMUNICATION SOFTWARE LABORATORY WORK</b>	<b>5 ECTS cr</b>
<b>Year and Period</b>	<b>Communication Software Laboratory Work, Protokollaohjelmointi</b>	
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Aims</b>	Assistant, M.Sc. (Tech.) Oleg Chistokhvalov To give a student the basic knowledge about a practical definition and realisation of communications and ability to apply this knowledge for the carrying out of software communications.	
<b>Contents</b>	The course includes practical laboratory assignments that deal with usage, design and implementation of protocol software. Protocol software design, implementation, and testing using C/C++/Java programming languages in a development environment (CVOPS/OVOPS/JVOPS).	
<b>Teaching Methods</b>	Laboratory demonstrations 14 h, 3rd period. Laboratory demonstrations 14 h, practical assignment, 4th period.	
<b>Assessment</b>	Project passed/failed.	
<b>Course Material</b>	Lecture hand-outs.	
<b>Prerequisites</b>	CT30A5800 Communications Software and Architecture. Recommended CT20A2310 Tietorakenteet ja algoritmit, CT20A2400 Olio-ohjelmoinnin perusteet, CT20A3000 Unix and System Programming, CT30A2000 Tietoliikennetekniikan perusteet 1, CT30A2300 Tietokoneverkot ja datasiirto.	
<b>CT30A6200</b>	<b>MOBILITY MANAGEMENT</b>	<b>4 ECTS cr</b>
<b>Year and Period</b>	<b>Mobility Management, Liikkuvuuden hallinta</b>	
<b>Lecturer(s)</b>	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Aims</b>	M.Sc. (Tech.) 2, Period 1 Senior Assistant, D.Sc. (Tech.) Pekka Jäppinen The aim is to familiarize the student with fundamentals of mobility management, providing basic understanding about its architectures, problems	

<b>Contents</b>	and possible solutions. Basic principles of Mobility Management. The most essential mobility management related protocols, such as Mobile IP. Mobility management technologies using on different protocol layers.
<b>Teaching Methods</b>	Lectures 28 h, 1st period. Practical assignment. Exam.
<b>Assessment</b>	0 - 5. Exam 80 %, practical assignment 20 %.
<b>Course Material</b>	Lecture material announced on lectures. Supplementary literature: Soliman, Hesham: Mobile IPv6 - Mobility in a Wireless Internet, Addison-Wesley, 2004.
<b>Prerequisites</b>	CT30A2500 TCP/IP -perusteet, CT30A2600 Langaton tietoliikenne.

<b>CT30A6500</b>	<b>PERFORMANCE ANALYSIS OF TELECOMMUNICATION SYSTEMS</b>	<b>5 ECTS cr</b>
	<b>Performance Analysis of Telecommunication Systems, Suorituskykyanalyysi</b>	
	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Jari Porras	
<b>Aims</b>	To describe the basic methods for modelling of computer and telecommunication systems.	
<b>Contents</b>	Markov Chains, Stochastic Petri Nets, Queueing Systems.	
<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, 1st period.	
<b>Assessment</b>	Lectures 14 h, exercises 14 h and practical assignment, 2nd period. Exam.	
<b>Course Material</b>	0 - 5. Exam 100 %. Practical assignment. Ghanbari, M. et al.: Principles of Performance Engineering for Telecommunication and Information Systems, CRC Press, 1997. Cassandras, C.G., Lafortune, S.: Introduction to Discrete Event Systems, Kluwer Academic Publishers, 1999.	

<b>CT30A6700</b>	<b>GROUP WORK COURSE ON COMMUNICATIONS SOFTWARE</b>	<b>8 ECTS cr</b>
	<b>Group Work Course on Communications Software, Tietoliikenteen ryhmätyökurssi</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-4	
<b>Lecturer(s)</b>	Part-time Untenured Teacher, Petri Heinilä	
<b>Aims</b>	Lecturer(s) responsible: Lecturer, D.Sc. (Tech.) Arto Kaarna To exercise skills and knowledge on large project work on protocol and software development, implementing communications software systems. To study different methods in communications software specification, design and implementation. The course is very practical.	
<b>Contents</b>	Particular communications software system is specified, designed and implemented with different methods (eg. UML, SDL, Java, C, C++, CVOPS). Software system is implemented as a large multi group project work during the year. The implementations made have to be working together.	
<b>Teaching Methods</b>	Lectures 6 h, exercises 14 h, 1st period. Lectures 4 h, exercises 14 h, 2nd period. Lectures 4 h, exercises 14 h, 3rd period. Lectures 4 h, exercises 14 h, 4th period. Independent group work 150 h. Course is given only if there are enough students enrolled.	

<b>Assessment</b>	0 - 5. Activity 30 %, implementations 50 %, group work 20 %.
<b>Course Material</b>	Will be announced on lectures.
<b>Prerequisites</b>	Recommended CT20A2400 Olio-ohjelmoinnin perusteet, CT20A3000 Unix and System Programming, CT20A4100 Ohjelmistotuotannon menetelmät, CT20A4400 Projektinhallinta, CT30A5000 Network Programming, CT30A5800 Communications Software and Architecture.

<b>CT30A7000</b>	<b>PARALLEL COMPUTING</b>	<b>6 ECTS cr</b>
	<b>Parallel Computing, Rinnakkaislaskennan perusteet</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Jari Porras	
<b>Aims</b>	Student understands the meaning, concepts as well as applications of parallel and distributed computing. He/she also knows different architectures and their usage. Student can implement simple parallel programs and utilize parallel methods on their own work.	
<b>Contents</b>	Emerging need for parallel computing, parallel architectures and their classification, performance meters and scalability as well as a general view of programming in a parallel environment.	
<b>Teaching Methods</b>	Lectures 28 h, exercises 14 h, 1st period.	
<b>Assessment</b>	Seminars 21 h, exercises 14 h, practical assignments, 2nd period. Exam.	
<b>Course Material</b>	0 - 5. Exam 50 %, presentation 25 %, practical assignments 25 %.	
<b>Prerequisites</b>	Grama, A. et al.: Introduction to Parallel Computing, Addison-Wesley, 2003. Recommended CT20A2600 Käyttöjärjestelmät, CT20A3000 Unix and System Programming.	

<b>CT30A7100</b>	<b>PARALLEL PROGRAMMING</b>	<b>5 ECTS cr</b>
	<b>Parallel Programming, Rinnakkaisohjelmoinnin perusteet</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Assistant, M.Sc. (Tech.) Jani Peusaari	
<b>Aims</b>	Student knows the difference between sequential and parallel programming and can implement advanced programs using multiple programming models. Student knows how to utilize essential features, e.g. optimized communication and load balancing, of parallel computing. He/she can also use specific tools that aid in debugging and analyzing parallel programs.	
<b>Contents</b>	Principles of parallel programming, differences between processes and threads. Usage of a cluster of workstations as a parallel programming environment. Programming using distributed libraries (PVM, MPI) and shared memory libraries (POSIX threads, OpenMP.) Debugging and analysis of parallel programs.	
<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, practical assignments, 3rd period.	
<b>Assessment</b>	Exercises 14 h, practical assignments, 4th period. Exam.	
<b>Course Material</b>	0 - 5. Practical assignments 100 %.	
<b>Prerequisites</b>	Foster, I.: Designing and building parallel programs, Addison-Wesley, 1995. Andrews, G.: Foundations of Multithreaded, Parallel and Distributed Programming, Addison-Wesley, 2000. Pacheco, P.: Parallel programming with MPI, Morgan Kaufmann Publishers, 1997. Butenhof, D.: Programming with POSIX threads, Addison-Wesley, 1997. Chandra R. et al.: Parallel Programming in OpenMP, Morgan Kaufman Publ., 2001. Lecture hand-outs.	
	Recommended CT20A2600 Käyttöjärjestelmät, CT20A3000 Unix and System Programming, CT30A7000 Parallel Computing.	

<b>CT30A7200</b>	<b>DESIGN OF PARALLEL ALGORITHMS</b>	<b>5 ECTS cr</b>
	<b>Design of Parallel Algorithms, Rinnakkaisalgoritmien suunnittelu</b>	
	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Jari Porras	
<b>Aims</b>	Student knows the obstacles and methods of parallel algorithm design. Through these skills student can solve problems and implement algorithms that solve those problems in parallel environments.	
<b>Contents</b>	Methods for the parallel algorithm design, design and analysis of parallel algorithms, parallel algorithms in different parallel environments. Algorithms are selected each year separately.	
<b>Teaching Methods</b>	Lectures 2 h, 3rd period. Lectures 2 h, practical exercise, 4th period. Independent reading and exercises. Oral exam.	
<b>Assessment</b>	0 - 5. Oral exam, practical exercise.	
<b>Course Material</b>	Jaja, J.: An Introduction to Parallel Algorithms, Addison-Wesley, 1992. Grama, A. et al.: Introduction to Parallel Computing, Addison-Wesley, 2003.	
<b>Prerequisites</b>	Recommended CT20A2300 Algoritmien suunnittelu, CT30A7000 Parallel Computing, CT30A7100 Parallel Programming.	
<b>CT30A7300</b>	<b>ADVANCED PARALLEL COMPUTING</b>	<b>5 ECTS cr</b>
	<b>Advanced Parallel Computing, Rinnakkaislaskennan jatkokurssi</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Jari Porras	
<b>Aims</b>	Gives an advanced view to the problems and needs of parallel computing in the modern world.	
<b>Contents</b>	Selected each year separately.	
<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, discussions, group works, 3rd period. Lectures 14 h, exercises 14 h, discussions, group works, practical assignment, 4th period. Exam.	
<b>Assessment</b>	0 - 5. Exam, discussions, group works, practical assignment.	
<b>Course Material</b>	Will be announced on lectures.	
<b>Prerequisites</b>	Recommended CT30A7000 Parallel Computing, CT30A7100 Parallel Programming.	
<b>CT30A7400</b>	<b>DISTRIBUTED OBJECT PROGRAMMING</b>	<b>6 ECTS cr</b>
	<b>Distributed Object Programming, Hajautettu objektiohjelmointi</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Jari Porras	
<b>Aims</b>	To introduce the student to the object-oriented design and open distributed processing based digital communication architectures and design methodology.	
<b>Contents</b>	Object-oriented systems, application level distribution and architectures in communication, remote procedure calls, service and interface descriptions, application data representation, object discovery services, related design patterns. Some (eg. CORBA, WebServices) distributed programming environment implementation is used to express concepts and practices of the distributed system.	
<b>Teaching</b>	Lectures 14 h, exercises 14 h, homeworks, 1st period.	

<b>Methods</b>	Lectures 14 h, exercises 14 h, homeworks, project work, 2nd period. Exam.
<b>Assessment</b>	0 - 5. Exam 50 %, project work 36 %, homeworks 14 %.
<b>Course Material</b>	Lecture notes.
<b>Prerequisites</b>	Recommended CT20A2410 Olio-ohjelmointi, CT20A4000 Ohjelmistotuotanto, CT30A2000 Tietoliikennetekniikan perusteet 1, CT30A5000 Network Programming.

<b>CT30A8300</b>	<b>WIRELESS SERVICE ENGINEERING</b>	<b>5 ECTS cr</b>
	<b>Wireless Service Engineering, Langattomien palveluiden tekniikka</b>	
	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Senior Assistant, D.Sc. (Tech.) Pekka Jäppinen	
<b>Aims</b>	To understand the challenges that wireless communication technologies and mobile devices provide to service development. To learn methods to improve the use of wireless services.	
<b>Contents</b>	Wireless service types: fixed services, mobile Internet services, ad hoc services, mobile p2p, ubiquitous services, environment services. The service perspective to mobile devices and wireless network technologies. Service discovery methods. Service enhancing technologies: adaptation and personalisation, context awareness, location.	
<b>Teaching Methods</b>	Lectures 21 h, demonstrations 14 h, exercises 14 h, practical assignment, 1st period.	
<b>Assessment</b>	Practical assignment, 2nd period. Exam.	
<b>Course Material</b>	0 - 5. Exam 50 %, practical assignments 50 %.	
<b>Prerequisites</b>	Will be announced on lectures. CT30A2600 Langaton tietoliikenne, CT30A5000 Network Programming. Recommended CT30A5200 Symbian-ohjelmointi, CT30A5800 Communications Software and Architecture.	

<b>CT30A8800</b>	<b>SECURED COMMUNICATIONS</b>	<b>6 ECTS cr</b>
	<b>Secured Communications, Suojatut tietoyhteydet</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Senior Assistant, D.Sc. (Tech.) Pekka Jäppinen	
<b>Aims</b>	To learn how to secure the communication channel between communicating devices.	
<b>Contents</b>	Security risks against communication channel. Creation of secure communication channel. Cryptographic methods: Symmetric and asymmetric encryption algorithms, hash functions, key exchange methods. Authentication methods. Digital signatures.	
<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, 1st period.	
<b>Assessment</b>	Lectures 8 h, seminars 20 h, practical assignment, 2nd period. Exam.	
<b>Course Material</b>	0 - 5. Exam 40 %, seminars 30 %, practical assignment 30 %. Trappe W., Washington L.C.: Introduction to Cryptography with Coding Theory. Schneier, B.: Applied Cryptography, Wiley, 1996. Kerttula, E.: Tietoverkkojen tietoturva, 2. painos, Edita, 2000. Lecture hand-outs.	
<b>Prerequisites</b>	CT30A3500 Tietoturvan perusteet. Recommended CT30A2500 TCP/IP -perusteet, CT30A5000 Network Programming.	

## 5 CBU Master's Degree Programme in Information and Communications Technology

The CBU Master's Programme in Information and Communications Technology is a two-year joint Master's degree programme which is produced in a concerted way in the network of four Finnish and three Russian universities.

**The partners in this international study programme are the following universities:**

- St. Petersburg State University
- St. Petersburg State Polytechnic University
- Petrozavodsk State University
- Lappeenranta University of Technology
- University of Kuopio
- University of Joensuu
- University of Helsinki

The objective of the study programme is to offer in each of the seven member universities a M.Sc. programme in ICT, which conforms to agreed CBU guidelines and facilitates cross-border collaboration in the exchange of academic resources, development of joint study modules, visiting lecturers etc.

The curriculum contains compulsory and elective modules, a M.Sc. project and a M.Sc. thesis. The total volume is 120 ECTS credits. The curriculum contains 60 acts of studies that are produced in cross-border collaboration. At Lappeenranta University of Technology, the alternative major subjects are Information Processing and Communications Engineering.

### Levels of collaboration of the CBU ICT-pilot Master's Programme

- Summer schools and winter schools
- Intensive courses by visiting lecturers
- Student visits to partner institutions
- Internet based courses
- Common projects in cross-border teams
- Jointly supervised M.Sc. projects

## Degree structure of CBU Master's Degree Programme in Information and Communications Technology

### Master of Science 120 ECTS cr

<i>ECTS cr</i>	
General Studies	31
Major Subject	60
Minor Subject	20
Elective Studies	9
<i>Total</i>	<i>120 ECTS cr (at least)</i>

**General studies 31 ECTS cr****Information Processing**

<i>Compulsory studies</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
FV11A9000	Academic Seminar for International Programs	1	1 – 2	6
FV...	Language studies *			2
BK10A0300	Introduction to MSc Studies	1	1 – 2	1
CT20A3000	Unix and System Programming	1	2 – 3	5
CT20A6400	Languages, Compilers and Interpreters	1	3 – 4	5
CT20A2500	Object-Oriented Programming Techniques	1	1 – 2	5
	CBU Summer/Winter School courses**	1-2		7

\*) The course FV13A1200 Teknisk svenska is obligatory for Finnish students who have not attained proficiency in Swedish in their previous degree.

\*) The course FV18A9100 Finnish for Foreigners 1 is obligatory for foreign students.

\*\*) CBU summer schools and winter schools contain several special courses, from which the student selects at least 7 ECTS cr. The CBU Summer and Winter Schools are organised in cross-border collaboration as one-week intensive lecturing in one of the CBU-ICT partner universities alternately. Studies exceeding 7 ECTS cr may be included as elective courses in the major subject.

**Communications Engineering**

<i>Compulsory studies</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
FV11A9000	Academic Seminar for International Programs	1	1 – 2	6
FV...	Language studies *			2
BK10A0300	Introduction to MSc Studies	1	1 – 2	1
CT30A2700	Network Design and Traffic Engineering	1	3 – 4	5
CT30A5800	Communications Software and Architectures	1	1 – 2	5
CT30A5900	Communications Software Laboratory Work	1	3 – 4	5
	CBU Summer/Winter School courses **	1-2		7

\*) The course FV13A1200 Teknisk svenska is obligatory for Finnish students who have not attained proficiency in Swedish in their previous degree.

\*) The course FV18A9100 Finnish for Foreigners 1 is obligatory for foreign students.

\*\*) CBU summer schools and winter schools contain several special courses, from which the student selects at least 7 ECTS cr. The CBU Summer and Winter Schools are organised in cross-border collaboration as one-week intensive lecturing in one of the CBU-ICT partner universities alternately. Studies exceeding 7 ECTS cr may be included as elective courses in the major subject

**Major in Information Processing 60 ECTS cr**

The major subject is to be chosen at the beginning of the studies when students prepare an individual study plan (HOPS).

<i>Compulsory studies 38 ECTS cr</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
CT10A9500	Research Methods	1	1	3
CT10A9600	Research Methods Laboratory Project*	1	2 – 4	5
	Master's Thesis*	2		30

Courses marked with \*) are carried out in cross-border collaboration.

<i>Elective studies</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
CT20A6000	Pattern Recognition	1	3 – 4	7
CT20A6100	Machine Vision and Digital Image Analysis	1	1 – 2	7

CT20A6200	Computer and Robot Vision	1	1 – 2	7
CT20A6300	Evolutionary Algorithms	1	1 – 2	5
CT20A7000	Information Systems Research	1	1 – 2	7
CT20A7200	Architecture in Systems and Software Development	1	3 – 4	5
		1	1 – 2	5
CT20A7300	Software Quality, Processes, and Organizations		2	2
CT10A9700	Summer School on Communications Engineering	2		2
	ECSE International Summer School in Novel Computing			
	CBU Winter/Summer School courses **			
	Courses offered by CBU Universities ***			

\*\* Additional credits not included in the general studies.

\*\*\* See the newest list at the CBU-ICT website. The suitability of the course for your major should be verified beforehand from Dr. Pekka Jäppinen.

### Major in Communication Technology 60 ECTS cr

The major subject is to be chosen at the beginning of the studies when students prepare an individual study plan (HOPS).

<i>Compulsory studies 38 ECTS cr</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
CT10A9500	Research Methods	1	1	3
CT10A9600	Research Methods Laboratory Project*	1	2 – 4	5
	Master's Thesis*	2		30

Courses marked with \*) are carried out in cross-border collaboration.

<i>Elective studies</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
CT30A6200	Mobility Management (will be lectured during the academic year 2007 – 2008)			4
CT30A6500	Performance Analysis of Telecommunication Systems	1	1 – 2	5
CT30A6700	Group Work Course on Communications Software	1	1 – 4	8
CT30A7000	Parallel Computing	1	1 – 2	6
CT30A7100	Parallel Programming	1	3 – 4	5
CT30A7200	Design of Parallel Algorithms	1	3 – 4	5
CT30A7300	Advanced Parallel Computing (will be lectured during the academic year 2007 – 2008)			5
CT30A7400	Distributed Object Programming	1	1 – 2	6
CT30A8300	Wireless Service Engineering	2	1 – 2	5
CT30A8800	Secured Communications	1	1 – 2	6
CT10A9700	Summer School on Communications Engineering	2		2
	ECSE International Summer School in Novel Computing	2		2
	CBU Winter/Summer School courses **			
	Courses offered by CBU universities ***			

\*\* Additional credits not included in the general studies.

\*\*\* See the newest list at the CBU-ICT website. The suitability of the course for your major should be verified beforehand from Dr. Pekka Jäppinen.

### Master's Thesis 30 ECTS cr

Two examiners will be appointed to supervise the Master's Thesis. The first examiner/supervising professor must be appointed from Lappeenranta University of Technology and the second examiner must be from a Russian CBU-ICT university.

**Minor Subject in Cross Border Studies 20 ECTS cr**

Students must choose 20 cr from the courses lectured at the Russian CBU-ICT partner universities

**Elective Studies**

To attain the full 120 ECTS cr, students may need to take some additional courses. Elective studies can include any courses offered by LUT or another CBU-ICT university.

**Complementary Studies**

Students with a Finnish polytechnic degree or equivalent will have to complete complementary studies. They are not included in the Master's degree.

**Individual Study Plan**

At the beginning of their studies, students prepare an individual study plan (HOPS). Individual study plans will be approved by the main programme coordinator, Dr. Pekka Jäppinen, who will give further information on how to prepare and update the individual study plan. The workload of the degree of Master of Science is 120 ECTS credits. From the total amount of 120 ECTS cr, 60 ECTS credits must be completed in a Russian CBU-ICT university in cross-border collaboration.

**CBU-ICT courses**

CBU-ICT courses offered in different partner universities are available on the website [http://www.it.lut.fi/international\\_studies/cbu/index.html](http://www.it.lut.fi/international_studies/cbu/index.html)

## 6 Master's Degree Programme in Electrical Engineering

The Master's degree programme in electrical engineering is structured around a series of discipline specific study programs. The degree program provides training in the discipline

- Electrical engineering
- Technomathematics
- Technical physics

Within these disciplines the student is given the opportunity to specialize in the subject area of his interest.

### Electrical Engineering - The Aim of the Programme

The programme is specifically aimed at students who wish to receive multiple and goal-directed training in electrical engineering technology. It focuses on preparing students to be professionally and academically prepared to address the needs of international entrepreneurial companies seeking for networking opportunities in a globalizing market.

Our aim is to educate industrially orientated, world-class professionals with firm theoretical understanding and profound expertise in the following fields of specialization:

- Electrical drives technology - the studies focus on the management of electromagnetism, power electronics, electromechanical and electrothermal processes.
- Control engineering engineering - the studies concentrate on the industrial applications of real-time control systems, embedded software, digital signal processing, and on the application of these to the modeling and control of electric drives and power electronics.
- Electricity distribution and market - the studies focus on electricity distribution automation and power transmission, network business technology, regulation, and economy

### The Degree Structure

Depending on the degree and/or on the level and extent of studies the student has obtained from his or her home university and based on his or her field of interest and specialization, **for every admitted student will be composed an individual study program**. The study programme in electrical engineering is structured of following subject blocks:

Master of Science (Technology)	Major (incl. Master's Thesis), Minor and Elective Studies 120 ECTS cr.		
	Master's Thesis on major subject 30 ECTS credits		
	Electrical Engineering General studies 29 ECTS credits <b>Major</b> <b>Industrial Electronics</b> Major subject studies 30 ECTS credits	Electrical Engineering General studies 33 ECTS credits <b>Major</b> <b>Electricity Distribution and Market</b> Major subject 27 ECTS credits	Minor subject 20 ECTS credits
	Select a major subject		Elective studies

One major and one minor subject have to be chosen from the technology fields in electrical engineering. Economics and languages must be chosen as a minor subject only.

## Industrial Electronics

### General Studies

		<i>per.</i>	<i>ECTS cr</i>
FV11A9000	Academic Seminar for International Programs	2-4	6
BM20A1300	Complex Analysis	3	3
BM20A1900	Statistics II	2	3
BM20A2700	Numerical Analysis II	3	3
BM20A2800	Nonlinear Optimization	4	4
FV18A9100	Finnish for Foreigners 1	1, 3	2
FV18A9200	Finnish for Foreigners 2	2, 4	2
BH50A1200	Energy Systems Engineering	1-2	6

### Major Studies

		<i>per.</i>	<i>ECTS cr</i>
BL30A0400	Design of an Electrical Machine	1	6
BL30A0600	Power Electronics	1-2	6
BL30A1010	Seminar Course in Electrical Drives	1	4
BL30A1200	Numerical Methods in Electromagnetism	3	4
BL40A1000	Real-time Operating Systems and Programs	1-2	5
BL40A1100	Embedded System Programming	1-2	4
BL40A1200	Digital Control Design	1-2	4
BL50A0600	Electromagnetic compatibility in power electronics	1	2
Thesis	Master's Thesis		30

### Minor Studies

		<i>per.</i>	<i>ECTS cr</i>
BL40A1810	Microprocessors A	3-4	6
BL40A1900	Advanced Course in Electronics	3-4	6
BL60A0200	Microelectronics	3	6
BL60A0300	Computer Architecture	1	6

Alternatively to the minor subject suggested in the study programme the student can choose any minor subject taught in English at LUT.

### Elective Studies

		<i>per.</i>	<i>ECTS cr</i>
CS10A0050	Introduction to International Business	4	4
CS10A0300	Business Forecasting	1	4
CS10A0850	Transitional Countries Integration with the European Union - Trade, Manufacturing and Labour Perspective	4	5
CS34A0500	Technology Commercialization and Corporate Venturing	4 int.	5
AB30A0300	International Finance and Emerging Markets	2	5
FV11A9300	Scientific and Technical English Writing Course	3-4	4

To attain the full degree amount of 120 ECTS credits the student needs to take some additional courses. Elective studies can include any courses taught in English at LUT if the required prerequisites are completed.

## Electricity Distribution and Market

### General Studies

		<i>per.</i>	<i>ECTS cr</i>
FV11A9000	Academic Seminar for International Programs	2-4	6
BM20A1900	Statistics II	2	3
AB30A0300	International Finance and Emerging Markets	2	5
BM20A1300	Complex Analysis	3	3
BM20A2700	Numerical Analysis II	3	3
BM20A2800	Nonlinear Optimization	4	4
BH50A1200	Energy Systems Engineering	1-2	6
FV18A9100	Finnish for Foreigners 1	1, 3	2
FV18A9200	Finnish for Foreigners 2	2, 4	2

### Major Studies

		<i>per.</i>	<i>ECTS cr</i>
BL20A0201	Power exchange game for electricity markets	2-3	3
BL20A0401	Electricity market	1	5
BL20A0501	Electricity distribution technology	2-3	8
BL20A0601	Electrical power transmission	2	5
BL30A0600	Power Electronics	1-2	6
Thesis	Master's Thesis		30

### Minor Studies

		<i>per.</i>	<i>ECTS cr</i>
BL30A1010	Seminar Course in Electrical Drives	1	4
BL30A1200	Numerical Methods in Electromagnetism	3	4
BL40A1100	Embedded System Programming	1-2	4
BL40A1810	Mikroprosessorit A	3-4	6
BL50A0600	Electromagnetic compatibility in power electronics	1	2

Alternatively to the minor subject suggested in the study programme the student can choose any minor subject taught in English at LUT.

### Elective Studies

		<i>per.</i>	<i>ECTS cr</i>
CS10A0050	Introduction to International Business	4	4
CS10A0300	Business Forecasting	1	4
CS10A0850	Transitional Countries Integration with the European Union - Trade, Manufacturing and Labour Perspective	4	5
CS34A0500	Technology Commercialization and Corporate Venturing	4 int.	5
FV11A9300	Scientific and Technical English Writing Course	3-4	4

To attain the full degree amount of 120 ECTS credits the student needs to take some additional courses. Elective studies can include any courses taught in English at LUT if the required prerequisites are completed.

## The Courses Offered in English

		<i>ECTS cr</i>
BL10A5000	Basic Finnish course for Russian-speaking students	2
BL20A0201	Power exchange game for electricity markets	3
BL20A0401	Electricity market	5
BL20A0501	Electricity distribution technology	8
BL20A0601	Electrical power transmission	5
BL30A0400	Design of an Electrical Machine	6
BL30A0600	Power Electronics	6
BL30A1010	Seminar Course in Electrical Drives	4
BL30A1200	Numerical Methods in Electromagnetism	4
BL40A1000	Real-time Operating Systems and Programs	5
BL40A1100	Embedded System Programming	4
BL40A1200	Digital Control Design	4
BL40A1810	Microprocessors A	6
BL40A1900	Advanced Course in Electronics	6
BL40A2200	Process and Product Innovations	12
BL50A0600	Electromagnetic compatibility in power electronics	2
BL60A0200	Microelectronics	6
BL60A0300	Computer Architecture	6
BL60A0400	Physics of Semiconductor Devices	3 - 6
BL60A0500	CMOS Analog Circuit Design	3 - 6
BL60A0600	Analog Circuit Design	6
BL60A0700	Silicon VLSI Technology	3 - 6

### Course Descriptions

<b><i>BL10A5000</i></b>	<b><i>BASIC FINNISH COURSE FOR RUSSIAN-SPEAKING STUDENTS</i></b>	<b><i>2 ECTS cr</i></b>
	<b>Basic Finnish course for Russian-speaking students</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	M.A. Julia Vauterin Lecturer(s) responsible: Lecturer, Raija Hietaranta	
<b>Aims</b>	The aims of the course are to introduce the student into the basics of the Finnish language, to give the student the skills to cope with simple everyday discussions, to offer exercises to assess the student's progress in studies and to encourage the student to learn Finnish independently with the support of internet courses.	
<b>Contents</b>	Pronunciation, oral skills, listening comprehension, writing, reading and grammar.	
<b>Teaching Methods</b>	28 h of tutorials, 1nd and 2rd period. Independent studies, group work, written assignment.	
<b>Assessment</b>	0 - 5, active participation in class, examination in writing 100%	
<b>Course Material</b>	Afanaseva Valentina, Razinov P.: Finskij jazyk dlja nachinajushchih. Other material to be distributed during the lectures.	
<b><i>BL20A0201</i></b>	<b><i>POWER EXCHANGE GAME FOR ELECTRICITY MARKETS</i></b>	<b><i>3 ECTS cr</i></b>
	<b>Power exchange game for electricity markets</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2-3	
<b>Lecturer(s)</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Jarmo Partanen	
<b>Aims</b>	The course deepens the student's knowledge of the practical planning and implementation of electricity trade in the form of game training.	

<b>Contents</b>	Planning of the procurement and sale of electricity, OTC markets, physical and financial products of power exchange, risk management on the electricity markets.
<b>Teaching Methods</b>	8 h of lectures, 40 h of game training that is carried out once a week in teams, 2nd and 3rd period. A final report in writing.
<b>Assessment</b>	0 - 5, final report in writing 100%
<b>Course Material</b>	Material to be distributed during the lectures.
<b>Prerequisites</b>	Electricity market

<b>BL20A0401</b>	<b>ELECTRICITY MARKET</b>	<b>5 ECTS cr</b>
	<b>Electricity market</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Jarmo Partanen	
<b>Aims</b>	The course gives the student a basic knowledge of the fundamentals of electricity trade and the electricity distribution business as well as of the related objectives and implementations.	
<b>Contents</b>	The development of electricity markets, loads on the electricity network and load forecasts, power exchange, electricity trade, balance management, the fundamentals of pricing and the regulation of distribution business.	
<b>Teaching Methods</b>	28 h of lectures, 14 h of tutorials, 1st period. Independent studies. Written examination.	
<b>Assessment</b>	0 - 5, examination 100%.	
<b>Course Material</b>	Material to be distributed during the lectures.	

<b>BL20A0501</b>	<b>ELECTRICITY DISTRIBUTION TECHNOLOGY</b>	<b>8 ECTS cr</b>
	<b>Electricity distribution technology</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2-3	
<b>Lecturer(s)</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Jarmo Partanen	
<b>Aims</b>	The course provides the student with in-depth knowledge of the design and use of distribution networks.	
<b>Contents</b>	Network design; the use, protection, and automation of distribution networks; information systems of distribution companies.	
<b>Teaching Methods</b>	42 h of lectures, 28 h of tutorials, 2nd and 3rd period. Assignment. Written examination.	
<b>Assessment</b>	0 - 5, examination 100%. Satisfactorily completed assignment required.	
<b>Course Material</b>	Lakervi, Holmes: Electricity distribution network design (where applicable). Lakervi: Sähkönjakeluverkkojen suunnittelu, Otatiето.	
<b>Prerequisites</b>	Students are required to have completed Introduction to Electrical Power Systems, Electrical Power Transmission, and have attended the lectures of Electricity Markets.	

<b>BL20A0601</b>	<b>ELECTRICAL POWER TRANSMISSION</b>	<b>5 ECTS cr</b>
	<b>Electrical power transmission</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2	
<b>Lecturer(s)</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Jarmo Partanen	
<b>Aims</b>	This course provides the student with a basic knowledge of the design and use of electricity transmission networks.	
<b>Contents</b>	The description of the electricity transmission system. Frequency and voltage control. Calculation of load flow, fault currents and stability in a meshed network. DC power transfer. Relay protection.	
<b>Teaching Methods</b>	24 h of lectures, 14 h of tutorials, 2nd period. Written examination.	
<b>Assessment</b>	0 - 5, examination 100%.	
<b>Course Material</b>	Mörsky: Voimalaitosten yhteiskäytön tekniikka (Otatiето Moniste 549).	

<b>Prerequisites</b>	Mörsky: Relesuojaustekniikka. (Otatieto, moniste 540). Students are required to have completed Electric Circuits and attended the lectures of Introduction to Electrical Power Systems.	
<b>BL30A0400</b>	<b>DESIGN OF AN ELECTRICAL MACHINE</b>	<b>6 ECTS cr</b>
	<b>Design of an Electrical Machine</b>	
	<b>Suomenkielinen opetusmoniste sekä suomenkieliset harjoitustehtävät ovat saatavilla.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Juha Pyrhönen	
<b>Aims</b>	The course will give the student a basic knowledge of the thorough calculation of an electric machine as well as the skills required in finding structural solutions based on desired machine characteristics. Further, the students are trained to compare these solutions by calculating, to utilise mathematical software in calculation, and to analyse the machine characteristics by measurements. The students are also acquainted with simulations as well as with the mechanical aspects of the machine design.	
<b>Contents</b>	The magnetic circuit of an electric machine, the windings of an electric machine, impacts of the structure of the electric motor on the motor characteristics, calculation of the parameters of an equivalent circuit from the dimensions of the machine, effective-value phasor diagrams for different machine types, principles of electric machine design (induction motor).	
<b>Teaching Methods</b>	28 h of lectures, 28 h of tutorials, 1st period.	
<b>Assessment</b>	The design assignment of an electric machine. Written examination.	
<b>Course Material</b>	0 - 5, written examination 100%. Satisfactorily completed assignment required. Pyrhönen: Design of a rotating electric machine (Pyörivän sähkökoneen suunnitteleminen). Pyrhönen: Magneettiset materiaalit (where applicable). C.B. Gray: Electrical Machines and Drive Systems (where applicable).	
<b>Prerequisites</b>	Students are recommended to have completed Electric Circuits, Basics of Electric Engineering, and Laboratory Course in Electrical Engineering and attended the lectures of Electromagnetism.	
<b>BL30A0600</b>	<b>POWER ELECTRONICS</b>	<b>6 ECTS cr</b>
	<b>Power Electronics</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Lasse Laurila	
<b>Aims</b>	The course provides the student with a good general knowledge of the different basic circuits in modern power electronics. The course acquaints students with the features and functions of different switch-mode converters and inverters. In addition, the course will offer an insight into the joint operation of static converters and load as well as the network interferences caused by converters and possibilities for reducing these interferences.	
<b>Contents</b>	Operation of the main circuits of different power converters: rectifiers (single and three-phase), DC-DC switch mode converters and power supplies (buck, boost, buck-boost, Cúk, flyback, forward), inverters (single and three-phase), resonance converters (ZVS, ZCS). Characteristics and operation. Pulse width modulation (PWM). Harmonic components. Simulation of power electronic circuits.	
<b>Teaching Methods</b>	14 h of lectures, 14 h of tutorials, 1st period	
<b>Assessment</b>	14 h of lectures, 14 h of tutorials, 2nd period. Written examination	
<b>Course Material</b>	0 - 5, written examination 100% Mohan, Undeland, Robbins: Power Electronics, converters, applications, and design, where applicable.	
<b>Prerequisites</b>	Electric Circuits. Integration and derivation (esp. sine and cosine functions). FFT. Laplace transforms.	

<b>BL30A1010</b>	<b>SEMINAR COURSE IN ELECTRICAL DRIVES</b>	<b>4 ECTS cr</b>
	<b>Seminar Course in Electrical Drives</b>	
	<p>The course is designed for students of the Master's degree programme in electrical engineering and for students and postgraduate students interested in the fundamental principles of electrical drives. It is an intensive overview of Sa271000 Sähkökäytöt and will be lectured only if required.</p>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Juha Pyrhönen	
<b>Aims</b>	The course addresses the theory and operation of electrical motor drives. In particular, the course focuses on the operation of modern AC drives. The course is intended for persons working on controlled electrical drives. The course is an essential prerequisite for those involved in the CDMC co-operation.	
<b>Contents</b>	Theory, operation and equivalent circuits of electrical motor drives. Fundamentals of space vector theory. Synchronous drive. Asynchronous drive. DC drive. Torque production mechanisms in different machines. Power electronic connections for motor control. Scalar control, vector control. Direct flux linkage control and direct torque control (DTC).	
<b>Teaching Methods</b>	Intensive course. 3 sessions of 6 h lectures, 1 session of 6 h seminar, 1 session of 6 h tutorials, 1st period. Seminar work.	
<b>Assessment</b>	0 - 5, seminar work 100%.	
<b>Prerequisites</b>	The students are recommended to have completed the courses Electric Circuits, Basics of Electric Engineering, and Laboratory Course in Electrical Engineering, and to have attended the courses Design of an Electrical Machine and Power Electronic Components; Introduction to Electrical Drives, Electromagnetic Components.	
<b>BL30A1200</b>	<b>NUMERICAL METHODS IN ELECTROMAGNETISM</b>	<b>4 ECTS cr</b>
	<b>Numerical Methods in Electromagnetism</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 3	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Janne Nerg	
<b>Aims</b>	This course trains the student to use commercial calculation software and to select the best solution for the specific purpose.	
<b>Contents</b>	The fundamentals of the element method, boundary conditions, the modelling of materials, the post-processing of results. Iron loss models. Eddy current problems, utilisation of circuit model in calculation.	
<b>Teaching Methods</b>	28 h of supervised tutorials. 3rd period.	
<b>Assessment</b>	0 - 5, assignment 100%	
<b>Prerequisites</b>	Introduction to Electrical Drives and Design of an Electrical Machine	
<b>BL40A1000</b>	<b>REAL-TIME OPERATING SYSTEMS AND PROGRAMS</b>	<b>5 ECTS cr</b>
	<b>Real-time Operating Systems and Programs</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Julius Luukko	
<b>Aims</b>	The course provides the student with skills needed for constructing an application program of an embedded system by using real-time operating system as the architecture. The student is trained to utilise the services of a real-time operating system.	
<b>Contents</b>	Basic concepts of a real-time system. Services provided by a real-time	

<b>Teaching Methods</b>	operating system: task management, time management, semaphores, mutual exclusion semaphores (mutex), event flags, mailboxes, message queues, and memory management. Implementation of a real-time operating system: context switch, interrupt management. Processor-specific parts of a real-time operating system and adapting the real-time operating system to a new processor.
<b>Assessment</b>	21 h of lectures, 14 h of tutorials, 1st period. 21 h of lectures, 14 h of tutorials, 2nd period. Written examination.
<b>Course Material</b>	0 - 5, examination 100%. Satisfactorily completed assignment required.
<b>Prerequisites</b>	Labrosse, J.J.: MicroC/OS-II The Real-Time Kernel (2nd Edition). Embedded System Programming.

<b>BL40A1100</b>	<b>EMBEDDED SYSTEM PROGRAMMING</b>	<b>4 ECTS cr</b>
------------------	------------------------------------	------------------

	<b>Embedded System Programming</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Tuomo Lindh	
<b>Aims</b>	The course provides the student with skills to apply C language and its structures in embedded system programming.	
<b>Contents</b>	Embedded system programming, design tools, C language in embedded system programming, the utilisation of microcontroller environment (registers, timers, buses, A/D conversion etc.). Typical data structures, typical program structures in real-time applications. Programming the Windows interface, basic properties of real-time operating systems.	
<b>Teaching Methods</b>	14 h of lectures, 14 h of tutorials, 1st period. 14 h of lectures, 14 h of tutorials, 2nd period. Assignment. Written examination.	
<b>Assessment</b>	0 - 5, examination 100%. Satisfactorily completed assignment required.	
<b>Course Material</b>	Wolf, W.: Computers as components: principles of embedded computing system design. Lecture notes.	
<b>Prerequisites</b>	Basics of C language, knowledge of the basic structure of microprocessors.	

<b>BL40A1200</b>	<b>DIGITAL CONTROL DESIGN</b>	<b>4 ECTS cr</b>
------------------	-------------------------------	------------------

	<b>Digital Control Design</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Olli Pyrhönen	
<b>Aims</b>	The course provides the student with skills to design and implement digital control algorithms in a discrete time domain. The focus lays mainly on discrete state-space design methodology.	
<b>Contents</b>	State feedback, state estimator, design of a state-space controller, polynomial control design. Fundamentals of multivariable control system. Simulation of digital control system with Simulink. Programming of digital control for a microprocessor. Design examples. Utilisation of MATLAB in control design. Examples of control solutions in industrial electronics.	
<b>Teaching Methods</b>	14 h of lectures, 14 h of tutorials, 1st period. 6 h of demonstration lectures, 14 h of tutorials in computer class, 2nd period.	
<b>Assessment</b>	Assignment. Written examination.	
<b>Prerequisites</b>	0 - 5, examination 100%. Satisfactorily completed assignment required. Control Systems, Introduction and Digital Control, an Introduction.	

<b>BL40A1810</b>	<b>MICROPROCESSORS A</b>	<b>6 ECTS</b>
------------------	--------------------------	---------------

<b>Year and Period</b>	3rd year, Period 3 - 4	
<b>Lecturers</b>	Professor, D.Sc. (Tech.) Jero Ahola	
<b>Aims</b>	The course acquaints the student with the functioning and use of microprocessor components. The course gives the students the skills to program and design embedded microcomputer systems.	
<b>Contents</b>	The architecture, instruction set and functioning of a microprocessor.	

<b>Course Work</b>	Microcontrollers. The structure and design of memory circuits and peripheral components. System design. Programming and development support. Application examples. An introduction to signal processors. 3 <sup>rd</sup> period: 14 h of lectures, 14 h of tutorials.
<b>Course Material</b>	4 <sup>th</sup> period: 14 h of lectures, 14 h of tutorials. Assignment. Written examination.
<b>Prerequisites</b>	Lecture notes. Basic Digital Circuits and Basic Electronics A + B, Fundamentals of Programming.

<b>BL40A1900</b>	<b>ADVANCED COURSE IN ELECTRONICS</b>	<b>6 ECTS cr</b>
	<b>Advanced Course in Electronics</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Pertti Silventoinen	
<b>Aims</b>	During this course, the student will obtain a deep knowledge of a new topic in electronics. The course can also be included in post-graduate studies.	
<b>Contents</b>	The course contents are subject related and will be specified during the introductory lectures.	
<b>Teaching Methods</b>	2h of introductory lectures 2 h, 12 h of seminar presentations, 3rd period. 14 h of seminar presentations, 4th period. No written examination.	
<b>Assessment</b>	0 - 5, seminar presentation 100%.	

<b>BL40A2200</b>	<b>PROCESS AND PRODUCT INNOVATIONS</b>	<b>12 ECTS cr</b>
	<b>Process and Product Innovations</b>	
	<b>For Finnish and international students from the departments of Chemical Technology, Mechanical Engineering, Electrical Engineering and Industrial Engineering and Management. The number of participants is limited and students will be selected on the basis of applications.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 3-4,1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Olli Pyrhönen, Researcher/Teacher, D.Sc. (Tech.) Riku Pöllänen, Professor, D.Sc. (Tech.) Tuomo Kässi, Researcher/Teacher, D.Sc. (Tech.) Kimmo Kerkkänen, Researcher/Teacher, D.Sc. (Tech.) Ville Ojanen	
<b>Aims</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Ilkka Turunen To get acquainted with the generation of innovations and new technology, the typical methods, problems and their solutions. To train project and teamwork in interdisciplinary, international environment. To get acquainted with product and process development. To train and deepen many skills learned in other connections.	
<b>Contents</b>	Methods of product and process development. Interdisciplinary R & D activities as project and teamwork. Development of new technology, patenting.	
<b>Teaching Methods</b>	Informational lectures, 6 h/period. Project meetings, 6 h/period.	
<b>Assessment</b>	Independent project and teamwork in groups of 4-8 students approximately 300 h/student. 0-5, project work 100 %.	

<b>BL50A0600</b>	<b>ELECTROMAGNETIC COMPATIBILITY IN POWER ELECTRONICS</b>	<b>2 ECTS cr</b>
	<b>Electromagnetic compatibility in power electronics</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Pertti Silventoinen	
<b>Aims</b>	This course provides the student with skills to understand the occurrence	

<b>Contents</b>	mechanisms of interferences in power electronics, the effects of cable reflection, and the occurrence mechanisms and prevention of network harmonics. Power electronics as an interference source, network harmonics, reflection phenomena of cables, conductive RF interference, interference radiation of power electronics, filtering techniques of conductive interferences.
<b>Teaching Methods</b>	14 h of lectures, 1st period.
<b>Assessment</b>	An assignment to be completed as pair work. Written examination. 0 - 5, written examination 100%. Satisfactorily completed assignment required.

<b>BL60A0200</b>	<b>MICROELECTRONICS</b>	<b>6 ECTS cr</b>
<b>Year and Period</b>	<b>Microelectronics</b>	
<b>Lecturer(s)</b>	<b>The course will be lectured in English if required.</b>	
<b>Aims</b>	M.Sc. (Tech.) 1, Period 3 Professor, Ph.D. Tuure Tuuva To acquaint students with integrated circuit technology and provide them with skills for analog IC design. Students will learn the most important variables and functions related to the components of integrated circuits. Components will be modelled with simulation programs. The assignment of IC design will be carried out with a suitable design program.	
<b>Contents</b>	Semiconductor physics for the analysis of the operation of components. The geometry and design rules of IC components. PN junctions, MOS, BJT, and passive components in IC.	
<b>Teaching Methods</b>	3rd period: 28 h of lectures, 28 h of tutorials.	
<b>Assessment</b>	Assignment and its presentation. Written examination.	
<b>Course Material</b>	0 - 5, examination 100%. Satisfactorily completed assignment required..	
<b>Prerequisites</b>	Roger T. Howe, Charles G. Sodini: Microelectronics An Integrated Approach. Students are recommended to have completed the courses Basic Course on Microelectronics, Analog Electronics, and Digital Electronics.	

<b>BL60A0300</b>	<b>COMPUTER ARCHITECTURE</b>	<b>6 ECTS cr</b>
<b>Year and Period</b>	<b>Computer Architecture</b>	
<b>Lecturer(s)</b>	<b>The course will be lectured in English if required.</b>	
<b>Aims</b>	M.Sc. (Tech.) 1, Period 1 Professor, Ph.D. Tuure Tuuva To acquaint students with the components of a computer and the design aspects of different types of computers.	
<b>Contents</b>	The fundamentals of computer design and performance measurements. The Central Processing Unit (CPU), pipelining and multiprocessor systems, memory hierarchies. I/O, a look at the latest commercial processors as well as their applications and technologies.	
<b>Teaching Methods</b>	14 h of lectures, 1st period. Independent study and assignments. Written examination.	
<b>Assessment</b>	0 - 5, examination 100%. Satisfactorily completed assignment required.	
<b>Course Material</b>	Patterson, D.A., Hennessy, J.L.: Computer Architecture: A Quantitative Approach. Morgan Kaufmann, San Mateo, CA, 3. painos, 2002.	
<b>Prerequisites</b>	Students are recommended to have completed the courses Basic Digital Circuits and Microprocessors A.	

<b>BL60A0400</b>	<b>PHYSICS OF SEMICONDUCTOR DEVICES</b>	<b>3 - 6 ECTS cr</b>
<b>Year and Period</b>	<b>Physics of Semiconductor Devices</b>	
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1-2 Professor, Ph.D. Tuure Tuuva, Assistant, M.Sc. (Tech.) Tanja Palviainen	

<b>Aims</b>	To provide the student with an in-depth knowledge of semiconductor devices and their operation.
<b>Contents</b>	Structure, operation and physics of semiconductor devices.
<b>Teaching Methods</b>	Special assignment.
<b>Assessment</b>	Evaluation pass/failed, special assignment 100%.
<b>Course Material</b>	Sze, Physics of Semiconductor Devices.

<b>BL60A0500</b>	<b>CMOS ANALOG CIRCUIT DESIGN</b>	<b>3 - 6 ECTS cr</b>
	<b>CMOS Analog Circuit Design</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2	
<b>Lecturer(s)</b>	Professor, Ph.D. Tuure Tuuva	
<b>Aims</b>	To provide the student with a knowledge of the IC design and characterization.	
<b>Contents</b>	CMOS circuit technology, analog IC design and device modelling.	
<b>Teaching Methods</b>	Special assignment	
<b>Assessment</b>	Evaluation pass/failed, special assignment 100%.	
<b>Course Material</b>	Allen, Holberg, CMOS Analog Circuit Design	

<b>BL60A0600</b>	<b>ANALOG CIRCUIT DESIGN</b>	<b>6 ECTS cr</b>
	<b>Analog Circuit Design</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2	
<b>Lecturer(s)</b>	Professor, Ph.D. Tuure Tuuva	
<b>Contents</b>	Special circuit applications, VCO, DA/AD converters and Chopper amplifiers	
<b>Teaching Methods</b>	Special assignment.	
<b>Assessment</b>	0 - 5, special assignment 100%.	
<b>Course Material</b>	Williams, Analog Circuit Design	
<b>Prerequisites</b>	Microelectronics	

<b>BL60A0700</b>	<b>SILICON VLSI TECHNOLOGY</b>	<b>3 - 6 ECTS cr</b>
	<b>Silicon VLSI Technology</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2	
<b>Lecturer(s)</b>	Professor, Ph.D. Tuure Tuuva, Assistant, M.Sc. (Tech.) Tanja Palviainen	
<b>Aims</b>	To provide students with a knowledge of the IC manufacturing techniques. Simulation of the manufacturing process or/and integrated circuit processing as a special assignment.	
<b>Contents</b>	Cleaning of semiconductor materials. Production of silicon wafers. Epitaxy. Diffusion. Ion implantation. Oxidization. Etching. Photolithography. Component manufacturing.	
<b>Teaching Methods</b>	Special assignment.	
<b>Assessment</b>	Evaluation pass/failed, special assignment 100%.	
<b>Course Material</b>	Silicon VLSI Technology: Fundamentals, Practice and Modelling, James D.Plummer, Michael D.Deal, Peter B.Griffin	

## Technomathematics

Technomathematics is part of the two-year programme IMPEE for both Finnish and international students. Students majoring in Technomathematics should have a Bachelor's degree in engineering, applied mathematics, computer science or equivalent discipline. The programme is worth 120 credits and includes coursework of 90 credits and a Master's Thesis of 30 credits, leading to a Master of Science in Technology degree. Lectures and tutoring are given in English. The application period for the programme is in January-February annually.

### The Aims

The aim is to develop the student's mathematical and computational skills for industry and other research and development tasks. The professional scope is wide-ranging and growing rapidly. Technomathematics is the art and science of applying mathematics and computational models into real life problems in industrial research and applied science, such as

- measurements, experiments and intelligent data-analysis
- modelling and simulation of systems and processes
- production management and process monitoring/control
- financial models, risk analysis and decision support systems

We train our graduates to combine modeling, computational skills, advanced theory and data analysis in innovative ways. We provide solutions to questions of industrial R&D. Some examples of applications and research areas: inverse problems, stochastic methods, Bayesian methods with MCMC, fuzzy logic and systems, fuzzy methods in knowledge engineering, data assimilation techniques, computational fluid dynamics, wavelets and image/signal analysis, data intensive methods in weather models, forest inventory and environmental monitoring.

Education in Applied Mathematics at LUT is international. One of our goals is the development of university pedagogy in applied mathematics education. We also provide the student with a capability for post-graduate studies and independent research.

### Requirements in Basic Studies

Students who enter the Master's Degree Programme and major in Technomathematics are assumed to have a B.Sc. in applied mathematics, computer science or information technology. The students should have basic knowledge in computing including data structures and some programming skills. Furthermore, the students must have familiarity with PC work stations and basic data manipulation tools.

Regarding mathematics the student should master calculus, also in functions of several variables. He/she is assumed to know basics of matrices, linear algebra, differential equations and optimization, numerical algorithms, statistics and probability. Knowledge of discrete models, fuzzy models and methods is of great advantage. It is assumed that student has knowledge in physics covering basic phenomena in mechanics, electricity, thermal and wave phenomena. Independence, team work and communication skills are important. The education is given in English, thus good communication skills in English are necessary both orally and in writing.

<b>Degree Structure</b>		
General Studies	10	ECTS cr
Major Subject, obligatory studies	16	ECTS cr
Major Subject, elective modules	30	ECTS cr
Minor Subject	20	ECTS cr
Elective Studies	14	ECTS cr
Master's Thesis	30	ECTS cr
<i>Total</i>	<i>120 (min.)</i>	<i>ECTS cr</i>

**General Studies 10 ECTS cr**

<i>Obligatory Studies (10 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BK10A0300	Introduction to M.Sc. Studies	M.Sc. (Tech.) 1	1	1
CT10A9500	Research Methods	M.Sc. (Tech.) 1	1	3
FV11A9000	Academic Seminar for International Programs		2-4	6

**Major Subject, obligatory studies 16 + 30 ECTS cr**

<i>Obligatory Studies (46 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BM20A2100	Differential Equations	M.Sc. (Tech.) 1-23		4
BM20A2200	Logic and Discrete Methods	M.Sc. (Tech.) 1	4	4
BM20A2500	Linear Algebra and Normed Spaces	M.Sc. (Tech.) 1-21		3
BM20A4000	Case Study Seminar	M.Sc. (Tech.) 1	1-4	5
Thesis	Master's Thesis			30

**Major Subject, elective modules 30 ECTS cr**

Choose two modules from a-d. The extent of each module should be at least 15 ECTS cr.

**a) Computational Modelling of Technical Systems**

<i>Obligatory Studies (7 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BM20A2700	Numerical Analysis II	M.Sc. (Tech.) 1	3	3

<i>Elective Studies</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BM20A1900	Statistics II	M.Sc. (Tech.) 1- 2 2	3	3
BM20A2700	Numerical Analysis II	M.Sc. (Tech.) 1 3	3	3
BM20A2800	Nonlinear Optimization	M.Sc. (Tech.) 1- 4 2	4	4
BM20A2900	Discrete Optimization	M.Sc. (Tech.) 1- 4 2	4	4
BM20A3100	Fuzzy Sets and Fuzzy Logic	M.Sc. (Tech.) 1- 2 2	4	4
BM20A3300	Stochastic Theory and Models	M.Sc. (Tech.) 1 4	3	3
BM20A3800	Advanced Mathematical Methods	M.Sc. (Tech.) 1 1-4	3-6	

#### **Minor Subject 20 ECTS cr**

The minor subject will be selected from the minor subject modules available at other departments. There might be limitations regarding studies available in English. The minor subject selection should be discussed with the supervising professor or the MS programme coordinator in Technomathematics.

#### **Elective Studies 14 ECTS cr**

Elective courses may be chosen from various subjects. Also studies passed in other universities during exchange programmes can be accepted. The student should discuss the choice of elective courses with his/her supervisor.

#### **Master's Thesis 30 ECTS cr**

Thesis topics arise from various application areas, research projects and contacts with industry. Typically, the thesis contains a theoretical study, as well as the use of up-to-date mathematical and computational methods for solving an application practical problem.

Lecturer, Ph.D. Matti Heiliö (room 1343, [firstname.lastname@lut.fi](mailto:firstname.lastname@lut.fi))

## Technical Physics

Technical Physics is part of the two-year programme IMPEE for both international and Finnish students. Students majoring in Technical Physics should have a Bachelor's degree. The programme, leading to a Master of Science in Technology degree, is worth totally 120 credits including Master's Thesis of 30 credits. Depending on the degree and/or the level and extent of studies the student has obtained from his or her home university and based on his or her field of interest and specialization, for every admitted student will be composed an individual study programme. The application period for the programme is in January-February annually.

The aim of the major subject Technical Physics is to prepare the student professionally and academically in physics and other technical science skills in industry and other research and development tasks. The programme also provides the student with readiness for post-graduate studies and independent research.

### Degree Structure

General Studies	19	ECTS cr
Major Subject (inc. Master's Thesis)	70	ECTS cr
Minor Subject	20	ECTS cr
Elective Studies	11	ECTS cr
<i>Total</i>	<i>120 (min.)</i>	<i>ECTS cr</i>

### General Studies 19 ECTS cr

<i>Obligatory Studies (19 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BM20A2100	Differential Equations	M.Sc. (Tech.) 1-2	3	4
BM20A2500	Linear Algebra and Normed Spaces	M.Sc. (Tech.) 1-2	1	3
BK10A0300	Introduction to M.Sc. Studies	M.Sc. (Tech.) 1	1	1
BL10A5000	Basic Finnish course for Russian-speaking students	M.Sc. (Tech.) 1	1-2	2
CT10A9500	Research Methods	M.Sc. (Tech.) 1	1	3
FV11A9000	Academic Seminar for International Programs		2-4	6

### Major Subject 70 ECTS cr

<i>Obligatory Studies (62 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BM30A0500	Applied Optics	M.Sc. (Tech.) 1	2	6
BM30A1100	Superconductor Physics	M.Sc. (Tech.) 1	1-2	6
BL30A0600	Power Electronics	M.Sc. (Tech.) 1	1-2	6
BL50A0600	Electromagnetic compatibility in power electronics	M.Sc. (Tech.) 1	1	2
BL60A0200	Microelectronics	M.Sc. (Tech.) 1	3	6
BL60A0400	Physics of Semiconductor Devices	M.Sc. (Tech.) 1-2		6
Thesis	Master's Thesis			30

<i>Elective Studies</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BM30A1000	Semiconductor Physics	M.Sc. (Tech.) 1	1-2	6
AB30A0300	International Finance and Emerging Markets	M.Sc. (Econ. & Bus. Adm.) 1	2	5
BL30A1200	Numerical Methods in Electromagnetism	M.Sc. (Tech.) 2	3	4
BL40A1900	Advanced Course in Electronics	M.Sc. (Tech.) 1	3-4	6
BL60A0500	CMOS Analog Circuit Design	M.Sc. (Tech.) 1-2		3-6

BL60A0600	Analog Circuit Design	M.Sc. (Tech.) 1-2		6
BL60A0700	Silicon VLSI Technology	M.Sc. (Tech.) 1-2		3-6
CS10A0050 <sup>*</sup>	Introduction to International Business	B.Sc. (Tech.) 2	4	4
CS10A0300	Business Forecasting	M.Sc. (Tech.) 1	1	4
CS10A0850	Transitional Countries Integration with the European Union - Trade, Manufacturing and Labour Perspective	M.Sc. (Tech.) 1	4	5

<sup>\*</sup> The course will be studied in the 4th year (M.Sc. (Tech.) 1).

### Minor Subject 20 ECTS cr

The minor subject will be selected from the minor subject modules available at other departments. There might be limitations regarding studies available in English. The minor subject selection should be discussed with the supervising professor or the MS programme coordinator in Technical Physics.

### Elective studies 11 ECTS cr

The student should discuss the choice of elective courses with his/her supervisor.

### Master's Thesis 30 ECTS cr

Thesis topics arise from various application areas, research projects and contacts with different universities. Typically, the thesis contains a theoretical study, experimental part and analysis of the experimental results.

## The Courses Offered in English

	<i>ECTS cr</i>	
BM20A1300	Complex Analysis	3
BM20A1900	Statistics II	3
BM20A2000	Simulation	4
BM20A2100	Differential Equations	4
BM20A2200	Logic and Discrete Methods	4
BM20A2500	Linear Algebra and Normed Spaces	3
BM20A2600	Integral Transforms	3
BM20A2700	Numerical Analysis II	3
BM20A2800	Nonlinear Optimization	4
BM20A2900	Discrete Optimization	4
BM20A3000	Statistical Analysis in Modelling	4
BM20A3100	Fuzzy Sets and Fuzzy Logic	4
BM20A3200	Fuzzy Engineering	4
BM20A3300	Stochastic Theory and Models	3
BM20A3400	Design of Experiments	3
BM20A3500	Functional Analysis	3
BM20A3600	Fuzzy Data Analysis	4
BM20A3700	Fuzzy Decision Making	4
BM20A3800	Advanced Mathematical Methods	3 - 6
BM20A3900	Modelling Methodology in Process Engineering	6
BM20A4000	Case Study Seminar	5
BM30A0500	Applied Optics	6
BM30A1000	Semiconductor Physics	6
BM30A1100	Superconductor Physics	6

## Course Descriptions

<b>BM20A1300</b>	<b>COMPLEX ANALYSIS</b>	<b>3 ECTS cr</b>
	<b>Complex Analysis</b>	
	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 3	
<b>Lecturer(s)</b>	Senior Assistant, D.Sc. (Tech.) Pasi Luukka	
<b>Aims</b>	Give the students the necessary knowledge of complex analysis needed in technical applications.	
<b>Contents</b>	Complex number arithmetics and roots. Complex functions, also as mappings of complex plane. Derivative of a complex function and analytical functions. Complex integration, Cauchy's theorem and Residue theorem.	
<b>Teaching Methods</b>	Lectures 28 h, exercises 14 h, 3rd period. Exam.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Kreyszig, E.: Advanced Engineering Mathematics, 8th Ed., Part D.	
<b>Prerequisites</b>	Recommended Mathematics A and B.	
<b>BM20A1900</b>	<b>STATISTICS II</b>	<b>3 ECTS cr</b>
	<b>Statistics II</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 2	
<b>Lecturer(s)</b>	Lecturer, Ph.D. Matti Heiliö	

<b>Aims</b>	To give the students deeper understanding about statistical hypothesis testing, introduction to distributions of several variables, and multiple regression analysis.
<b>Contents</b>	Basic data analysis. Statistical inference: hypothesis testing. Nonparametric tests. Distributions of several variables. Correlation. Curve fitting and nonlinear regression. Multiple regression analysis. Elements of time series analysis and decision theory. Introduction to multivariate methods.
<b>Teaching Methods</b>	Lectures 28 h, exercises 14 h, assignment, 2nd period. Exam.
<b>Assessment</b>	0-5, examination 70 %, assignment 30 %.
<b>Course Material</b>	Will be announced on lectures.
<b>Prerequisites</b>	Recommended BM20A1400 Tilastomatematiikka I.

<b>BM20A2000</b>	<b>SIMULATION</b>	<b>4 ECTS cr</b>
	<b>Simulation</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Professor, Ph.D. Heikki Haario	
<b>Aims</b>	The course gives an introduction to the concepts of discrete simulation models and methods together with numerical examples.	
<b>Contents</b>	Basic concepts, discrete and continuous systems. Random numbers, discrete event generation by random numbers. Statistical and empirical distributions for event generation. Application examples: queuing systems, storage size optimization. Building numerical simulation examples with Matlab.	
<b>Teaching Methods</b>	Lectures 28 h, exercises 14 h, practical assignment, 1st period. Exam.	
<b>Assessment</b>	0-5, examination 100 %. Practical assignment.	
<b>Prerequisites</b>	Recommended BM20A1400 Tilastomatematiikka I.	

<b>BM20A2100</b>	<b>DIFFERENTIAL EQUATIONS</b>	<b>4 ECTS cr</b>
	<b>Differential Equations</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 3	
<b>Lecturer(s)</b>	Professor, Ph.D. Heikki Haario	
<b>Aims</b>	The course introduces the basic concepts of ordinary and partial differential equations together with numerical solution methods.	
<b>Contents</b>	Linear and nonlinear ordinary differential equations. Initial and boundary value problems. Stability and phase space presentation of solutions. Numerical solutions for ordinary differential equations with Matlab solvers. Basic types of partial differential equations: advection, diffusion/heat, wave equations. Numerical solutions with semidiscretization methods. Modelling examples from different engineering fields.	
<b>Teaching Methods</b>	Lectures 28 h, exercises 28 h, practical assignment, 3rd period. Exam.	
<b>Assessment</b>	0-5, examination 100 %. Practical assignment.	
<b>Prerequisites</b>	Mathematics A and B. Recommended BM20A1600 Matriisilaskenta, BM20A2700 Numerical Analysis II.	

<b>BM20A2200</b>	<b>LOGIC AND DISCRETE METHODS</b>	<b>4 ECTS cr</b>
	<b>Logic and Discrete Methods</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 4	
<b>Lecturer(s)</b>	Professor, Ph.D. Jorma Mattila	
<b>Aims</b>	To introduce essential methods of logic and discrete mathematics for computer science. A student can use these methods in formal environments of computer	

<b>Contents</b>	science and related topics. The course consists of classical logic and resolution method, inductive, recursive and relational methods for computer science. Graphs and trees, grammars, formal languages and parsing are included in the course. Resolution method for non-classical logics is considered. Applications of number theory to computer science are also considered.
<b>Teaching Methods</b>	Lectures 21 h, exercises 14 h, 4th period. Exam.
<b>Assessment</b>	0-5, examination 100 %.
<b>Course Material</b>	Grassmann, W.K., Tremblay J-P.: Logic and Discrete Mathematics. A Computer Science Perspective, Prentice Hall, 1996.

<b>BM20A2500</b>	<b>LINEAR ALGEBRA AND NORMED SPACES</b>	<b>3 ECTS cr</b>
	<b>Linear Algebra and Normed Spaces</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 1	
<b>Lecturer(s)</b>	Lecturer, Ph.D. Matti Heiliö	
<b>Aims</b>	Essentials of linear analysis in normed spaces and principles which are needed to understand methods of applied mathematics.	
<b>Contents</b>	Vector spaces and linear operators. Linear subspaces and projection. Norms, metric and convergence. Function spaces. Banach spaces, L <sub>p</sub> -spaces. Inner product and orthogonality. Hilbert spaces. Theory of matrices, eigenvalues and spectral decomposition. Applications in systems and signal analysis, numerical methods, optimization.	
<b>Teaching Methods</b>	Lectures 21 h, exercises 14 h, 1st period. Exam.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Lay, D.: Linear Algebra and its Applications, Addison-Wesley, 2000. Kreyszig, E.: Introductory Functional Analysis with Applications, Wiley, 1989. Reddy, B.D.: Introductory Functional Analysis, with applications to Boundary Value Problems and Finite Elements, Springer, 1998.	
<b>Prerequisites</b>	BM20A1600 Matriisilaskenta. Recommended BM20A1200 Vektorikentät, BM20A2600 Integral Transforms.	

<b>BM20A2600</b>	<b>INTEGRAL TRANSFORMS</b>	<b>3 ECTS cr</b>
	<b>Integral Transforms</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 4	
<b>Lecturer(s)</b>	Lecturer(s) responsible: Senior Assistant, D.Sc. (Tech.) Pasi Luukka	
<b>Aims</b>	To show how different transform techniques are used in order to solve certain engineering problems.	
<b>Contents</b>	Laplace transform, Fourier transform, z-transform. Examples of applications of transforms in engineering problem solving.	
<b>Teaching Methods</b>	Lectures 28 h, exercises 14 h, 4th period. Exam.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Kreyszig, E.: Advanced Engineering Mathematics, Wiley, 1999. James, G.: Advanced Modern Engineering Mathematics, Addison-Wesley, 1993.	
<b>Prerequisites</b>	Recommended Mathematics A and B.	

<b>BM20A2700</b>	<b>NUMERICAL ANALYSIS II</b>	<b>3 ECTS cr</b>
	<b>Numerical Analysis II</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3	
<b>Lecturer(s)</b>	Professor, Ph.D. Heikki Haario	
<b>Aims</b>	An introduction to methods of numerical integration and to solving ordinary and partial differential equations on a computer.	
<b>Contents</b>	Numerical differentiation, Numerical integration, Gaussian quadrature, Romberg integration. Numerical solution of ordinary differential equations, Runge-Kutta methods, stiffness and how to deal with it. Numerical solution of simple partial differential equations. Laplace equation, finite difference methods, finite element methods and related matrix computations.	
<b>Teaching Methods</b>	Lectures 21 h, exercises 14 h, 3rd period. Exam.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Will be announced at lectures.	
<b>Prerequisites</b>	Mathematics A and B. Recommended BM20A1500 Numeerinen analyysi I, BM20A1600 Matriisilaskenta.	
<b>BM20A2800</b>	<b>NONLINEAR OPTIMIZATION</b>	<b>4 ECTS cr</b>
	<b>Nonlinear Optimization</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 4	
<b>Lecturer(s)</b>	Lecturer, Lic.Phil. Sirkku Parviainen	
<b>Aims</b>	The course introduces the concepts of nonlinear optimization and provides the basic skills for formulating and solving nonlinear optimization tasks.	
<b>Contents</b>	Formulation of optimization models. Classification of optimization problems. Optimization of a function of one variable. Optimality criteria in unconstrained and constrained optimization. Line search methods, unconstrained multivariate optimization methods. Methods for constrained optimization. Methods for global optimization. Principles of evolutionary algorithms. Introduction to stochastic optimization. Optimization software tools, examples with Matlab.	
<b>Teaching Methods</b>	Self study based on literature. Exam.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Bazaraa, M. S., Sherali, H. S., Shetty, C. M.: Nonlinear Programming: Theory and Algorithms, Wiley, 2006. Rao, S. S.: Engineering Optimization: Theory and Practice, Wiley, 1996.	
<b>Prerequisites</b>	Mathematics A and B, BM20A1500 Numeerinen analyysi I. Experience in programming or using mathematical software required.	
<b>BM20A2900</b>	<b>DISCRETE OPTIMIZATION</b>	<b>4 ECTS cr</b>
	<b>Discrete Optimization</b>	
	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 4	
<b>Lecturer(s)</b>	Lecturer, Lic.Phil. Sirkku Parviainen	
<b>Aims</b>	To introduce the student to discrete or combinatorial optimization methods and problems.	
<b>Contents</b>	Discrete optimization problems. Algorithms and computational complexity. Polynomial-time problems and NP-complete problems. Integer linear	

<b>Teaching Methods</b>	programming. Assignment problem. Traveling salesman problem: solution with branch&bound and heuristic methods. Routing and packing problems: solution with heuristics and dynamic programming. Principles of genetic algorithms and simulated annealing methods in discrete optimization.
<b>Assessment</b>	Lectures 28 h, exercises 28 h, 4th period. Practical assignment. Exam.
<b>Course Material</b>	0-5, examination 100 %. Practical assignment.
<b>Prerequisites</b>	Will be announced on lectures. Experience in programming or using mathematical software required. Recommended BM20A1800 Lineaarinen optimointi.
<b>BM20A3000</b>	<b>STATISTICAL ANALYSIS IN MODELLING</b> <b>4 ECTS cr</b>
<b>Year and Period</b>	<b>Statistical Analysis in Modelling</b>
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 2
<b>Aims</b>	Professor, Ph.D. Heikki Haario
<b>Contents</b>	Introduction to the methods of estimating reliability of modelling. Errors and uncertainty in experimental data. Uncertainty in model parameters and prediction results. Bayesian approach for parameter estimation and inverse problems, various Monte Carlo (MCMC) methods for nonlinear models. Lectures 21 h, exercises 14 h, 2nd period. Practical assignment. Exam.
<b>Teaching Methods</b>	0-5, examination 100 %. Practical assignment.
<b>Assessment</b>	Mathematics A and B, BM20A1400 Tilastomatematiikka I. Recommended
<b>Prerequisites</b>	BM20A2000 Simulation.
<b>BM20A3100</b>	<b>FUZZY SETS AND FUZZY LOGIC</b> <b>4 ECTS cr</b>
<b>Year and Period</b>	<b>Fuzzy Sets and Fuzzy Logic</b>
<b>Lecturer(s)</b>	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>
<b>Aims</b>	M.Sc. (Tech.) 1-2, Period 2
<b>Contents</b>	Professor, Ph.D. Jorma Mattila To introduce mathematics of fuzzy systems. The student will learn the relations between crisp and fuzzy sets and those between algebras of crisp and fuzzy sets, some function algebras, lattices of membership functions and the basic things of L-sets. The student will learn also non-classical logics and some basic things of mathematical fuzzy logic basing on Lukasiewicz algebras. The course consists of concept of fuzziness, some algebras of fuzzy sets, fuzzy quantities, logical aspects of fuzzy sets, operations of fuzzy sets, relations, universal approximation, and fuzzy modelling and control. Lectures 28 h, exercises 14 h, 2nd period. Practical assignment. Exam.
<b>Teaching Methods</b>	0-5, examination 100 %. Practical assignment.
<b>Assessment</b>	Nguyen, H.T., Walker, E.A.: A First Course in Fuzzy Logic, 2nd Ed., Chapman & Hall/CRC, 2000.
<b>Course Material</b>	Recommended BM20A2300 Sumeat menetelmät.
<b>Prerequisites</b>	
<b>BM20A3200</b>	<b>FUZZY ENGINEERING</b> <b>4 ECTS cr</b>
<b>Year and Period</b>	<b>Fuzzy Engineering</b>
<b>Lecturer(s)</b>	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>
	M.Sc. (Tech.) 1-2, Period 4
	Professor, Ph.D. Jorma Mattila

<b>Aims</b>	To introduce fuzzy systems in engineering environment. The student will learn function approximation methods with fuzzy systems and how to model and solve control problems and learn some image processing methods. Finally, fuzzy cognitive maps are introduced.
<b>Contents</b>	Fuzzy sets and relations. Fuzzy functions and rule-based systems. Mamdani fuzzy system and Sugeno-Tagaki fuzzy system. Universal approximator theorem. Fuzzy control. Fuzzy controllers in applications. Some image processing techniques. Fuzzy cognitive maps with applications.
<b>Teaching Methods</b>	Lectures 28 h, exercises 14 h, 4th period. Practical assignment. Exam.
<b>Assessment</b>	0-5, examination 100 %. Practical assignment.
<b>Course Material</b>	Bandemer, H., Näther, W.: Fuzzy Data Analysis, Kluwer Academic Publ., 1992. Kosko, B: Fuzzy Engineering, Prentice-Hall, 1996. Passino, K.M., Yurkovich, S.: Fuzzy Control, Addison-Wesley, 1998.
<b>Prerequisites</b>	Recommended BM20A2300 Sumeat menetelmät, BM20A3100 Fuzzy Sets and Fuzzy Logic.

<b>BM20A3300</b>	<b>STOCHASTIC THEORY AND MODELS</b>	<b>3 ECTS cr</b>
	<b>Stochastic Theory and Models</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 4	
<b>Lecturer(s)</b>	Lecturer, Ph.D. Matti Heiliö	
<b>Aims</b>	To present theory of stochastics and advanced statistical methods for understanding systems and phenomena containing randomness and uncertainty.	
<b>Contents</b>	Theory of stochastics applicable to modelling and analysing systems where randomness is inherent in a non-trivial way. Stochastic processes, conditional expectations and martingales. Brownian motion, introduction to Ito-integral and stochastic differential equations. Time series and ARMA-models. Regression and linear statistical models. Analysis and identification of nonlinear statistical models. Bayesian and MCMC methods.	
<b>Teaching Methods</b>	Virtual course. Lectures (web) 14 h, exercises 12 h, project assignment, 4th period. Self-study material. Exam.	
<b>Assessment</b>	0-5, examination 50 %, project assignment 50 %.	
<b>Course Material</b>	Will be announced at lectures.	
<b>Prerequisites</b>	BM20A1400 Tilastomatematiikka I. Recommended BM20A1900 Statistics II, BM20A2500 Linear Algebra and Normed Spaces.	

<b>BM20A3400</b>	<b>DESIGN OF EXPERIMENTS</b>	<b>3 ECTS cr</b>
	<b>Design of Experiments</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 4	
<b>Lecturer(s)</b>	Senior Assistant, D.Sc. (Tech.) Pasi Luukka	
<b>Aims</b>	Introduction to the basic concepts for efficient planning of experiments.	
<b>Contents</b>	Importance of experimental design, minimization of prediction uncertainty. Basic factorial designs: 2 <sup>N</sup> , Central Composite designs for regression analysis. Variance analysis for qualitative factors. The Taguchi principles. Experimental optimisation of engineering processes.	
<b>Teaching Methods</b>	Lectures 28 h, exercises 28 h, practical assignment, 4th period. Exam.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Prerequisites</b>	Mathematics A and B, BM20A1400 Tilastomatematiikka I. Recommended BM20A1600 Matriisilaskenta.	

<b>BM20A3500</b>	<b>FUNCTIONAL ANALYSIS</b>	<b>3 ECTS cr</b>
	<b>Functional Analysis</b>	
	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 2	
<b>Lecturer(s)</b>	Lecturer, Ph.D. Matti Heiliö	
<b>Aims</b>	Principles of functional analysis giving a basis for understanding modern theory and methods in applied mathematics.	
<b>Contents</b>	Hilbert spaces and Banach spaces. Measures and Lebesgue integral, Lp-spaces. Basics of calculus of variations and optimal control. Integral transforms. Elements of wavelet theory and linear systems theory. Sobolev norms, variational principle and weak solutions of PDE:s. Introduction to stochastic differential equations.	
<b>Teaching Methods</b>	Lectures 21 h, exercises 14 h, 2nd period. Exam.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Kreyszig, E.: Introductory functional analysis with applications, Wiley, 1989. Reddy, B.D.: Introductory Functional Analysis, with applications to Boundary value problems and finite elements, Springer, 1998. Curtain, R.F., Pritchard, A.J.: Functional analysis in modern applied mathematics, Academic Press, 1977. Rao, R.M., Bopardikar, A.S.: Wavelet transforms, Introduction to theory and applications, Addison-Wesley, 1998.	
<b>Prerequisites</b>	BM20A2500 Linear Algebra and Normed Spaces. Recommended BM20A1300 Complex Analysis, BM20A1500 Numeerinen analyysi I, BM20A2600 Integral Transforms.	
<b>BM20A3600</b>	<b>FUZZY DATA ANALYSIS</b>	<b>4 ECTS cr</b>
	<b>Fuzzy Data Analysis</b>	
	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 3	
<b>Lecturer(s)</b>	Senior Assistant, D.Sc. (Tech.) Pasi Luukka	
<b>Aims</b>	To introduce theoretical aspects of data analysis. The student will learn how to model and analyze uncertainty in different problem settings.	
<b>Contents</b>	Fuzzy sets and relations. Uncertainty measures. Qualitative and quantitative analysis of fuzzy data. Introduction to possibility theory and generalized measure theory. Evaluation of methods.	
<b>Teaching Methods</b>	Lectures 28 h, exercises 14 h, 3rd period. Practical assignment. Exam.	
<b>Assessment</b>	0-5, examination 100 %. Practical assignment.	
<b>Course Material</b>	Bandemer, H., Näther, W.: Fuzzy Data Analysis, Kluwer Academic Publ., 1992.	
<b>Prerequisites</b>	Recommended BM20A2300 Sumeat menetelmät, BM20A3100 Fuzzy Sets and Fuzzy Logic.	
<b>BM20A3700</b>	<b>FUZZY DECISION MAKING</b>	<b>4 ECTS cr</b>
	<b>Fuzzy Decision Making</b>	
	<b>The course will be lectured next time during the academic year 2007 - 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 2	
<b>Lecturer(s)</b>	Professor, Ph.D. Jorma Mattila	

<b>Aims</b>	To introduce decision making in a fuzzy environment. The student will learn approximate reasoning, fuzzy neural networks, fuzzy clustering, fuzzy screening systems and some perspectives on fuzzy decision making.
<b>Contents</b>	The central methods of fuzzy inference and decision making.
<b>Teaching Methods</b>	Lectures 28 h, exercises 14 h, 2nd period. Practical assignment. Exam.
<b>Assessment</b>	0-5, examination 100 %. Practical assignment.
<b>Course Material</b>	Fullér, R.: Introduction to Neuro-Fuzzy Systems, Physica-Verlag, 2000.
<b>Prerequisites</b>	Recommended BM20A2300 Sumeat menetelmät, BM20A3100 Fuzzy Sets and Fuzzy Logic.

<b>BM20A3800</b>	<b>ADVANCED MATHEMATICAL METHODS</b>	<b>3 - 6 ECTS cr</b>
	<b>Advanced Mathematical Methods</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-4	
<b>Lecturer(s)</b>	Lecturer, Ph.D. Matti Heiliö	
<b>Aims</b>	Student will obtain theoretical and operational skills in some specific area of applied mathematics.	
<b>Contents</b>	The course will demand reading literature, working on exercises and practical projects. Material will be individually chosen according to the focus of the study module, students' interests and research task. The topic may be for example optimization, numerical methods, PDE:s, stochastics, theory of algorithms, wavelets, filtering, systems analysis etc. The course with the same title can be included in the study programme twice when two distinct areas are covered.	
<b>Teaching Methods</b>	Self study material, exam and/or report.	
<b>Assessment</b>	0-5, examination and/or report 100 %.	
<b>Prerequisites</b>	Recommended BM20A1200 Vektorikentät, BM20A1500 Numeerinen analyysi I, BM20A1600 Matriisilaskenta.	

<b>BM20A3900</b>	<b>MODELLING METHODOLOGY IN PROCESS ENGINEERING</b>	<b>6 ECTS cr</b>
	<b>Modelling Methodology in Process Engineering</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Researcher/Teacher, Ph.D. Tuomo Kauranne	
<b>Aims</b>	The course provides an overview to the concepts and techniques of mathematical modelling in process engineering.	
<b>Contents</b>	Types of modelling: empirical and physicochemical models and the use of them. Measurement of uncertainty in experimental data. Basic concepts of regression methods for empirical models. Building physicochemical models for engineering processes from first principles. How to employ various mathematical tools to formulate and numerically solve models. Least squares methods, curve fitting and parameter estimation. Examples from data analysis, process modelling, pulp and paper technology, chemical engineering, and signal processing among others. Examples and exercises with Matlab.	
<b>Teaching Methods</b>	Lectures 21 h, exercises 14 h, 1st period. Lectures 21 h, exercises 14 h, 2nd period. Practical assignment. Exam.	
<b>Assessment</b>	0-5, examination 100 %. Practical assignment.	
<b>Course Material</b>	Giordano, Frank R. - Weir, Maurice D. - Fox, William P.: A first course in mathematical modeling, Brooks/Cole, 1997. Borrelli, R., Coleman, C.: Differential Equations: A Modeling Perspective, John Wiley & Sons, 2003. Svobodny, T.: Mathematical Modeling for Industry and Engineering, Prentice Hall, 1998.	
<b>Prerequisites</b>	Mathematics A and B. Recommended BM20A1400 Tilastomatematiikka I, BM20A1500 Numeerinen analyysi I, BM20A1600 Matriisilaskenta, BM20A2100 Differential Equations.	

<b>BM20A4000</b>	<b>CASE STUDY SEMINAR</b>	<b>5 ECTS cr</b>
	<b>Case Study Seminar</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-4	
<b>Lecturer(s)</b>	Professor, Ph.D. Heikki Haario	
<b>Aims</b>	The course gives an introduction to independent scientific work by presenting seminar works from different fields of applied mathematics.	
<b>Contents</b>	The course works in a seminar form. Each student receives a project work topic and presents the problem as well as the work plan in the beginning. Typically, the topics cover modelling problems from different engineering fields, together with numerical solutions. Solution methods for the project work problems are discussed during the course. At conclusion, the participants present their project works.	
<b>Teaching Methods</b>	Exercises 14 h, 1st period. Exercises 14 h, 2nd period. Exercises 14 h, 3rd period. Exercises 14 h, 4th period.	
<b>Assessment</b>	Extended project work. Seminar is held in each period. Pass/fail. To pass the course student must attend 7 weeks and present his/her project work.	
<b>Prerequisites</b>	Mathematics A and B. Recommended BM20A1500 Numeerinen analyysi I, BM20A1600 Matriisilaskenta, BM20A3900 Modelling Methodology in Process Engineering.	
<b>BM30A0500</b>	<b>APPLIED OPTICS</b>	<b>6 ECTS cr</b>
	<b>Applied Optics</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2	
<b>Lecturer(s)</b>	Lecturer, Ph.D. Pertti Silfsten	
<b>Aims</b>	The aims of the course are to describe basic optical phenomena and their applications particularly in the field of optical measurement technology and to provide the students with the skills to understand the operation of optical measurement instruments.	
<b>Contents</b>	Ocular optics. Colour optics. Optical measurement instruments. Interferometry. Polarisation. Diffraction. Fourier optics. The optical properties of materials.	
<b>Teaching Methods</b>	Lectures 42 h, tutorials 28 h, 2nd period. Written examination.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Pertti Silfsten: Sovellettu optiikka.	
<b>Prerequisites</b>	Students are recommended to have completed Physics or Physics L.	
<b>BM30A1000</b>	<b>SEMICONDUCTOR PHYSICS</b>	<b>6 ECTS cr</b>
	<b>Semiconductor Physics</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, Ph.D. Erkki Lähderanta	
<b>Aims</b>	The course gives the student the skills to understand the behaviour of semiconductors. This understanding is based on the comprehension of the electron dynamics and the energy band.	
<b>Contents</b>	A basic knowledge of the phenomena governing the operation of semiconductors, starting from the basis of material physics.	
<b>Teaching Methods</b>	Lectures 28 h, tutorials 14 h, 1st period. Lectures 14 h, tutorials 14 h, 2nd period. Written examination.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Juha Sinkkonen: Puolijohdeteknologian perusteet.	
<b>Prerequisites</b>	A knowledge of the fundamentals of material physics, a knowledge of the electric and physical properties of materials.	

---

<b>BM30A1100</b>	<b>SUPERCONDUCTOR PHYSICS</b>	<b>6 ECTS cr</b>
	<b>Superconductor Physics</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, Ph.D. Erkki Lähderanta	
<b>Aims</b>	The course gives the student the skills to understand the behaviour of superconductors. The student is acquainted with different properties of superconductors.	
<b>Contents</b>	A basic knowledge of the physical behaviour of superconductors, starting from the basis of material physics.	
<b>Teaching Methods</b>	Lectures 14 h, tutorials 14 h, 1st period. Lectures 28 h, tutorials 14 h, 2nd period. Written examination.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	A.C. Rose-Innes and E.H. Rhoderick: Introduction to Superconductivity, second edition (Pergamon).	
<b>Prerequisites</b>	A knowledge of the fundamentals of material physics, a knowledge of the electric and physical properties of materials.	

---

## 7 Master's Degree Programme in Chemical and Process Engineering

The Master's degree programme, titled as "Innovative Process and Product Engineering", takes two years, corresponds to 120 ECTS credits and leads to the degree of Master of Science in Technology. Three semesters include lectures and exercises, as well as laboratory and project work. The fourth semester is devoted to the Master's thesis. The language of tuition in the programme is English.

### Objectives of the Master's Degree Programme

The general objective of the programme is to give students sufficient scientific and technological knowledge for the career of chemical and process engineers in different fields of process industry. Moreover, the students will attain the basis for postgraduate studies and for continuous education in the field.

A specific goal is to promote and develop students' abilities to create innovations and new technology. This is realized by offering interdisciplinary education and special courses focusing on the development of innovation-related skills. The programme also emphasizes internationality and communication skills needed in the modern working environment.

### Careers for Graduates

The programme gives students capabilities to work in different kind of assignments in process industry, most typically in R&D, design and operation of plants. Most graduates will find their placement in either chemical, pulp and paper or metallurgical industry. However, nowadays the skills of chemical engineers have more and more demand also outside the traditional process industry.

### Major and Minor Subjects

#### **Major Subject: Sustainable Process Engineering**

*Teacher responsible: Professor Ilkka Turunen*

The major subject includes thorough courses on product, process and plant design. The goals of modern engineering work, such as sustainability, innovativeness and interdisciplinary methodology, are emphasized in addition to more traditional, but still important economical and technological objectives. Deep phenomenological description of the most important unit processes is included. Moreover, courses on specific unit operations can be chosen from a wide list.

#### **Minor Subject: Advanced Design Methodology**

*Teacher responsible: Professor Andrzej Kraslawski*

The minor topic gives students skills and knowledge for process design and R&D. The development of new technology and innovations is emphasized in the programme. Therefore courses such as creative design, process intensification and process modelling are included. In addition, courses on important computational tools, e.g. process simulation and computational fluid dynamics, belong to the subject.

### The Degree Structure

A General studies	9	ECTS cr
B Major subject	70	ECTS cr
C Minor subject	20	ECTS cr
D Elective studies	21	ECTS cr
<i>Credits</i>	<i>120 (min.)</i>	<i>ECTS cr</i>

**General Studies (obligatory)**

General studies mainly consist of communication and language courses, emphasizing one of the goals of the programme: to train students to act in modern, international working environment of today.

<i>Communication Skills (9 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BJ10A0500	Cross-Cultural Communication for Working Life	M.Sc. (Tech.) 1	3	2
BK10A0300	Introduction to M.Sc. Studies	M.Sc. (Tech.) 1	1	1
FV10A 6EC <sup>†</sup>	Language and Communication Studies			6

<sup>†</sup> The course FV13A1200 Teknisk svenska is obligatory for Finnish students who have not attained proficiency in Swedish in their previous degree.

**Major Subject (70 ECTS cr)****Sustainable Process Engineering**

<i>Obligatory Studies (62 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BJ20A0500	Chemical Engineering Unit Operations II	M.Sc. (Tech.) 1	1	4
BJ20A0600	Chemical Engineering Unit Operations III	M.Sc. (Tech.) 1	2	4
BJ30A0500	Project on Process and Plant Design	M.Sc. (Tech.) 2	1-2	11
BJ40A0100	Product Design	M.Sc. (Tech.) 1	4	5
BJ90A0700	Chemical Separation Methods	M.Sc. (Tech.) 1	3-4	8
Thesis	Master's Thesis			30

Min. 8 ECTS credits should be selected to attain 70 ECTS credits.

<i>List of Selectable Courses</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BJ10A0400	Process Control Systems in Pulp and Paper Industry	M.Sc. (Tech.) 2	1-2	3
BJ20A0800 <sup>†</sup>	Treatment Processes of Industrial Discharges	B.Sc. (Tech.) 3	3-4	5
BJ20A1000	Advanced Course in Environmental Technology	M.Sc. (Tech.) 1	3-4	6
BJ20A1100	Filtration and Mixing	M.Sc. (Tech.) 1	3-4	6
BJ60F0100	Chemical Pulping Technology: Chemical Recovery	M.Sc. (Tech.) 1	1-2	4
BJ60F0200	Chemical Pulping Technology: Fiberline Operations	M.Sc. (Tech.) 1	3-4	6
BJ60F0300	Fiber Technology; Personal Assignment		1-4	6
BJ80A0300	Transport Phenomena	M.Sc. (Tech.) 1	2	3

<sup>†</sup> The course will be studied in the 4th year (M.Sc. (Tech.) 1).

**Minor Subject (20 ECTS cr)****Advanced Design Methodology**

<i>Min. 20 ECTS credits should be selected</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BJ10A0300	Dynamics and Control of Chemical Processes	M.Sc. (Tech.) 2	1-2	4
BJ30A0700	Computational Fluid Dynamics in Chemical Engineering	M.Sc. (Tech.) 2	2	6
BJ30A1200	Process Intensification	M.Sc. (Tech.) 1	2	2
BJ30A1300	Process Simulation	M.Sc. (Tech.) 1	3-4	6
BJ40A0000	Creative Design	M.Sc. (Tech.) 1	1	3
BM20A3900	Modelling Methodology in Process Engineering	M.Sc. (Tech.) 1	1-2	6

---

### **Elective Studies**

Elective studies are needed to attain the full 120 ECTS credits. All the courses included in the IPPE-programme support the objectives of the programme. Consequently, it is recommended that students would choose their elective studies among the courses that are listed under selectable courses in the major subject. However, elective studies can include any courses offered by Lappeenranta University of Technology.

### **Additional Information**

#### **Master's Thesis**

The Master's thesis is a demanding research or design project carried out in the field of the student's major subject.

#### **Language Studies**

Please note that there are restrictions concerning courses that can be included in the obligatory language studies.

Further information: Study Coordinator Piia Vahvanen (room 2355, piia.vahvanen@lut.fi).

#### **Complementary Studies (21–60 ECTS cr)**

Students with a Finnish polytechnic degree (or equivalent) will have to study complementary studies. The extent of these studies depends on the content of the previous degree.

Further information: senior assistant Harri Niemi (room 2120, harri.niemi@lut.fi).

#### **Contact Information**

Programme Coordinator:

Professor, Ph.D. Andrzej Kraslawski (room 2362, andrzej.kraslawski@lut.fi)

Study Coordinator:

Piia Vahvanen (room 2355, piia.vahvanen@lut.fi)

Programme web pages: [www.lut.fi/ippe](http://www.lut.fi/ippe)

## The Courses Offered in English

		<i>ECTS cr</i>
BJ10A0000	Laboratory Work Course in Chemical Technology	10 - 20
BJ10A0300	Dynamics and Control of Chemical Processes	4
BJ10A0400	Process Control Systems in Pulp and Paper Industry	3
BJ10A0500	Cross-Cultural Communication for Working Life	2
BJ20A0500	Chemical Engineering Unit Operations II	4
BJ20A0600	Chemical Engineering Unit Operations III	4
BJ20A0800	Treatment Processes of Industrial Discharges	5
BJ20A1000	Advanced Course in Environmental Technology	6
BJ20A1100	Filtration and Mixing	6
BJ30A0500	Project on Process and Plant Design	11
BJ30A0700	Computational Fluid Dynamics in Chemical Engineering	6
BJ30A1200	Process Intensification	2
BJ30A1300	Process Simulation	6
BJ30A1400	Process and Product Innovations	12
BJ40A0000	Creative Design	3
BJ40A0100	Product Design	5
BJ50A0400	Advanced Course in Membrane Technology and Technical Polymer Chemistry	10
BJ50A0500	Synthetic Polymers: Glues and Resins	5
BJ50A0600	Protein Chemistry and Microbiology	4
BJ60F0100	Chemical Pulping Technology: Chemical Recovery	4
BJ60F0200	Chemical Pulping Technology: Fiberline Operations	6
BJ60F0300	Fiber Technology; Personal Assignment	6
BJ80A0300	Transport Phenomena	3
BJ80A0800	Properties of Gases and Liquids	5
BJ90A0400	Catalysis	4
BJ90A0600	Industrial Biotechnology	2
BJ90A0700	Chemical Separation Methods	4 - 8
BJ90A0800	Nutritional and Food Biotechnology	3

## Course Descriptions

<b><i>BJ10A0000</i></b>	<b><i>LABORATORY WORK COURSE IN CHEMICAL TECHNOLOGY</i></b>	<b><i>10 - 20 ECTS cr</i></b>
	<b>Laboratory Work Course in Chemical Technology</b>	
	<b>The course is mainly intended for foreign visiting students. The students register for the course by contacting the supervisor.</b>	
<b>Lecturer(s)</b>	N. N.	
<b>Aims</b>	Lecturer(s) responsible: Head of the Laboratory To give the student a deeper understanding on chemical technology in a specialized area.	
<b>Contents</b>	A specific project which is done in one of the laboratories of the department. The project is planned together with the supervisor(s) and consists mainly of laboratory work, literature work and report writing. The course may contain lectures and seminars. The project may also be planned together with industry and then carried out at some industrial location.	
<b>Teaching Methods</b>	The amount of work hours in the project will determine the amount of credits, e.g. three months of work would give 15 ECTS cr. Credits will be granted when the final report is delivered. Extra credits can be received if specific examinations are made.	
<b>Assessment</b>	Pass/Fail.	
<b>Course Material</b>	Literature related to the project.	

<b>BJ10A0300</b>	<b>DYNAMICS AND CONTROL OF CHEMICAL PROCESSES</b>	<b>4 ECTS cr</b>
	<b>Dynamics and Control of Chemical Processes</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Docent, D.Sc. (Tech.) Leif Hammarström Assistant, N. N. Professor, Ph.D. Andrzej Kraslawski (contact person)	
<b>Contents</b>	Motivation for process control. Repetition of properties of simple dynamic elements and controllers. Properties of typical process units. Behaviour of processes: simple elements and multi-input multi-output units with interaction. Analysis of process behaviour: experiments, modelling, simulation, stability assessment, and evaluation of control variable and disturbance effects. Process control requirements in different process or unit types with consideration of control possibilities and constraints. Control strategies: specifying controller configurations with respect to production needs such as stability, functionality, operability, safety, and quality. Review of advanced control concepts including multivariable control, prediction, estimation, and optimization.	
<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, 1st period. Lectures 14 h, exercises 14 h, 2nd period. Project work.	
<b>Assessment</b>	0-5, written examination 100 %.	
<b>Course Material</b>	To be specified later. Matlab-Simulink simulation environment, Process Control, System Identification and Fuzzy Control toolboxes, Mathworks 1984 - 2004.	
<b>BJ10A0400</b>	<b>PROCESS CONTROL SYSTEMS IN PULP AND PAPER INDUSTRY</b>	<b>3 ECTS cr</b>
	<b>Process Control Systems in Pulp and Paper Industry</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Lic.Sc. (Tech.) Merja Mäkelä Professor, Ph.D. Andrzej Kraslawski (contact person)	
<b>Contents</b>	Processes and instrumentation. Need of measurements, open loop and closed loop control. Distributed control systems, programmable logic controllers and open control networks. Communication from process sensors, transmitters and actuators to control rooms. Process plant visualization and control room operation. System configuration, engineering and documentation. Single-input, single-output and multiple-input, multiple-output control strategies. Use of PID, fuzzy logic, model predictive and optimization control principles. Paper and board quality online measurement and control. Automation in original and renewal plant investment projects. Maintenance and innovative development in automation.	
<b>Teaching Methods</b>	Lectures 16 h, 1st period. Lectures 12 h, 2nd period. Individual or team project work with supervision 12 h, 2nd period.	
<b>Assessment</b>	0-5, written examination 60 %, project work 40 %.	
<b>Course Material</b>	Learning Environment for Papermaking and Automation, KnowPap, Licentia 2004, Espoo Finland. Learning Environment for Chemical Pulping and Automation, KnowPulp, Licentia 2004, Espoo Finland. Matlab-Simulink simulation environment, Process Control, System Identification and Fuzzy Control toolboxes, Mathworks 1984 - 2004. Leiviskä, K., Process control, Book 14, in Papermaking Science and Technology, Fapet, 1999, 297 p., ISBN 952-5216-00-4. Sell, Nancy J., Process Control Fundamentals for the Pulp and Paper Industry, Tappi, 1995, Atlanta, USA, 612 p., ISBN 0-89852-294-3.	

<b>BJ10A0500</b>	<b>CROSS-CULTURAL COMMUNICATION FOR WORKING LIFE</b> 2 ECTS cr
	<b>Cross-Cultural Communication for Working Life</b>
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3
<b>Lecturer(s)</b>	M.Sc. (Tech.) Mark Middleton Professor, Ph.D. Andrzej Kraslawski (contact person)
<b>Aims</b>	To provide students knowledge about problems arising in industrial working environments due to ineffective communication.
<b>Contents</b>	Information exchange and understanding the viewpoints of parties involved. Effective communication, how to understand attitudes, values and danger areas. Cultural aspects and linguistic tools for goal-oriented communication. Project management, negotiations, presentations and resolution of dispute situations.
<b>Teaching Methods</b>	Intensive course. Lectures 16 h, exercises 16 h, 3rd period. No examination.
<b>Assessment</b>	The number of participants is limited. Priority is given to the students of the Master's Degree Programme in Chemical and Process Engineering (IPPE). Pass/Fail. Active participation in lectures and exercises.
<b>BJ20A0500</b>	<b>CHEMICAL ENGINEERING UNIT OPERATIONS II</b> 4 ECTS cr
	<b>Chemical Engineering Unit Operations II</b>
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Juha Kallas Senior Assistant, D.Sc. (Tech.) Harri Niemi
<b>Aims</b>	To familiarize students with separation techniques and the theory of mass transfer more extensively than in the courses BJ20A0400 Kemianteekniikan yksikköoperaatiot I A and BJ20A0450 Kemianteekniikan yksikköoperaatiot I B.
<b>Contents</b>	The topics are as follows: 1. Membrane separation: Mass transfer, modelling, process design, simulation of industrial membrane processes. 2. Adsorption: theory, equipment, applications in industry and purification of polluted water and air.
<b>Teaching Methods</b>	Lectures 12 h, exercises 28 h, 1st period.
<b>Assessment</b>	0-5, written examination 100 %.
<b>Course Material</b>	Lecture notes.
<b>Prerequisites</b>	BJ20A0400 Kemianteekniikan yksikköoperaatiot I A and BJ80A0100 Johdanto kemialliseen termodynamiikkaan passed.
<b>BJ20A0600</b>	<b>CHEMICAL ENGINEERING UNIT OPERATIONS III</b> 4 ECTS cr
	<b>Chemical Engineering Unit Operations III</b>
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Juha Kallas Docent, D.Sc. (Tech.) Marjatta Louhi-Kultanen
<b>Aims</b>	To familiarize students with separation techniques and the theory of mass transfer more extensively than in the courses BJ20A0400 Kemianteekniikan yksikköoperaatiot I A and BJ20A0450 Kemianteekniikan yksikköoperaatiot I B.
<b>Contents</b>	The topics are as follows: 1. Industrial crystallization: theory, operation and design of crystallizers, and the basics of precipitation. 2. Multicomponent mass transfer: differences between mass transfer in binary and multicomponent systems, basic theory and examples in evaporation,

<b>Teaching Methods Assessment Course Material</b>	distillation, desorption, membrane separation, heterogeneous reaction etc. Lectures 12 h, exercises 28 h, 2nd period. Laboratory work and reports. 0-5, written examination 100 %, reports passed. Davey, R.J., Garside, J., From molecules to crystallizers, Oxford: Oxford University Press, 2000. Lecture notes.	
<b>Prerequisites</b>	BJ20A0400 Kemianteekniikan yksikköoperaatiot I A and BJ80A0100 Johdanto kemialliseen termodynamiikkaan passed.	
<b>BJ20A0800</b>	<b>TREATMENT PROCESSES OF INDUSTRIAL DISCHARGES</b>	<b>5 ECTS cr</b>
	<b>Treatment Processes of Industrial Discharges</b>	
<b>Year and Period Lecturer(s)</b>	B.Sc. (Tech.) 3, Period 3-4 Professor, D.Sc. (Tech.) Juha Kallas Docent, Ph.D. Sergei Preis	
<b>Aims</b>	To familiarize students with engineering solutions of environmental problems concerning water and wastewater treatment, air emissions control and solid waste processing and disposal.	
<b>Contents</b>	The course includes three main parts: basics in water and wastewater treatment, treatment of air polluted with particulate and gaseous matter, and solid waste handling and disposal. Water and wastewater treatment part considers basic methods in water treatment: sedimentation, coagulation/flocculation, filtration, biological treatment, sludge disposal and disinfection. Air treatment part concentrates on dust removal and gaseous pollutant abatement. Solid waste treatment concentrates on the processing techniques: volume reduction, materials recovery, incineration and energy recovery.	
<b>Teaching Methods Assessment Course Material</b>	Lectures and exercises 21 h, 3rd period. Lectures and exercises 21 h, 4th period. 0-5, written examination 100 %. Peavy, H.S., Rowe, D.R., Tchobanoglous, G., Environmental Engineering, McGraw-Hill, 1st ed., 1985.	
<b>Prerequisites</b>	Recommended BJ20A0000 Nesteiden, kaasujen ja kiintoaineiden käsittely, BJ20A0100 Mekaaniset erotusmenetelmät and BJ20A0400 Kemianteekniikan yksikköoperaatiot I A part 2 attended.	
<b>BJ20A1000</b>	<b>ADVANCED COURSE IN ENVIRONMENTAL TECHNOLOGY</b>	<b>6 ECTS cr</b>
	<b>Advanced Course in Environmental Technology</b>	
<b>Year and Period Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 3-4 Professor, D.Sc. (Tech.) Juha Kallas Professor (Tallin University of Technology), D.Sc. (Tech.) Rein Munter	
<b>Contents</b>	"Green chemistry" in technology and in treatment of industrial and municipal wastes. Reducing of water demand: closing of water cycles in industry.	
<b>Teaching Methods</b>	Lectures 6 h, exercises 8 h, 3rd period. Lectures 6 h, exercises and seminars 16 h, 4th period. Literature work, report and seminar presentation.	
<b>Assessment Course Material</b>	0-5, written examination 50 %, report and seminar 50 %. Lecture notes.	
<b>BJ20A1100</b>	<b>FILTRATION AND MIXING</b>	<b>6 ECTS cr</b>
	<b>Filtration and Mixing</b>	
<b>Year and Period Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 3-4 Lecturer, D.Sc. (Tech.) Ritva Tuunila	

<b>Aims</b>	Docent, D.Sc. (Tech.) Tuomas Koiranen Docent, D.Sc. (Tech.) Marjatta Louhi-Kultanen To familiarize students with solid-liquid separation techniques and mixing processes.
<b>Contents</b>	The topics are as follows: Filtration: fundamentals of filtration, filtration methods, operation of filters, cake formation and washing, deliquoring, design and modeling of filters. Mixing: fundamentals of mixing, rheology, mixing equipment, design of mixers and scale-up.
<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, 3rd period. Lectures 14 h, exercises 14 h, 4th period. Laboratory work and reports.
<b>Assessment</b>	0-5, written examination 100 %, reports passed.
<b>Course Material</b>	Additional material will be informed at lectures.
<b>Prerequisites</b>	BJ20A0100 Mekaaniset erotusmenetelmät passed.

<b>BJ30A0500</b>	<b>PROJECT ON PROCESS AND PLANT DESIGN 11 ECTS cr</b>
	<b>Project on Process and Plant Design</b>
	<b>HUOM! Suomenkielisille työryhmille opintojakso opetetaan suomeksi.</b>
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Ilkka Turunen
<b>Aims</b>	The purpose is to make students familiar with process and plant design with the help of an extensive project work.
<b>Contents</b>	The projects are carried out in groups of five students. The topics are from industry. A typical topic is a feasibility study of a process covering a brief market survey, comparison of process alternatives, preliminary process design (process flowsheet, mass and energy balances, sizing of main equipment), layout, cost and profitability estimation. Different aspects are emphasized in different projects, depending on the topic. Suitable also for post-graduate studies.
<b>Teaching Methods</b>	Lectures 5 h, project meetings, 1st period. Lectures 5 h, project meetings, 2nd period. Design and project work about 280 h, 1st - 2nd period. No examination.
<b>Assessment</b>	0-5, design reports 100 %.
<b>Prerequisites</b>	BJ20A0000 Nesteiden, kaasujen ja kiintoaineiden käsittely BJ30A0100 Ideasta tuotantoon: 1. Tuotekehitys BJ30A0200 Ideasta tuotantoon: 2. Prosessitutkimus ja -kehitys BJ30A0300 Ideasta tuotantoon: 3. Prosessi- ja tehdassuunnittelu

<b>BJ30A0700</b>	<b>COMPUTATIONAL FLUID DYNAMICS IN CHEMICAL ENGINEERING 6 ECTS cr</b>
	<b>Computational Fluid Dynamics in Chemical Engineering</b>
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 2
<b>Lecturer(s)</b>	Docent, D.Sc. (Tech.) Zuoliang Sha Assistant, N. N. Lecturer(s) responsible: Professor, D.Sc. (Tech.) Ilkka Turunen
<b>Aims</b>	To teach students to use CFD to solve chemical engineering problems, e.g. in equipment design and trouble shooting.
<b>Contents</b>	Theoretical basis of CFD. Introduction of CFX software. Applications of CFD in process industry. Solving chemical engineering problems with CFD.
<b>Teaching Methods</b>	Lectures 28 h, 2nd period. Exercises with CFD software 120 h, 2nd period. Seminar presentation. No examination.

<b>Assessment</b>	0-5, seminar presentation 70 %, exercise report 30 %. At least 90 % presence at lectures required.
<b>Course Material</b>	To be announced later.

<b>BJ30A1200</b>	<b>PROCESS INTENSIFICATION</b>	<b>2 ECTS cr</b>
	<b>Process Intensification</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Ilkka Turunen	
<b>Aims</b>	To make students familiar with the methods and latest achievements of process intensification.	
<b>Contents</b>	Definitions of process intensification. Intensification of chemical reactors. Intensification of separation processes. Microprocess technology. Methodology of process intensification.	
<b>Teaching Methods</b>	Lectures 21 h, exercises arranged as brainstorming sessions 9 h, 2nd period.	
<b>Assessment</b>	0-5, written examination 100 %.	

<b>BJ30A1300</b>	<b>PROCESS SIMULATION</b>	<b>6 ECTS cr</b>
	<b>Process Simulation</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	N. N.	
<b>Aims</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Ilkka Turunen To make students familiar with process simulation as a tool in development, design and operation in chemical and pulp and paper industry.	
<b>Contents</b>	Basics of process simulation. Steady-state and dynamic simulation. Introduction to ASPEN and BALAS-software. Examples of industrial simulation cases for process design. Suitable also for post-graduate studies.	
<b>Teaching Methods</b>	Intensive course. Lectures 28 h, 3rd and/or 4th period.	
<b>Assessment</b>	Simulation exercises as guided individual assignments. 0-5, written examination 100 %.	
<b>Prerequisites</b>	BJ20A0300 Prosessisimuloinnin perusteet.	

<b>BJ30A1400</b>	<b>PROCESS AND PRODUCT INNOVATIONS</b>	<b>12 ECTS cr</b>
	<b>Process and Product Innovations</b>	
	<b>Mainly for Finnish and international students from the departments of Chemical Technology, Mechanical Engineering, Electrical Engineering and Industrial Engineering and Management. The number of participants is limited and students will be selected on a basis of applications.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 3-4, 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Tuomo Kässi Professor, D.Sc. (Tech.) Olli Pyrhönen Researcher/Teacher, D.Sc. (Tech.) Ville Ojanen Researcher/Teacher, D.Sc. (Tech.) Kimmo Kerkkänen Researcher/Teacher, D.Sc. (Tech.) Riku Pöllänen	
<b>Aims</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Ilkka Turunen To get acquainted with the generation of innovations and new technology, the typical methods, problems and their solutions. To train project and teamwork in interdisciplinary, international environment. To get acquainted with product and process development. To train and deepen many skills learned in other connections.	
<b>Contents</b>	Methods of product and process development. Interdisciplinary R & D activities as project and teamwork. Development of new technology, patenting. Suitable also for post-graduate studies.	

<b>Teaching Methods</b>	Informational lectures, 6 h/period. Project meetings, 6 h/period. Independent project and teamwork in groups of 4-8 students approximately 300 h/student.
<b>Assessment</b>	0-5, project work 100 %.

<b>BJ40A0000</b>	<b>CREATIVE DESIGN</b>	<b>3 ECTS cr</b>
<b>Year and Period</b>	<b>Creative Design</b>	
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 1 Professor, Ph.D. Andrzej Kraslawski	
<b>Contents</b>	Types of innovation. Product, process, service innovation. Innovations in process engineering. Models of creativity. Enhancement of creativity (brainstorming, synectics, morphological analysis, case-based reasoning, quality function deployment, TRIZ).	
<b>Teaching Methods</b>	Lectures and exercises 56 h, 1st period.	
<b>Assessment</b>	0-5, written examination 50 %, exercises and presence at the lectures 50 %.	
<b>Course Material</b>	Lecture notes.	

<b>BJ40A0100</b>	<b>PRODUCT DESIGN</b>	<b>5 ECTS cr</b>
<b>Year and Period</b>	<b>Product Design</b>	
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 4 Professor, Ph.D. Andrzej Kraslawski	
<b>Contents</b>	Types of products. Identification of consumer needs. Product functional and physical-chemical properties. High-throughput experiments. Knowledge-based systems for product design. Computer-aided product design.	
<b>Teaching Methods</b>	Lectures 15 h, exercises 20 h, 4th period.	
<b>Assessment</b>	0-5, written examination 50 %, exercises and presence at the lectures 50 %.	
<b>Course Material</b>	Lecture notes.	

<b>BJ50A0400</b>	<b>ADVANCED COURSE IN MEMBRANE TECHNOLOGY AND TECHNICAL POLYMER CHEMISTRY</b>	<b>10 ECTS cr</b>
<b>Year and Period</b>	<b>Membranitekniiikan ja teknillisen polymeerikemian syventävä opintojakso</b>	
<b>Lecturer(s)</b>	<b>The course will be given in English if required.</b>	
<b>Aims</b>	M.Sc. (Tech.) 2, Period 1-2 Professor, Ph.D. Marianne Nyström Advanced studies in membrane technology, technical polymer chemistry and pulp and paper technology.	
<b>Contents</b>	Refining of polymeric materials, polymerisation and characterisation of polymers using different methods. Membrane processes.	
<b>Teaching Methods</b>	Lectures and seminars 21 h, 1st period. Lectures and seminars 21 h, 2nd period. Personal research project 165 h, 1st-2nd period. Lectures, laboratory work, seminar lectures and possibly a test. Obligatory seminars.	
<b>Assessment</b>	0-5, personal laboratory research work 40%, seminars 60%.	

<b>BJ50A0500</b>	<b>SYNTHETIC POLYMERS: GLUES AND RESINS 5 ECTS cr</b>
	<b>Synteettiset polymeerit: Liimat ja hartsit</b>
<b>Year and Period</b>	<b>The course will be given in English if required. The course will be arranged together with the Department of Mechanical Engineering. The course will be lectured next time during the academic year 2008 - 2009.</b>
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1-2, Period 1-2 Professor, Ph.D. Marianne Nyström Professor, D.Sc. (Tech.) Ilkka Pöyhönen N.N.
<b>Aims</b>	Guest lecturers Advanced studies in synthetic polymer chemistry, characterisation of polymer materials and their behaviour in industrial applications.
<b>Contents</b>	Production of resins and glues and their use in industry, especially in the pulp and paper industry. Production of synthetic polymers. Homopolymers, copolymers and cross-linking. Chemical reactions of polymers and analysis methods. Industrial uses of polymers. Resins and glues. Suitable also for postgraduate studies.
<b>Teaching Methods</b>	Intensive course. Lectures 35 h and a seminar report, 1st and/or 2nd period.
<b>Assessment</b>	Obligatory seminar and laboratory work, industrial visit. 0-5, written examination 100%.
<b>BJ50A0600</b>	<b>PROTEIN CHEMISTRY AND MICROBIOLOGY 4 ECTS cr</b>
	<b>Proteiinien kemia ja mikrobiologia</b>
<b>Year and Period</b>	<b>The course will be lectured for the last time during the academic year 2007-2008. The course will be given in English, if required.</b>
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 3-4 Professor, Ph.D. Marianne Nyström D.Sc. (Tech.) Svetlana Butylina Docent, Ph.D. Sinikka Parkkinen Part-time Untenured Teacher, N. N.
<b>Aims</b>	Guest lecturers Advanced knowledge on protein and polyelectrolyte chemistry. The course also gives information on the utilisation of proteins, and presents the fundamentals on microbiology, especially on food technology.
<b>Contents</b>	Structure and chemical reactions of proteins. Separation and fractionation of proteins using membrane filtration and chromatographical methods. Important proteins in food technology. Classification of microbes, their chemistry, analysis and cultivation methods. Suitable also for postgraduate studies.
<b>Teaching Methods</b>	Lectures 28 h, laboratory work 40 h, 3rd and/or 4th period.
<b>Assessment</b>	Obligatory lectures (80%) and laboratory work. 0-5, written examination 100%.
<b>BJ60F0100</b>	<b>CHEMICAL PULPING TECHNOLOGY: 4 ECTS cr</b> <b>CHEMICAL RECOVERY</b>
<b>Year and Period</b>	<b>Chemical Pulping Technology: Chemical Recovery</b>
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 1-2 Professor, M.Sc. (Tech.) Kaj Henricson Assistant, M.Sc. (Tech.) Katriina Kolhonen
<b>Aims</b>	To familiarize the students with the process and equipment technology used in the recovery of cooking chemicals and the manufacturing of bleaching chemicals. To develop understanding of mill emissions, energy and mass balances.
<b>Contents</b>	Chemical recovery and mill systems. Evaporation and combustion of black

<b>Teaching Methods</b>	liquor. Handling of green liquor and non-process elements. White liquor preparation. Manufacturing of bleaching chemicals. Alternative cooking methods. Dimensioning of mill equipment. Mill emissions related to the manufacture of chemical pulp. Lectures, exercises and seminars 14 h, 1st period. Lectures, exercises and seminars 14 h, 2nd period. Blackboard-support.
<b>Assessment Course Material</b>	Lectures, personal assignment and seminars. 0-5, written examination 75 %, personal assignment 25 %. Gullichsen, J., Paulapuro, H. (eds), Papermaking Science and Technology, Fapet Oy, vol. 1 (1998), vol. 3 (1999), vol. 6A (2000), vol. 6B (2000) specified sections. Adams, Terry N. et. al., Kraft Recovery Boilers, Tappi Press (1997) specified sections. Vakkilainen, Esa K.: Kraft recovery boilers: principles and practice, Suomen Soodakattilayhdistys, 2005 (specified sections). Blackboard course material, handouts and other specified reading.
<b>Prerequisites</b>	BJ60F0000 Selluloosatekniikan perusteet attended or corresponding knowledge of forest industry.

<b>BJ60F0200</b>	<b>CHEMICAL PULPING TECHNOLOGY: FIBERLINE OPERATIONS</b>	<b>6 ECTS cr</b>
<b>Year and Period Lecturer(s)</b>	<b>Chemical Pulping Technology: Fiberline Operations</b> M.Sc. (Tech.) 1, Period 3-4 Professor, M.Sc. (Tech.) Kaj Henricson Lecturer, N. N.	
<b>Aims</b>	To familiarize the students with the process and equipment technology used in the manufacture of chemical pulp with special focus on cooking systems, bleaching, washing, screening and mill emissions related to fiberline operations.	
<b>Contents</b>	Cooking, oxygen delignification, screening, and bleaching. Machinery used in the fiberline with special focus on the sulfate process. Handling of high consistency fiber suspensions. Comparing and choosing bleaching sequences. Bleaching chemicals and the manufacture of bleached chemical pulp. Mill emissions related to the manufacture of chemical pulp.	
<b>Teaching Methods</b>	Lectures, exercises and seminars 21 h, 3rd period. Lectures, exercises and seminars 21 h, 4th period. Blackboard-support.	
<b>Assessment Course Material</b>	Lectures, personal assignments and seminars. 0-5, written examination 65 %, personal assignments 35 %. Gullichsen, J., Paulapuro, H. (eds), Papermaking Science and Technology, Fapet Oy, vol. 1 (1998), vol. 3 (1999), vol. 6A (2000), vol. 6B (2000) specified sections. Dence, C., Reeve, D. (eds), Pulp Bleaching - Principles and Practice, Tappi Press (1996) specified sections. Blackboard course material, handouts and other specified reading.	
<b>Prerequisites</b>	BJ60F0000 Selluloosatekniikan perusteet attended or corresponding knowledge of forest industry.	
<b>BJ60F0300</b>	<b>FIBER TECHNOLOGY; PERSONAL ASSIGNMENT</b>	<b>6 ECTS cr</b>
<b>Year and Period Lecturer(s)</b>	<b>Fiber Technology; Personal Assignment</b>  <b>The course is mainly intended for foreign visiting students and students having chemical pulping technology as their major. The students register for the course by contacting the instructor.</b>  Period 1-4 Professor, M.Sc. (Tech.) Kaj Henricson	

<b>Aims</b>	Lecturer, N. N. To give the student a deeper understanding of a specialized area of fiber technology and give the student training in working independently on a specified subject.
<b>Contents</b>	The personal assignment is planned together with the instructor(s) and consists mainly of a personal assignment, literature work and report writing and/or an examination. The course may contain lectures and seminars. The assignment may also be planned together with industry and then carried out at some industrial location.
<b>Teaching Methods</b>	As agreed with the instructor. The number of students accepted for the course will be limited.
<b>Assessment</b>	0-5. Depending on the assignment the grade will be given based on an examination and/or the assignment.
<b>Course Material</b>	Literature related to the project.

<b>BJ80A0300</b>	<b>TRANSPORT PHENOMENA</b>	<b>3 ECTS cr</b>
	<b>Transport Phenomena</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Matti Lindström	
<b>Aims</b>	Student understands the theoretical basis of transport phenomena in gas and liquid phase and is able to apply calculation methods in solving problems concerning transport.	
<b>Contents</b>	Diffusion, migration and convection of molecules and ions in gas and liquid phase. Calculation of transport controlled by diffusion or migration in catalysis and electrochemistry. Kinetic theory and transport properties of gases.	
<b>Teaching Methods</b>	Lectures and seminars 21 h, exercises 14 h, 2nd period.	
<b>Assessment</b>	Active participation in lectures and exercises.	
<b>Course Material</b>	0-5, written examination 100 %.	
<b>Prerequisites</b>	Lindström, M., Transport Phenomena, Lecture Notes, LUT, 2005. Atkins, P. & de Paula, J., Atkins' Physical Chemistry (8th ed.), Oxford University Press, 2006, Chapter 21. BM30A0210 Fysiikka I, osa 1, BM30A0230 Fysiikka I, osa 3, BM30A0320 Fysiikan laboratoriotyöt (KETE, KOTE) and BJ70A0000 Epäorgaaninen kemia I (lectures attended).	

<b>BJ80A0800</b>	<b>PROPERTIES OF GASES AND LIQUIDS</b>	<b>5 ECTS cr</b>
	<b>Properties of Gases and Liquids</b>	
	<b>The course will be lectured 1st time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Matti Lindström	
<b>Aims</b>	To be able to estimate physico-chemical properties of pure gases and liquids and their mixtures.	
<b>Contents</b>	The estimation of physical properties, pure component constants, thermodynamic properties of gases, pressure-volume-temperature relationships of pure gases and liquids, pressure-volume-temperature relationships of mixtures, thermodynamic properties of pure components and mixtures.	
<b>Teaching Methods</b>	Lectures 21 h, exercises and seminars 14 h, 3rd and 4th period.	
<b>Assessment</b>	Active participation in lectures and exercises.	
<b>Course Material</b>	0-5, written examination 100 %.	
<b>Prerequisites</b>	Poling, B. E., Prausnitz, J. M. And O'Connell, J. P., The Properties of Gases and Liquids, 5th ed., McGraw-Hill, Boston, 2001, Chapters 1-6. BJ80A0100 Johdanto kemialliseen termodynamiikkaan and BJ80A0200 Kemiallisten tasapainotilojen termodynamiikka passed.	

<b>BJ90A0400</b>	<b>CATALYSIS</b>	<b>4 ECTS cr</b>
	<b>Catalysis</b>	
	<b>The course will be lectured next time during the academic year 2008 - 2009.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 1	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Erkki Paatero	
<b>Aims</b>	The course gives the theoretical basis for homogeneous and heterogeneous catalysts and how they work in chemical reactors.	
<b>Contents</b>	The focus during the course is on the structures, properties and applications of heterogeneous catalysts. Homogeneous and enzyme catalysts are briefly described. The mechanisms of catalytic reactions and the derivation of rate expressions. How to choose the catalyst and the reactor. Suitable also for post-graduate studies.	
<b>Teaching Methods</b>	Lectures and exercises 28 h, 1st period. Laboratory demonstration and homework.	
<b>Assessment</b>	0-5, written examination 100 %, homework passed.	
<b>Course Material</b>	Thomas, J.M. & Thomas, W.J., Principles and Practice of Heterogeneous Catalysis, John Wiley & Sons, Inc., 1997.	
<b>Prerequisites</b>	BJ90A0000 Kemianteollisuuden prosessit.	
<b>BJ90A0600</b>	<b>INDUSTRIAL BIOTECHNOLOGY</b>	<b>2 ECTS cr</b>
	<b>Industrial Biotechnology</b>	
	<b>The course will be lectured last time in spring 2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 3-4	
<b>Lecturer(s)</b>	D.Sc. (Tech.) Heikki Ojamo	
<b>Contents</b>	What is industrial biotechnology? Basics of biocatalysts and their industrial use. Fermentation and enzyme technology. Downstream processing. Specific features of mass and heat transfer in biotechnology. Asepticity. Enzyme applications. Biotechnology and sustainable growth.	
<b>Teaching Methods</b>	Lectures 14 h, in three intensive days. A written literature survey on a specific subject.	
<b>Assessment</b>	0-5, written examination 80 %, literature survey 20 %.	
<b>Course Material</b>	Aittomäki, E. et. al., BIOprosessitekniikka, WSOY 2002 (where applicable). Literature surveys.	
<b>Prerequisites</b>	BJ70A0300 Teknillisen biokemian perusteet.	
<b>BJ90A0700</b>	<b>CHEMICAL SEPARATION METHODS</b>	<b>4 - 8 ECTS cr</b>
	<b>Chemical Separation Methods</b>	
	<b>The lectures are included as a part in BJ90A0200 Teknillinen kemia.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Erkki Paatero Researcher/Teacher, D.Sc. (Tech.) Tuomo Sainio	
<b>Aims</b>	The course gives the theoretical basis for chemically assisted separation methods.	
<b>Contents</b>	The focus during the course is on the chemistry involved in the application of solvent extraction, ion-exchange, adsorption, chromatographic separation and flotation. Applications of these technologies are found widely in industry although mostly in hydrometallurgy, food industry and pharmaceutical industry.	
<b>Teaching Methods</b>	Lectures and seminars 28 h, 3rd period. Lectures and seminars 7 h, 4th period. Oral or written examination. The students of the Master's Degree Programme in Chemical and Process Engineering (IPPE): the course also includes a literature survey and laboratory	

<b>Assessment</b>	work approximately 40 h, the extent of the course will then be 8 ECTS cr. 4 ECTS cr: 0-5, examination 100 %.
<b>Prerequisites</b>	8 ECTS cr: 0-5, examination 70 %, seminar 30 %. BJ90A0000 Kemianteollisuuden prosessit.

<b>BJ90A0800</b>	<b><i>NUTRITIONAL AND FOOD BIOTECHNOLOGY 3 ECTS cr</i></b>
	<b>Nutritional and Food Biotechnology</b>
	<b>The course will be lectured last time in autumn 2007.</b>
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 2
<b>Lecturer(s)</b>	Professor, Ph.D. Atte von Wright
<b>Aims</b>	The aim is to give an introduction to food biotechnology, with a special emphasis on nutrition, hygiene and food safety.
<b>Contents</b>	The starter cultures and micro-organisms used in food industry, hygienic and safety aspects. Health, nutritional and safety concerns related to genetic modification, functional foods and novel foods.
<b>Teaching Methods</b>	Intensive course. Lectures 20 h, 2nd period.
<b>Assessment</b>	0-5, written examination 100 %.
<b>Prerequisites</b>	BJ70A0300 Teknillisen biokemian perusteet

## 8 Master's Degree Programme in Mechanical Engineering

The Master's degree programme in Mechanical Engineering corresponds to 120 ECTS credits and leads to the degree of Master of Science in Technology. The students have two years of full-time studies in which all lectures and laboratory work are conducted in English. The first three semesters include 90 ECTS credits of classroom and laboratory instruction. The Master's thesis of 30 ECTS credits is conducted in the fourth semester, after other courses have been completed.

### The Aims of the Master's Degree Programme

Particular emphasis is placed on future product design and production technologies. The programme aims to provide in-depth knowledge in design- or production related areas such as machine design, steel structures, welding technology, laser technology as well as production and sheet metal technology. It is aimed at students who wish to pursue a career in mechanical engineering industry using advanced engineering techniques.

### Careers for Graduates

The programme provides the foundation for both constructive design as well as production-oriented tasks. The professional tasks may include, for example, product development and design, management of design and production projects, technical sales. The professional scope often includes educational, research and marketing tasks as well as specialist responsibilities in technical inspection and project management. The programme also provides the students with knowledge and skills for scientific doctoral studies in the field of mechanical engineering.

### The Structure of the Programme

<b>Major Subject 71 ECTS cr</b>  - <b>Master's Thesis 30 ECTS cr</b> - <b>Structural and Machine Design 41 ECTS cr or</b> <b>Production Technologies 41 ECTS cr</b>	<b>Minor Subject 20-21 ECTS cr</b>
<b>General Studies 13-15 ECTS cr</b>	<b>Elective Studies 13-17 ECTS cr</b>

#### General Studies (13-15 ECTS credits):

General studies are common to all the students in the programme. The studies provide a brief introduction to the field of mechanical engineering as well as language skills essential for M.Sc. studies.

#### Major Subject (41 ECTS credits):

The Department of Mechanical Engineering offers major subjects in Structural and Machine Design and in Production Technologies. The choice of the major is made at the end of the 3<sup>rd</sup> period of the first year.

#### Structural and Machine Design

*The person responsible for major in Structural and Machine Design is professor, D.Sc. (Tech.) Gary Marquis.*

Students study both the theory and practice of developing mechanical engineering systems for performance, strength and durability. They learn to use state-of-the-art computer tools for creating and testing virtual prototypes so that complex mechatronic systems and structures can be designed,

tested and optimised before a prototype is fabricated. Major in Structural and Machine Design includes advanced studies of machine automation, steel structures and virtual design.

### Production Technologies

The person responsible for major in Production Technologies is professor, D.Sc. (Tech.) Jukka Martikainen.

Students learn about modern production systems and production planning that will be integral parts of tomorrow's factories. Special emphasis is given to welding technology, high technology machining operations and sheet metal and plate forming. Moreover, students have the opportunity to develop expertise in laser welding and cutting together with a variety of surface improvement techniques including laser cladding and surface hardening. Major in Production Technologies includes advanced studies of welding technology, production technology and laser technology.

### Master's Thesis (30 ECTS credits):

The Master's thesis is a research or design project carried out in the field of the student's major subject.

### Minor Subject (20-21 ECTS credits):

Students can choose any minor subject taught in English at LUT.

### Elective Studies (13-17 ECTS credits):

To attain the full 120 ECTS credits, the students may need to take some additional courses. Elective studies can include any courses offered by Lappeenranta University of Technology if the required prerequisites are completed. Elective studies may include a maximum of 6 ECTS credits of internship improving expertise.

### General Studies 13-15 ECTS credits

<i>General Studies</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BK10A0300	Introduction to M.Sc. Studies	M.Sc. (Tech.) 1	1	1
BK20A0100	Materials Science	M.Sc. (Tech.) 1	1-2	6
FV11A9000	Academic Seminar for International Programs		2-4	6
FV13A1200 <sup>†</sup>	Teknisk svenska	B.Sc. (Tech.) 1-3	1, 2, 3, 4	2
FV18A9100 <sup>**</sup>	Finnish for Foreigners 1		1, 3	2

<sup>†</sup>) For Finnish students who need to attain proficiency in Swedish

<sup>\*\*</sup>) Foreign students are required to study at least one course of Finnish language

**Major in Structural and Machine Design (71 ECTS credits)** Students should select Master's Thesis 30 ECTS credits and a minimum of 41 ECTS credits from the above courses:

<i>Major in Structural and Machine Design</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BK10A0100 <sup>†</sup>	Individual Project Work	M.Sc. (Tech.) 1	1-4	6
BK10A0200 <sup>†</sup>	Research Seminar	M.Sc. (Tech.) 2	4	2
BK60A0300	Servo Control Engineering	B.Sc. (Tech.) 3	3-4	6
BK70A0400	Introduction to Multibody Dynamics	B.Sc. (Tech.) 3	3	4
BK80A0500 <sup>**</sup>	Lujusoppi II	B.Sc. (Tech.) 3	1-2	7
BK80A1000	Design of Steel Structures	M.Sc. (Tech.) 1	3-4	6
BK80A1200 <sup>†</sup>	FE-analysis course	B.Sc. (Tech.) 3	3-4	5
BK80A1400	Fatigue Design	M.Sc. (Tech.) 1	1-2	6
BK80A1600	FE-analysis Seminar in Advanced Topics	B.Sc. (Tech.) 3	1-4	3
Thesis	Master's Thesis			30

<sup>†</sup>) A required course

<sup>\*\*</sup>) Will be lectured in English in 2008-2009

### Major in Production Technologies (71 ECTS credits)

<i>Major in Production Technologies</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BK10A0100	Individual Project Work	M.Sc. (Tech.) 1	1-4	6
BK10A0200	Research Seminar	M.Sc. (Tech.) 2	4	2
BK20A0400	Modern Welding Technology	M.Sc. (Tech.) 2	1-2	7

BK20A1100	Virtual Welding	M.Sc. (Tech.)	1	3-4	3
BK30A0100	Laser Processes	M.Sc. (Tech.)	1	1-2	6
BK30A0200	Product Design for Laser Processing	M.Sc. (Tech.)	1	3-4	4
BK50A0700	Advanced Production Engineering	M.Sc. (Tech.)	1	1-2	7
BK90A1000	Wood Processing Machinery	B.Sc. (Tech.)	3	3	6
Thesis	Master's Thesis				30

### Minor in Structural and Machine Design (21 ECTS cr)

<i>Minor in Structural and Machine Design (21 ECTS cr)</i>		<i>per.</i>	<i>ECTS cr</i>
BK70A0400	Introduction to Multibody Dynamics	3	4
BK80A1000	Design of Steel Structures	3-4	6
BK80A1200	FE-analysis course	3-4	5
BK80A1400	Fatigue Design	1-2	6

### Minor in Production Technologies (20 ECTS cr)

<i>Minor in Production Technologies (20 ECTS cr)</i>		<i>per.</i>	<i>ECTS cr</i>
BK20A0400	Modern Welding Technology	1-2	7
BK20A1100	Virtual Welding	3-4	3
BK30A0100	Laser Processes	1-2	6
BK30A0200	Product Design for Laser Processing	3-4	4

## Additional Information

### Personal Study Plans:

In the beginning of their studies, students prepare a personal study plan, in which the student and the Department agree on what studies the student will pursue and in what order. This plan includes detailed information on major subject, minor subject, general studies, elective studies, credit transfer from previous degree and possible complementary studies.

### Complementary Studies (20-60 ECTS credits):

Students with a Finnish polytechnic degree or equivalent will have to study complementary studies. The extent of these studies depends on the content of the previous degree.

## The Courses Offered in English

	<i>ECTS cr</i>
BK10A0100 Individual Project Work	6
BK10A0200 Research Seminar	2
BK10A0300 Introduction to M.Sc. Studies	1
BK20A0100 Materials Science	6
BK20A0400 Modern Welding Technology	7
BK20A1100 Virtual Welding	3
BK30A0100 Laser Processes	6
BK30A0200 Product Design for Laser Processing	4
BK50A0700 Advanced Production Engineering	7
BK60A0300 Servo Control Engineering	6
BK70A0000 Simulation of a Mechatronic Machine	6
BK70A0400 Introduction to Multibody Dynamics	4
BK80A0500 Advanced Strength of Materials	7
BK80A0900 Structural Analysis	6
BK80A1000 Design of Steel Structures	6
BK80A1200 FE-analysis course	5
BK80A1400 Fatigue Design	6
BK80A1600 FE-analysis Seminar in Advanced Topics	3
BK90A1000 Wood Processing Machinery	6
BK90A1100 Measuring Technology at Mechanical Wood Processes	6

## Course Descriptions

<b><i>BK10A0100</i></b>	<b><i>INDIVIDUAL PROJECT WORK</i></b>	<b><i>6 ECTS cr</i></b>
	<b>Individual Project Work</b>	
	<b>Only for th students of Master's degree programmes of the Department of Mechanical Engineering.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-4	
<b>Lecturer(s)</b>	Professors Department of Mechanical Engineering	
<b>Contents</b>	The student will apply methods of engineering and/or research work to a design or production technology related project supervised by a professor, industrial representative or researcher/instructor. The work will be reported and presented.	
<b>Teaching Methods</b>	10 h of lectures, 1st-4th period. 150 h of tutorials and independent projects, 1st-4th period.	
<b>Assessment</b>	Passed/not passed, based on written report and oral presentation.	
<b>Prerequisites</b>	Consent of supervising professor.	
<b><i>BK10A0200</i></b>	<b><i>RESEARCH SEMINAR</i></b>	<b><i>2 ECTS cr</i></b>
	<b>Research Seminar</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 4	
<b>Contents</b>	International students will present and defend their own diploma project thesis work as well as serve as opponents and listen to other presentations.	
<b>Teaching Methods</b>	Excercises 10 h, 4th period. Simulation work 40 h.	
<b>Assessment</b>	Passed/not passed grade based on participation.	

<b>BK10A0300</b>	<b>INTRODUCTION TO M.SC. STUDIES</b>	<b>1 ECTS cr</b>
	<b>Introduction to M.Sc. Studies</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Gary Marquis, Information Specialist, M.Sc. Marja Talikka	
<b>Contents</b>	This course will help orient international students to the basics of study at LUT. Orientation week activities, information gathering, and essay.	
<b>Teaching Methods</b>	Lectures 8 h, 1st period. Exercises 10 h Independent work 8 h	
<b>Assessment</b>	Passed/not passed grade based on participation, exercises and essay.	
<b>Course Material</b>	LUT Web.	
<b>BK20A0100</b>	<b>MATERIALS SCIENCE</b>	<b>6 ECTS cr</b>
	<b>Materials Science</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Senior Assistant, Lic.Sc. (Tech.) Raimo Suoranta Assistant, Lic.Sc. (Tech.) Pekka Rajamäki	
<b>Aims</b>	The student is capable to select proper material according to functionality and economically.	
<b>Contents</b>	The structure of steel, plastic deformation, restoration, hardening, heat treatment methods. Selecting materials according to strength, toughness, corrosion resistance, wear resistance. Manufacturability. Light metals and non-metallic materials. LCC. Systems for selecting materials.	
<b>Teaching Methods</b>	28 h of lectures, 1st-2nd period. 42 h of independent work, 1st-2nd period.	
<b>Assessment</b>	0-5, examination 75 %, tutorials 25 %.	
<b>BK20A0400</b>	<b>MODERN WELDING TECHNOLOGY</b>	<b>7 ECTS cr</b>
	<b>Modern Welding Technology</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Jukka Martikainen Senior Assistant, Lic.Sc. (Tech.) Raimo Suoranta	
<b>Contents</b>	Productivity, economy and quality in welding. Welding costs. Productive and efficient new welding methods. Welding materials. The mechanisation and robotisation of welding. Mechanisation and robotisation equipments and systems. On-line and off-line programming. The design of welded structures. Modulation. Modelling and simulation in welding. Methods for preparing roots. Welding FMU and FMS. Lay-out in welding workshop. The quality, environmental and safety in welding workshop. Welding in the future. Adaptive welding. Welding in the global welding workshop.	
<b>Teaching Methods</b>	4 h of lectures, 1st-2nd period. 14 h of laboratory tutorials. 28 h of laboratory- and seminar presentations	
<b>Assessment</b>	0-5, examination 80 %, laboratory- and seminar presentations 20 %.	
<b>Course Material</b>	WebCT material. Lecture notes.	

<b>BK20A1100</b>	<b>VIRTUAL WELDING</b>	<b>3 ECTS cr</b>
	<b>Virtual Welding</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Part-time Untenured Teacher, M.Sc. (Tech.) Esa Hiltunen	
<b>Aims</b>	Be able to apply tools of computer technology on workshop operation planning, for example on simulation of robot welding system. Know, what are the opportunities and limitations of these tools.	
<b>Contents</b>	Welding production planning of workshops. Modelling and simulation of robot welding system. Virtual technology and its applications in mechanical engineering. Basis of virtual modelling. Basis of industrial robots and their construction. Planning of productive robotized welding. Definition of welding process parameters.	
<b>Teaching Methods</b>	2 h of lectures, 3rd period. 12 h of controlled tutorials, 3rd-4st period.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	WebCT.	
<b>BK30A0100</b>	<b>LASER PROCESSES</b>	<b>6 ECTS cr</b>
	<b>Laser Processes</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Veli Kujanpää Docent, D.Sc. (Tech.) Antti Salminen	
<b>Aims</b>	Readiness to understand the special features of laser processing in production and product design.	
<b>Contents</b>	Basic knowledge on different laser processing systems and processes and the interaction between laser beam and materials. Basic knowledge on laser welding, cutting and surface treatment. Optics of laser processing, safety and quality assurance. Practical cases. Basics of the interaction between laser beam and materials, absorption, keyhole and its usefulness on laser welding and cutting.	
<b>Teaching Methods</b>	28 h of lectures, 1st-2nd period. 16 h of tutorials, 1st-2nd period.	
<b>Assessment</b>	0-5, examination 90 %, seminar 10 %.	
<b>Course Material</b>	Steen W., Laser material processing. Material presented during lectures.	
<b>BK30A0200</b>	<b>PRODUCT DESIGN FOR LASER PROCESSING</b>	<b>4 ECTS cr</b>
	<b>Product Design for Laser Processing</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Docent, D.Sc. (Tech.) Antti Salminen	
<b>Aims</b>	Readiness to use laser processing possibilities on the tasks of product design.	
<b>Contents</b>	Special features of laser processing methods for product design. The effect of laser processing devices, process features, materials and processing results on product design. Practical examples on product design and its effects on product properties. Special features of laser processing and its usefulness on product design.	
<b>Teaching Methods</b>	28 h of lectures, 3rd-4th period. 14 h of tutorials, 3rd-4th period.	
<b>Assessment</b>	0-5, examination 50%, seminar 50%.	
<b>Course Material</b>	Kujanpää V. et al., Lasertyöstö. Steen W., Laser material processing.	
<b>Prerequisites</b>	BK30A0000 Sädeytyöstö or BK30A0100 Laser Processes	

<b>BK50A0700</b>	<b>ADVANCED PRODUCTION ENGINEERING</b>	<b>7 ECTS cr</b>
	<b>Advanced Production Engineering</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Juha Varis	
<b>Aims</b>	This course will deepen the student's knowledge of the most advanced design and production methods, equipment, equipment systems and modern product facilities used especially in the manufacture of thin and rough sheet metal products. The student will also learn to understand the role of manufacturing as a part of the company's strategy and to design and use production systems. The course will provide the student with the ability to handle duties in factory management and development as well as in research in the field.	
<b>Contents</b>	The manufacturing methods for modern metal cutting and sheet metal production. The advanced production methods for punching, folding and mechanical joining of sheet metal products. The production control systems of flexible automatic (FMS, IMS) production factories. The significance and technologies of product design as well as of production (CAD, CAP, PPS, CAM) especially in the manufacture of thin and rough sheet metal production. DFMA and costs functions of products, production controlling and simulation. The operation of a factory as part of a principal-supplier network. The technology and methods for improving production. The material handling, production and information systems of a workshop.	
<b>Teaching Methods</b>	The development of the operations of a workshop and quality technology. 30 h of lectures, 1st-2nd period. 28 h of exercises, 1st-2nd period. 56 h of laboratory tutorials, 1st-2nd period. Seminar 20 h, 1st-2nd period.	
<b>Assessment</b>	0-5, examination 60 %, satisfactorily completed tutorials 20 %, project work 20 %.	
<b>Course Material</b>	Materials to be announced during lectures.	
<b>BK60A0300</b>	<b>SERVO CONTROL ENGINEERING</b>	<b>6 ECTS cr</b>
	<b>Servo Control Engineering</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Heikki Handroos	
<b>Contents</b>	Control of Hydraulic, Pneumatic, and electrical servodrives. Structures and properties of basic types of servo-drives. Selection of appropriate control methods for different drive types. Fuzzy control of servodrives. Ability to design and control of different types of servodrives. Ability to evaluate the achievable properties of different servodrives.	
<b>Teaching Methods</b>	42 h of lectures, 3rd-4th period. 42 h of tutorials, 3rd-4th period. 30 h of exercises, 4th period.	
<b>Assessment</b>	0-5, examination 100 %.	
<b>Course Material</b>	Lecture notes.	
<b>Prerequisites</b>	The student must have completed BK60A0000 Mekatroniikan peruskurssi. Recommended BK60A0100 Hydrauliteknikka (not required from International Master's Programme students).	
<b>BK70A0000</b>	<b>SIMULATION OF A MECHATRONIC MACHINE</b>	<b>6 ECTS cr</b>
	<b>Simulation of a Mechatronic Machine</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Aki Mikkola	
<b>Aims</b>	The student will obtain the theoretical ability for the mathematical modelling and computer simulation of machine systems that are hydraulically,	

<b>Contents</b>	pneumatically or electronically actuated. The student will also obtain knowledge to utilize static, kinematic and dynamic analysis in a machine design process. Principles of multibody dynamics, modelling of actuators, coupled simulation. Description of mechanic flexibility. The use of Lagrangian equation. Constraint equations and Lagrangian multipliers. Inertia of rigid bodies. Modeling of hydraulic components.
<b>Teaching Methods</b>	Numerical integration of the equation of motion. Rotation matrix in spatial cases.
<b>Assessment</b>	28 h of lectures, 3rd-4th period.
<b>Course Material</b>	28 h of supervised tutorials, 3rd-4th period.
<b>Prerequisites</b>	0-5, examination or mid-course examinations 90 %, simulation work 10 %.
	Lecture notes.
	Students are recommended to have completed BK60A0000 Mekatroniikan peruskurssi, BK80A0000 Statiikka, BK80A0100 Dynamiikka I BK80A0200 Dynamiikka II (not required from International Master's Programme students).

<b>BK70A0400</b>	<b>INTRODUCTION TO MULTIBODY DYNAMICS</b>	<b>4 ECTS cr</b>
	<b>Introduction to Multibody Dynamics</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 3	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Aki Mikkola	
<b>Aims</b>	The student will obtain the theoretical ability for the mathematical modelling and computer simulation of machine systems that consists of rigid bodies.	
<b>Contents</b>	Principles of multibody dynamics. The use of Lagrangian equation. Constraint equations and Lagrangian multipliers. Inertia of rigid bodies. Numerical integration of the equation of motion. Rotation matrix in spatial cases.	
<b>Teaching Methods</b>	Lectures of 14 h, 3rd period.	
<b>Assessment</b>	Exercises of 14 h, 3rd period.	
<b>Course Material</b>	0-5, examination 90 %, simulation work 10 %.	
<b>Prerequisites</b>	Lecture notes. Students are recommended to have completed BK80A0000 Statiikka, BK80A0100 Dynamiikka I, BK80A0200 Dynamiikka II (not required from International Master's Programme students).	

<b>BK80A0500</b>	<b>ADVANCED STRENGTH OF MATERIALS</b>	<b>7 ECTS cr</b>
	<b>Lujuusoppi II</b>	
	<b>Alternate years Lujuusoppi II/Advanced Strength of Materials</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Gary Marquis Researcher/Teacher, D.Sc. (Tech.) Tapani Halme Senior Assistant, D.Sc. (Tech.) Timo Nykänen	
<b>Aims</b>	The course is a continuation of the basic course and is intended to provide students with a more thorough background in solid mechanics and strength of materials.	
<b>Contents</b>	Unsymmetric beam bending, states of stress and strain, generalized Hooke's law, behaviour of orthotropic materials and laminates, thick-walled axisymmetric shells, stress function, experimental methods in strength of materials, deformation energy and failure theories, St. Venant's theory for torsion, Prandtl membrane analogy, restrained warping of thin-walled open sections, stresses in curved bars, deformation of circular members, composite beams, columns and beam-columns, equilibrium solutions for elastic buckling, plastic bending and torsion, plastic limit analysis.	
<b>Teaching Methods</b>	42 h of lectures, 1st-2nd period.	
	42 h of tutorials, 1st-2nd period.	

<b>Assessment</b>	1 h of laboratory work. 8 h of independent work.
<b>Course Material</b>	0-5, examination or two intermediate examinations 100% (85%), laboratory work (5%), exercises (10%).
<b>Prerequisites</b>	Lecture notes. Ugural A.C. and Fenster S.K., Advanced strength and applied elasticity. -4th ed. BK80A0300 Lujusoppi I tutorials completed or registration in the International Master's degree programme.

<b>BK80A0900</b>	<b>STRUCTURAL ANALYSIS</b>	<b>6 ECTS cr</b>
	<b>Structural Analysis</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Gary Marquis Part-time Untenured Teacher, M.Sc. (Tech.) Sami Heinilä	
<b>Aims</b>	Drawing shear and moment diagrams, constructing influence lines. Use of STRAN computer program.	
<b>Contents</b>	Application of basic geometry and static principals to the analysis of simple structural components. Structures include frame, beam and truss structures. Indeterminacy and exact and approximate methods for indeterminate structures. Energy methods and force methods.	
<b>Teaching Methods</b>	42 h of lectures, 1st-2nd period. 18 h of tutorials, 1st-2nd period. 20 h of laboratory work.	
<b>Assessment</b>	0-5, examination 50 %, exercises 50 %.	
<b>Course Material</b>	Hibbeler R.C., Structural Analysis - 5th ed., Prentice-Hall, 2002.	
<b>Prerequisites</b>	Static equilibrium, understand shear forces, normal forces and bending moments BK80A0000 Statiikka and BK80A0300 Lujusoppi I.	

<b>BK80A1000</b>	<b>DESIGN OF STEEL STRUCTURES</b>	<b>6 ECTS cr</b>
	<b>Design of Steel Structures</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Gary Marquis	
<b>Aims</b>	Use of AGIFAP computer program.	
<b>Contents</b>	Principals of design for welded mechanical engineering structures. Theory of buckling, fatigue of welded structures, introduction to limit state design, yield line theory, welding residual stresses. Design to avoid buckling of slender members, design to avoid fatigue failure, design of welded joints, optimization of beams.	
<b>Teaching Methods</b>	42 h of lectures, 3rd-4th period. 10 h of tutorials 3rd-4th period. 5 h of laboratory work, 3rd-4th period.	
<b>Assessment</b>	0-5, examination 60 %, laboratory projects and reports 40 %.	
<b>Course Material</b>	Niemi E., Levyrakenteiden suunnittelu, 2003.	
<b>Prerequisites</b>	BK80A1100 FE-analyysin peruskurssi or BK80A1200 FE-analysis course	

<b>BK80A1200</b>	<b>FE-ANALYSIS COURSE</b>	<b>5 ECTS cr</b>
	<b>FE-analysis course</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 3-4	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Pasi Tanskanen	
<b>Aims</b>	The aim of this course is to ensure that the student has a good knowledge of the theoretic fundamentals of FE analysis as well as a basis for the reliable use of FEM software.	
<b>Contents</b>	The student will be acquainted with the procedure of static linear-elastic FE analysis with the aim of providing the student with a basic knowledge of the	

<b>Teaching Methods</b>	derivation of element stiffness matrices of elements, the assembly of a global stiffness matrix, the handling of boundary conditions and loading as well as the problem solving. In the tutorials the student will be acquainted with FE modelling using commercial software.
<b>Assessment</b>	28 h of lectures, 3rd-4th period. 28 h of tutorials, 3rd-4th period.
<b>Course Material</b>	0-5, examination 50 %, exercises 50 %.
	The material is to be specified during lectures.

<b>BK80A1400</b>	<b>FATIGUE DESIGN</b>	<b>6 ECTS cr</b>
<b>Year and Period</b>	<b>Fatigue Design</b>	
<b>Lecturer(s)</b>	M.Sc. (Tech.) 1, Period 1-2 Professor, D.Sc. (Tech.) Gary Marquis	
<b>Contents</b>	Principals of design to avoid fatigue failure of mechanical engineering components and structures. Introduction to fatigue, dynamic loading of structures, deformation of structural materials, stress concentrations, introduction to fracture mechanics. Design of structures based on stress-life approach, strain life approach and linear elastic fracture mechanics.	
<b>Teaching Methods</b>	42 h of lectures, 1st-2nd period. 40 h of tutorials, 1st-2nd period.	
<b>Assessment</b>	0-5, examination 60 %, exercises 40 %.	
<b>Course Material</b>	Dowling N.E., Mechanical Behavior of Materials 2nd ed., Prentice Hall.	
<b>Prerequisites</b>	BK80A0500 Lujusoppi II or BK20A0100 Materials Science.	

<b>BK80A1600</b>	<b>FE-ANALYSIS SEMINAR IN ADVANCED TOPICS</b>	<b>3 ECTS cr</b>
	<b>FE-analysis Seminar in Advanced Topics</b>	
	<b>Course registrations directly to the lecturer, WebOodi not in use.</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 1-4	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Pasi Tanskanen	
<b>Aims</b>	To better prepare the student for industrial problem solving or research work by giving more in-depth instruction on numerous advanced topics in finite element analysis.	
<b>Contents</b>	The course will cover numerous advanced topics in finite element analysis especially for mechanical engineers, e.g., solution techniques, stability and dynamic eigenvalue problems, sub-modeling and sub-structure techniques, and nonlinear analysis.	
<b>Teaching Methods</b>	Lectures 14 h, 1st-4th period.	
<b>Assessment</b>	0-5, exercises 100 %.	
<b>Course Material</b>	The material is to be specified during lectures.	
<b>Prerequisites</b>	BK80A1200 FE-analysis course.	

<b>BK90A1000</b>	<b>WOOD PROCESSING MACHINERY</b>	<b>6 ECTS cr</b>
	<b>Wood Processing Machinery</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 3	
<b>Lecturer(s)</b>	Researcher, M.Sc. (Tech.) Kimmo Piispa	
<b>Aims</b>	Comprehensive insight on machinery and processes used in the primary wood processing industry. Basic knowledge of raw material handling, debarking, chipping, cutting processes, saws, sorting, drying and secondary machinery. Practical knowledge of sawmills including a sawmill visit and a written report. Student makes an individual written report on a selected subject and presents it in a seminar.	

<b>Contents</b>	Primary wood processing technologies and machinery. Production planning, wood as raw material, maintenance, environment and labour safety.
<b>Teaching Methods</b>	32 h lectures, 3rd period. 16 h mill visits and seminars, 3rd period. 24 h independent projects, 3rd period. Two written reports, final examination.
<b>Assessment</b>	0-5, Final examination 80 %, written reports and approved seminar attendance 20 %.
<b>Course Material</b>	Vuorilehto J., Wood Processing Machinery, Course Book.

<b>BK90A1100</b>	<b>MEASURING TECHNOLOGY AT MECHANICAL WOOD PROCESSES 6 ECTS cr</b>
	<b>Measuring Technology at Mechanical Wood Processes</b>
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 4
<b>Lecturer(s)</b>	Researcher, M.Sc. (Tech.) Kimmo Piispa
<b>Aims</b>	Comprehensive insight on techniques and equipment used in the primary and secondary wood processing industry. Basic knowledge of statistical control, measuring devices, scanners and optimization. Practical knowledge of dimension control including an analysis of a saw process in a sawmill with a written report. Student makes an individual written report on a selected subject and presents it in a seminar.
<b>Contents</b>	Measuring and control techniques and systems in mechanical wood industry. Physics and use of measuring techniques and devices.
<b>Teaching Methods</b>	32 h lectures, 3rd period. 16 h mill visits and seminars, 3rd period. 24 h independent projects, 3rd period. Two written reports, final examination.
<b>Assessment</b>	0-5, Final examination 80 %, written reports and approved seminar attendance 20 %.
<b>Course Material</b>	Vuorilehto J., Measuring Technology at Mechanical Wood Processes, Course Book.
<b>Prerequisites</b>	BK90A1000 Wood Processing Machinery suoritettuna.

## 9 Master's Degree Programme "New Packaging Solutions"

The Master's degree programme "New Packaging Solutions" is a part-time programme leading to the degree of Master of Science in Technology. Students have two years (90 ECTS credits) of coursework in which all lectures, exercises and laboratory work are conducted in English. The Master's thesis (30 ECTS credits) will be conducted after the other courses have been completed.

### The Aims of the Master's Degree Programme

The objective of the programme is to educate experts in packaging materials, converting and packaging technologies who possess the skills to work throughout the whole packaging chain. It is aimed at students already working in packaging related businesses or wishing to pursue a career in the industry dealing with packaging.

### Careers for Graduates

The packaging field offers a great diversity of employment opportunities in production, research, development and sales & marketing. The professional tasks may include, for example, production, product development and design, marketing and sales in domestic and international businesses.

### The Structure of the Programme

<p style="text-align: center;"><b>Major Subject 70 ECTS cr</b></p> <ul style="list-style-type: none"> <li>- <b>Packaging Technologies 40 ECTS cr</b></li> <li>- <b>Master's Thesis 30 ECTS cr</b></li> </ul>	<p style="text-align: center;"><b>Minor Subject 20 ECTS cr</b></p> <p style="text-align: center;"><b>Industrial Management</b></p>
<p style="text-align: center;"><b>General Studies 20 ECTS cr</b></p>	<p style="text-align: center;"><b>Elective Studies 10 ECTS cr</b></p>

#### General Studies (20 ECTS credits):

General studies are common to all the students in the programme. The studies provide a brief introduction to the packaging field and packaging materials as well as language & communication skills essential for M.Sc. studies.

#### Major Subject (40 ECTS credits):

*The person responsible for major subject in Packaging Technologies is professor, D.Sc. (Tech.) Juha Varis.*

The main focus of the major subject is on paper and paperboard converting technologies, packaging machinery and packaging technologies, planning and design of packaging solutions and understanding of packaging chain demands.

#### Master's Thesis (30 ECTS credits):

The Master's thesis is a research or design project, which will be written after the other courses have been completed. It is carried out in the field of the student's major subject.

#### Minor Subject (20 ECTS credits):

The minor subject Industrial Management is offered by the Department of Industrial Engineering and Management. It is specially designed to support the major subject in Packaging Technologies and it will be offered on a part-time basis once a year. Choices of other minor subjects will be treated on a case-by-case basis.

**Elective Studies (10 ECTS credits):**

To attain the full 120 ECTS credits, the students may need to take some additional courses. Elective studies can include any courses offered by Lappeenranta University of Technology if the required prerequisites are completed. Elective studies may include a maximum of 6 ECTS credits of internship improving expertise. Foreign students are recommended to study Finnish for Foreigners courses.

**General Studies (20 ECTS credits)**

1. General Studies (20 ECTS cr)		year	per.	ECTS cr
BK10A0300	Introduction to M.Sc. Studies	M.Sc. (Tech.) 1	1	1
BK10A0800	Introduction to M.Sc. Studies in Packaging	M.Sc. (Tech.) 1	1	1
BK20A1200	Interaction of the Package and the Content	M.Sc. (Tech.) 1	3-4	3
BK20A1300	Packaging Materials	M.Sc. (Tech.) 1	1-2	4
FV10A 11EC <sup>c</sup>	Language and Communication Studies			11

<sup>c</sup>) FV13A1200 Teknisk svenska for Finnish students who need to attain proficiency in Swedish. The following studies of English language are recommended:

FV11A6200 English for Negotiating 3 ECTS cr, year 1, per. 3-4  
 FV11A4200 Writing for Business 2 ECTS cr, year 1, per. 1,2,3,4  
 FV11A9750 Aspects of Culture 3 CTS cr, year 2, per. 1-2  
 FV11A9300 Scientific and Technical English Writing Course 4 ECTS cr, year 2, per. 1-4

**Major Subject in Packaging Technologies (70 ECTS credits)**

Major Subject in Packaging Technologies (70 ECTS cr)		year	per.	ECTS cr
BK10A0100	Individual Project Work	M.Sc. (Tech.) 1	1-4	6
BK10A0200	Research Seminar	M.Sc. (Tech.) 2	4	2
BK20A1400	Coating and Lamination of Fibre Based Packaging Materials	M.Sc. (Tech.) 1	1-3	5
BK30A0400	Laser in Converting and Packaging	M.Sc. (Tech.) 2	1-2	2
BK50A1200	Machine Design for Packaging Technology	M.Sc. (Tech.) 1	3-4	2
BK50A1300	Converting and Forming of Fibre Based Packaging	M.Sc. (Tech.) 2	1-2	5
BK50A1400	Packaging Lines and Machinery	M.Sc. (Tech.) 2	3-4	8
BK50A1500	Printing and Varnishing	M.Sc. (Tech.) 1	2-3	2
BK50A1600	Functions of Package and Packaging Formats	M.Sc. (Tech.) 2	1-2	4
BK50A1700	Legislation on Packaging and Environmental Issues Related to Packaging	M.Sc. (Tech.) 2	1-3	4
Thesis	Master's Thesis			30

**Minor Subject Industrial Management (20 ECTS credits)**

Industrial Management (20 ECTS cr)		per.	ECTS cr
CS20A6000	Supply Chain Management	int.	6
CS20A6050	Decision-Making in Supply Chain	int.	5
CS30A6000	Technology Management	int.	3
CS35A6000	Information & Knowledge Management in Innovative Enterprises	4 int.	6

**Additional Information****Personal Study Plans:**

In the beginning of their studies, students prepare a personal study plan, in which the student and the Department agree on what studies the student will pursue and in what order. This plan includes detailed information on major subject, minor subject, general studies, elective studies, credit transfer from previous degree and possible complementary studies.

**Complementary Studies (20-60 ECTS credits):**

Students with a Finnish polytechnic degree or equivalent will have to study complementary studies. The extent of these studies depends on the content of the previous degree.

**Further Information:**

International Officer Minna Loikkanen

**The Courses Offered in English**

	<i>ECTS cr</i>
BK10A0100 Individual Project Work	6
BK10A0200 Research Seminar	2
BK10A0300 Introduction to M.Sc. Studies	1
BK10A0800 Introduction to M.Sc. Studies in Packaging	1
BK20A1200 Interaction of the Package and the Content	3
BK20A1300 Packaging Materials	4
BK20A1400 Coating and Lamination of Fibre Based Packaging Materials	5
BK20A1500 Principles of Chemistry, Paper Technology and Food Technology	5
BK30A0400 Laser in Converting and Packaging	2
BK50A1200 Machine Design for Packaging Technology	2
BK50A1300 Converting and Forming of Fibre Based Packaging	5
BK50A1400 Packaging Lines and Machinery	8
BK50A1500 Printing and Varnishing	2
BK50A1600 Functions of Package and Packaging Formats	4
BK50A1700 Legislation on Packaging and Environmental Issues Related to Packaging	4
BK80A2000 Basics of Technical Mechanics	4
CS20A6000 Supply Chain Management	6
CS20A6050 Decision-Making in Supply Chain	5
CS30A6000 Technology Management	3
CS35A6000 Information & Knowledge Management in Innovative Enterprises	6

**Course Descriptions**

<b><i>BK10A0100</i></b>	<b><i>INDIVIDUAL PROJECT WORK</i></b>	<b><i>6 ECTS cr</i></b>
	<b>Individual Project Work</b>	
	<b>Only for th students of Master's degree programmes of the Department of Mechanical Engineering.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-4	
<b>Lecturer(s)</b>	Professors Department of Mechanical Engineering	
<b>Contents</b>	The student will apply methods of engineering and/or research work to a design or production technology related project supervised by a professor, industrial representative or researcher/instructor. The work will be reported and presented.	
<b>Teaching Methods</b>	10 h of lectures, 1st-4th period. 150 h of tutorials and independent projects, 1st-4th period.	
<b>Assessment</b>	Passed/not passed, based on written report and oral presentation.	
<b>Prerequisites</b>	Consent of supervising professor.	

<b>BK10A0200</b>	<b>RESEARCH SEMINAR</b>	<b>2 ECTS cr</b>
	<b>Research Seminar</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 4	
<b>Contents</b>	International students will present and defend their own diploma project thesis work as well as serve as opponents and listen to other presentations.	
<b>Teaching Methods</b>	Exercises 10 h, 4th period. Simulation work 40 h.	
<b>Assessment</b>	Passed/not passed grade based on participation.	
<b>BK10A0300</b>	<b>INTRODUCTION TO M.Sc. STUDIES</b>	<b>1 ECTS cr</b>
	<b>Introduction to M.Sc. Studies</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Gary Marquis, Information Specialist, M.Sc. Marja Talikka	
<b>Contents</b>	This course will help orient international students to the basics of study at LUT. Orientation week activities, information gathering, and essay.	
<b>Teaching Methods</b>	Lectures 8 h, 1st period. Exercises 10 h Independent work 8 h	
<b>Assessment</b>	Passed/not passed grade based on participation, exercises and essay.	
<b>Course Material</b>	LUT Web.	
<b>BK10A0800</b>	<b>INTRODUCTION TO M.Sc. STUDIES IN PACKAGING</b>	<b>1 ECTS cr</b>
	<b>Introduction to M.Sc. Studies in Packaging</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Juha Varis International Officer, M.A. Minna Loikkanen	
<b>Aims</b>	To provide understanding of packaging branch and the degree programme.	
<b>Contents</b>	The course will introduce the packaging branch and packaging businesses and the main features of the degree programme. Students will make personal study plans.	
<b>Teaching Methods</b>	8 h lectures, 1st period. 10 h exercises, 1st period. 8 h independent work, 1st period.	
<b>Assessment</b>	Passed/not passed	
<b>Course Material</b>	Orientation days, Study guide Handouts.	
<b>BK20A1200</b>	<b>INTERACTION OF THE PACKAGE AND THE CONTENT</b>	<b>3 ECTS cr</b>
	<b>Interaction of the Package and the Content</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Visiting lecturers, Professor, Ph.D. Atte von Wright, Docent, Ph.D. Henry Lindell	
<b>Aims</b>	Understanding of the main mechanisms about the interaction of package and the content especially in food packaging.	
<b>Contents</b>	Fundamentals of microbiology and toxicology relevant to packaging materials, packages, machinery and the packed products. Fundamentals of the interaction of the packaging and the content. The main analyzing methods of packages and packaging materials.	
<b>Teaching</b>	Lectures total 24 h, 3rd-4th period.	

<b>Methods</b>	Exercices total 12 h, 3rd-4th period.
<b>Assessment</b>	0-5, examination 70 %, excercises 30 %.
<b>Course Material</b>	Handouts.

<b>BK20A1300</b>	<b>PACKAGING MATERIALS</b>	<b>4 ECTS cr</b>
	<b>Packaging Materials</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Visiting lecturer, Professor, Jurkka Kuusipalo	
<b>Aims</b>	To provide understanding of the packaging related properties of various packaging materials.	
<b>Contents</b>	The manufacture, physical and chemical properties (relevant for packaging) of the major packaging materials: paper, paperboard, corrugated board, wood, glass, metals, polymers including biopolymers and adhesives. Foreseeable future development of each material. Material composite possibilities and their use. Capability to select material alternatives or combinations for specific packaging solutions based on their possible performance characteristics.	
<b>Teaching Methods</b>	Lectures total 16 h, 1st-2nd period.	
<b>Assessment</b>	Exercices total 7 h, 1st-2nd period.	
<b>Course Material</b>	0-5, examination 70 %, excercises 30 %. Course material. Lecturers' comments. Savolainen, A. ed., Paper and paperboard converting. In series of books: Papermaking science and technology, osa 12, Fapet, Helsinki.	

<b>BK20A1400</b>	<b>COATING AND LAMINATION OF FIBRE BASED 5 ECTS cr</b>	<b>PACKAGING MATERIALS</b>
	<b>Coating and Lamination of Fibre Based Packaging Materials</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-3	
<b>Lecturer(s)</b>	Visiting lecturer, Professor, Jurkka Kuusipalo	
<b>Aims</b>	To provide understanding of various ways to combine materials with paper and board and of their properties in packaging applications.	
<b>Contents</b>	Raw materials, for main coating and laminating methods. Main properties (including pronting) of the finished products. Focus in extrusion coating process. The main applications of paper based packaging materials in packaging sector. Combined packaging structures and their manufacturing techniques. Capability to run extrusion coating line and utilize fibre materials on the packaging solutions.	
<b>Teaching Methods</b>	Lectures total 18 h, 1st-3rd period.	
<b>Assessment</b>	Exercices total 8 h, 1st-3rd period.	
<b>Course Material</b>	Seminar 1st-3rd period. 0-5, examination 70 %, excercises 30 %. Course material. Lecturers' comments. Savolainen, A. ed., Paper and paperboard converting. In series of books: Papermaking science and technology, osa 12, Fapet, Helsinki.	

<b>BK20A1500</b>	<b>PRINCIPLES OF CHEMISTRY, PAPER TECHNOLOGY AND FOOD TECHNOLOGY</b>	<b>5 ECTS cr</b>
	<b>Principles of Chemistry, Paper Technology and Food Technology</b>	
	<b>Belongs to only to complementary studies of New Packaging Solutions. Course registrations during 1st period.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-4	
<b>Lecturer(s)</b>	Visiting lecturer, M.Sc. (Tech) Matti Salste	
<b>Aims</b>	Understanding basic general, organic and biochemical phenomena. Understanding basics of paper technology and products. Understanding packaging related features of processed food.	
<b>Contents</b>	Basic phenomena of general, organic and biochemistry. Main fibre grades and other raw materials and their role in paper products, the main part processes of paper production, typical properties of the main paper and board grades. The basic principles of foods and processing theory, the main food processes and their effect on foods considering packaging.	
<b>Teaching Methods</b>	Essays with specific instruction.	
<b>Assessment</b>	Pass/Fail.	
<b>Course Material</b>	Smook G.A., Handbook for Pulp & Paper Technologists, 2nd edition, p 1-7, 36-44, 194-324 or Smook G.A., Handbook for Pulp & Paper Technologists, 3rd edition, p 1-9, 37-45, 190-324 or Herbert Holik, Handbook of Paper and Board, Wiley-VCH Verlag GmbH & Co. KgaA, Wennheim, Germany. Bettelheim & March, Introduction to General, Organic and Biochemistry Saunders College Publishing Fellows P., Food processing technology - Principles and Practice, Second edition, Part I p 7-62, III and IV, p 229-452.	
<b>BK30A0400</b>	<b>LASER IN CONVERTING AND PACKAGING</b>	<b>2 ECTS cr</b>
	<b>Laser in Converting and Packaging</b>	
	<b>The course will be first time lectured during the academic year 2007-2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Veli Kujanpää Lecturer, N. N.	
<b>Aims</b>	To provide understanding for laser based processing in converting technology, paper and cardboard material, multimaterials, pigment and plastic coated, packaging lines.	
<b>Contents</b>	The use of laser in converting of fibre based packaging materials and packaging line solutions. Laser processes like laser cutting, laser scoring, laser joining, and laser marking. Laser machines, optics and work stations in other applications. Product design for laser processing. Other special laser technologies. Capability to utilize laser technologies in converting and packaging.	
<b>Assessment</b>	0-5, examination 90 %, tutorials 10 %.	
<b>Course Material</b>	Will be announced later.	

<b>BK50A1200</b>	<b>MACHINE DESIGN FOR PACKAGING TECHNOLOGY</b>	<b>2 ECTS cr</b>
	<b>Machine Design for Packaging Technology</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Harri Eskelinen	
<b>Aims</b>	To provide understanding of most important mechanisms and their machine parts for packaging solutions by utilizing the basic theories of DFM(A).	
<b>Contents</b>	Basic mechanisms types, mechanisms analysis and synthesis, reliability-based machine design, wear and lifetime analysis of selected machine parts and elements. Different methodologies of DFM(A) and means to apply them in packaging technology. Knowledge about how to design a simple machine or mechanisms for packaging operations and means to estimate functional aspects of applied technology.	
<b>Teaching Methods</b>	Lectures total 14 h, 2nd-3rd period. Exercises total 26 h, 2nd-3rd period. Seminar 2nd-3rd period.	
<b>Assessment</b>	0-5, examination 70 %, exercises and seminar 30 %	
<b>Course Material</b>	Erdman A.G., Mechanism Design. Norton R.L., Design of Machinery.	
<b>BK50A1300</b>	<b>CONVERTING AND FORMING OF FIBRE BASED PACKAGING</b>	<b>5 ECTS cr</b>
	<b>Converting and Forming of Fibre Based Packaging</b>	
	<b>The course will be first time lectured during the academic year 2007-2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Juha Varis Visiting lecturer, Professor, Jurkka Kuusipalo	
<b>Aims</b>	To provide understanding of various paper and board converting technologies and their developments in package production.	
<b>Contents</b>	The main technologies of carton forming: die cutting, scoring, folding of blanks and other forming technologies. Tool design (3D-systems) and tool manufacturing technologies in modern workshops. Machines and equipment for listed converting processes, and their integration into effective production systems. Sealing, gluing and closing technologies of fibre based packaging materials. The special requirements various paper based materials for converting processes. Features to be considered in multimaterial converting. Knowledge of the main paper package forming technologies. The requirements of various paper and board grades set for the processes.	
<b>Assessment</b>	Written examination 60 %, seminar 40 %	
<b>Course Material</b>	Laboratory works; passed/not passed Will be announced later	
<b>BK50A1400</b>	<b>PACKAGING LINES AND MACHINERY</b>	<b>8 ECTS cr</b>
	<b>Packaging Lines and Machinery</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Jukka Martikainen Lecturers N.N.	
<b>Aims</b>	To provide understanding for operations and functions of packaging lines and their development aspects.	

<b>Contents</b>	The unit processes in packaging line, the main components of packaging line. The main filling technologies in food packaging, for example liquid packaging, aseptic packaging, MAP packaging, autoclave packaging. The main filling technologies in non-food packaging like pharma, electronics, industrial packaging. Technologies used in carton packaging and flexible packaging: pouch, wrapping, form-fill-seal. The focus in fibre based packaging. Instrumentation, automation, robotics in packaging lines. Will be announced in 2007-2008 study guide.
<b>Teaching Methods</b>	
<b>Assessment</b>	0-5, examination 100 %.
<b>Course Material</b>	Will be informed later.

<b>BK50A1500</b>	<b>PRINTING AND VARNISHING</b>	<b>2 ECTS cr</b>
	<b>Printing and Varnishing</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2-3	
<b>Lecturer(s)</b>	Guest Lecturer, D.Sc. (Tech.) Johanna Lahti	
<b>Aims</b>	To provide understanding of printing methods used in packaging industry. Capability to select a proper printing method for a certain packaging solution. Capability to solve printing problems and to control print quality.	
<b>Contents</b>	Pre-press operations. The main printing technologies and their use in packaging industry. Printing of various substrates. Composition of printing inks. Print quality and defects. Print quality measurements. Emerging printing technologies and their potential use in packaging industry. Future trends of printing technologies.	
<b>Teaching Methods</b>	Lectures total 12 h, 2nd-3rd period. Exercises total 6 h, 2nd-3rd period.	
<b>Assessment</b>	0-5, examination 70 %, exercises 30 %.	
<b>Course Material</b>	Course material. Lecturers' comments. Saarelma, H., Oittinen P., Printing. In series of books: Papermaking Science and Technology, Book 13, Fapet, Helsinki 1999.	

<b>BK50A1600</b>	<b>FUNCTIONS OF PACKAGE AND PACKAGING FORMATS</b>	<b>4 ECTS cr</b>
	<b>Functions of Package and Packaging Formats</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	N.N.	
<b>Aims</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Juha Varis To provide understanding of various functions of packaging and packages and their future trends. To provide understanding of various formats of packages, their merits and shortfalls in logistic chain and end-use. To provide understanding of challenges of packages in specific end uses.	
<b>Contents</b>	Aspects of the role of packaging throughout the value chain. The main categories packages and their use. Aspects for understanding of the main opportunities of various packaging formats in specific end uses when developing new solutions.	
<b>Teaching Methods</b>	Lectures 24 h. Exercises/seminars 16 h.	
<b>Assessment</b>	0-5, assignments	

<b>BK50A1700</b>	<b>LEGISLATION ON PACKAGING AND ENVIRONMENTAL ISSUES RELATED TO PACKAGING</b>	<b>4 ECTS cr</b>
	<b>Legislation on Packaging and Environmental Issues Related to Packaging</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-3	
<b>Lecturer(s)</b>	Visiting lecturers, Professor, Ph.D Atte von Wright M.Sc. Päivi Harju-Eloranta	
<b>Aims</b>	To provide understanding of packaging related legislation and sustainability aspects and their impact on the packaging business.	
<b>Contents</b>	The main content of the EU legislation of chemical, biological and microbiological hygienic and purity aspects in the packaging. Environmental issues of packaging and packaging waste and the relevant legislation. The environmental standardization of packages in EU. Sustainability aspects concerning packaging legislation on product safety aspects and traceability.	
<b>Teaching Methods</b>	Lectures total 18 h, 1st-3rd period. Exercises total 14 h, 1st-3rd period. Seminar 1st-3rd period.	
<b>Assessment</b>	0-5, assignments	
<b>Course Material</b>	Handouts	
<b>BK80A2000</b>	<b>BASICS OF TECHNICAL MECHANICS</b>	<b>4 ECTS cr</b>
	<b>Basics of Technical Mechanics</b>	
	<b>Belongs to only to complementary studies of New Packaging Solutions.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Tapani Halme	
<b>Contents</b>	Equilibrium of a particle and a rigid body, concentrated and distributed force systems, problems involving trusses, frames and machines. Internal forces of straight beams, centroid and main axes of a cross-section. Definition of normal and shear stress, mechanical properties of materials. Separate treatments of axial load, torsion and bending. State of stress resulting from combined loadings. Theories of failure, design of beams and shafts. Deflections of beams and shafts. Buckling of columns.	
<b>Teaching Methods</b>	Lectures 24 h Exercises 6 h Independent work 6 h	
<b>Assessment</b>	Passed/not passed based on exercises and exam, exam 50 %, exercises 50 %.	
<b>Course Material</b>	Hibbeler, Statics and Strength of Materials	
<b>CS20A6000</b>	<b>SUPPLY CHAIN MANAGEMENT</b>	<b>6 ECTS cr</b>
	<b>Supply Chain Management, Toimitusketjun hallinta</b>	
	<b>Only for the students of the Master's degree programme "New Packaging Solutions".</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period int.	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Janne Huiskonen Assistant, N. N.	
<b>Aims</b>	Relevant supply chain concepts. Basic principles and methods for planning and control of material flows in supply chains. Understanding of inter-company effects and needs for coordination and collaboration. Key performance indicators of supply chain management.	
<b>Contents</b>	The role and tasks of supply chain management (SCM) in a firm. Principles and	

<b>Teaching Methods</b>	basic methods of planning and control of material flows in supply chain. Supply chain dynamics and coordination. Structural design of supply chains. Inter-company relationships and collaboration. Performance measurement. Lectures, exercises and case assignments 28 h as intensive teaching in April to June. exercises and case assignments. Written examination. Accepted assignments.
<b>Assessment</b>	0-5. Examination and assignments.
<b>Course Material</b>	Literature will be announced later.

<b>CS20A6050</b>	<b>DECISION-MAKING IN SUPPLY CHAIN</b>	<b>5 ECTS cr</b>
	<b>Decision-Making in Supply Chain , Päätöksenteko toimitusketjussa</b>	
	<b>Only for the students of the Master's degree programme "New Packaging Solutions".</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period int.	
<b>Lecturer(s)</b>	Senior Assistant, M.Sc. (Tech.) Petri Niemi Assistant, N. N.	
<b>Aims</b>	Ability to manage strategic supply chain decision-making processes and support them with quantitative supply chain analysis techniques.	
<b>Contents</b>	Quantitative supply chain analysis techniques utilization in strategic supply chain decision-making process. Strategic supply chain decision-making as a process. Presentations for decision-making support.	
<b>Teaching Methods</b>	Lectures and group work guidance 26 h as intensive teaching in April to June. Accepted case assignments.	
<b>Assessment</b>	0-5. Case assignments oral presentations and written reports 100%.	
<b>Course Material</b>	Literature will be announced later.	
<b>Prerequisites</b>	CS20A6000 Supply Chain Management.	

<b>CS30A6000</b>	<b>TECHNOLOGY MANAGEMENT</b>	<b>3 ECTS cr</b>
	<b>Technology Management, Teknologiajohtamisen perusteet</b>	
	<b>Only for the students of the Master's degree programme "New Packaging Solutions".</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period int.	
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Tech.) Ville Ojanen	
<b>Contents</b>	Must know: Sources and Areas of Industrial Innovation. Technology Management Taxonomies and Tools. Technology and Product Strategies. Innovation Management Taxonomies. From Idea to Product Process. Management of R&D and New Product Development Projects. Assessment Methods for Decision-making in Technology Management. New Technology-based Start-ups. Should know: Product Lifecycle Management. Marketing of New Products. Collaboration in Innovation and Technology Management. Special Issues, e.g. Intellectual Property Rights.	
<b>Teaching Methods</b>	Lectures and exercises 18 h as intensive teaching in April to June. Written examination and case study reports.	
<b>Assessment</b>	0-5, examination 70 %, written and oral case/research article reports 30 %.	
<b>Course Material</b>	Lecture notes. F. Betz: Managing Technological Innovation: Competitive Advantage from Change, 2nd edition (2003). Baker, Michael & Hart, Susan (1998): Product strategy and management. Prentice Hall. Articles and Case Studies Other literature announced later.	

<b>CS35A6000</b>	<b>INFORMATION &amp; KNOWLEDGE MANAGEMENT IN INNOVATIVE ENTERPRISES</b>	<b>6 ECTS cr</b>
	<b>Information &amp; Knowledge Management in Innovative Enterprises , Tietojohdaminen uudistuvassa yrityksessä</b>	
	<b>Only for the students of the Master's degree programme "New Packaging Solutions".</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 4 int.	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Hannu Kärkkäinen Lecturer, M.Sc. (Tech.) Jorma Papinniemi	
<b>Aims</b>	To clarify how various systematic approaches, tools and methods of information & knowledge management can be utilized as well in product innovation as in business process re-engineering to improve the innovativeness and competitiveness of enterprises.	
<b>Contents</b>	Must know: Challenges, needed skills and systematic approaches for the development of new innovations. Process innovation and the role of IT. Management of process information and knowledge. Design of business processes. Automation of B2B processes. Should know: How people perceive, gather, select, organize and create information and knowledge for the development of novel types of innovations. Modeling tools in BPR. Process-aware information systems (ERP, CRM, SCM, PLM).	
<b>Teaching Methods</b>	Lectures 32 hrs as intensive teaching from April to June. Written seminar report and its presentation and opponent report.	
<b>Assessment</b>	0 - 5, seminar report 70 %, presentation 10 %, opponent report 20 %.	
<b>Course Material</b>	Selection of articles. Becker, Jörg et. al. editors: Process Management. A Guide for the Design of Business Processes. Springer-Verlag 2003.	

## 10 Master's Degree Programme in Bioenergy Technology

The Master's degree programme in Bioenergy Technology corresponds to 120 ECTS credits and leads to the degree of Master of Science in Technology.

### The Aims of the Master's Degree Programme

The Master's degree programme responds to the needs of the changing society regarding sustainable energy and environmental engineering in a socially responsible international context.

The graduate is expected to

- be able to describe sustainability in energy production
- be able to design power engines in renewable energy
- understand and describe the special characteristics of the waste-to-energy technologies compared to other energy production technologies
- be able to explain the function of the most important emission reduction methods
- be familiar with the techniques of integrating environmental issues into decision-making processes
- be able to identify the advantages of using bioenergy, name the most important bioenergy sources and recognise the technical and economical possibilities to use bioenergy technology solutions
- be able to work with others in task-orientated groups, participating and interacting in the group in a productive manner for him/herself and for the group as a whole

### The Structure of the Programme

Master's Thesis 30 ECTS cr	
Major Subject 30 ECTS cr	Minor Subject min. 20 ECTS cr
General Studies 24 ECTS cr	Elective Studies min. 16 ECTS cr

#### General Studies (24 ECTS credits):

General studies are common to all the students in the programme.

#### Major Subject (30 ECTS credits)

The major subject Environmental Energy Technology is common to all the students in the programme.

The major subject focuses on reducing the environmental impacts of energy production, such as energy production technologies using different types of renewable fuels and new pollution control technologies.

#### Master's Thesis (30 ECTS credits)

The Master's thesis is a demanding research or design project carried out in the field of student's major subject.

#### Minor Subject (20 ECTS credits)

Students can choose any minor subject taught in English at LUT.

The minor subject Bioenergy Technology consists of 23 ECTS credits.

## Elective Studies

To attain the full 120 ECTS credits, the students need to take some additional courses. Elective studies can include any courses taught in English at LUT if the required prerequisites are completed.

## General Studies

<i>Obligatory Studies (24 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BK10A0300	Introduction to M.Sc. Studies	M.Sc. (Tech.) 1	1	1
BM20A1900	Statistics II	M.Sc. (Tech.) 1-2	2	3
FV18A9100	Finnish for Foreigners 1		1, 3	2
FV18A9200	Finnish for Foreigners 2		2, 4	2
FV11A9000	Academic Seminar for International Programs		2-4	6
BM20A1300	Complex Analysis	M.Sc. (Tech.) 1-2	3	3
BM20A2700	Numerical Analysis II	M.Sc. (Tech.) 1	3	3
BM20A2800	Nonlinear Optimization	M.Sc. (Tech.) 1-2	4	4

## Major Subject (60 ECTS cr)

### Environmental Energy Technology

<i>Obligatory Studies (60 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BH60A2200	Air Pollution Control	M.Sc. (Tech.) 1	3-4	3
BH60A2400	Solid Waste Management related to energy production	M.Sc. (Tech.) 2	1-2	4
BH80G0000	Bioenergy	M.Sc. (Tech.) 1	1	3
BH80G0100	Bioenergy Technology Solutions	M.Sc. (Tech.) 1	2-3	6
BH40A1300	Power Engines in Renewable Energy	M.Sc. (Tech.) 2	2	5
BH50A1200	Energy Systems Engineering	M.Sc. (Tech.) 1	1-2	6
BH60A2000	Emission Trading	M.Sc. (Tech.) 1	3-4	3
Thesis	Master's Thesis			30

## Minor Subject (23 ECTS cr)

### Bioenergy Technology

<i>Obligatory Studies (23 ECTS cr)</i>		<i>year</i>	<i>per.</i>	<i>ECTS cr</i>
BH60A1600	Basic Course on Environmental Management and Economics	B.Sc. (Tech.) 2	1-2	5
BH60A2300	Waste Heat Recovery Techniques	M.Sc. (Tech.) 2	3-4	6
BH60A2500	Research Seminar	M.Sc. (Tech.) 2	3-4	2
BH50A1300	Maintenance Management	M.Sc. (Tech.) 2	1-2	4
BH50A1400	Steam Boilers	M.Sc. (Tech.) 1	3-4	6

## Elective Studies

<i>Elective Studies (min. 16 ECTS credits should be selected to attain 120 ECTS credits)</i>		<i>per.</i>	<i>op</i>
FV11A9300	Scientific and Technical English Writing Course	3-4	4
BL30A1200	Numerical Methods in Electromagnetism	3	4
CS10A0300	Business Forecasting	1	4
CS10A0850	Transitional Countries Integration with the European Union - Trade, Manufacturing and Labour Perspective	4	5
CS34A0500	Technology Commercialization and Corporate Venturing	4 int.	5

## The Courses Offered in English

		<i>ECTS cr</i>
BH40A1300	Power Engines in Renewable Energy	5
BH50A1200	Energy Systems Engineering	6
BH50A1300	Maintenance Management	4
BH50A1400	Steam Boilers	6
BH60A1600	Basic Course on Environmental Management and Economics	5
BH60A2000	Emission Trading	3
BH60A2200	Air Pollution Control	3
BH60A2300	Waste Heat Recovery Techniques	6
BH60A2400	Solid Waste Management related to energy production	4
BH60A2500	Research Seminar	2
BH80G0000	Bioenergy	3
BH80G0100	Bioenergy Technology Solutions	6

### Course Descriptions

<b><i>BH40A1300</i></b>	<b><i>POWER ENGINES IN RENEWABLE ENERGY</i></b>	<b><i>5 ECTS cr</i></b>
	<b>Power Engines in Renewable Energy</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Jaakko Larjola Professor, D.Sc. (Tech.) Jari Backman Researcher/Teacher, D.Sc. (Tech.) Teemu Turunen-Saaresti	
<b>Aims</b>	The course gives a comprehensive view on power engines on the market that can be used in bioenergy conversion.	
<b>Contents</b>	Gas turbines, compressors, turbines, fuel cells, reciprocative engines.	
<b>Teaching Methods</b>	Four combined lectures and tutorials, each 4 hours. The students are expected to study the Material Notebook and WebCT in advance to pass the required exercises and quizzes.	
<b>Assessment</b>	0-5. The evaluation is based on the quizzes and final exam, which will be completed in the Exam Aquarium with WebCT. Extra points for approved (50%) performance in the quizzes and exercises.	
<b>Course Material</b>	Material Notebook, WebCT course material: summary, exercises, quizzes.	
<b><i>BH50A1200</i></b>	<b><i>ENERGY SYSTEMS ENGINEERING</i></b>	<b><i>6 ECTS cr</i></b>
	<b>Energy Systems Engineering</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Lasse Koskelainen	
<b>Aims</b>	The course gives a comprehensive view towards different types of energy production processes. The course focuses on life cycle assessment in the planning and implementation phases of energy systems.	
<b>Contents</b>	Fundamentals of engineering thermodynamics. Power plant engineering, combined heat and power production, combustion systems. Fundamentals of steam and gas turbines in power production. Control systems. Cost structure. Environmental impacts. Planning and implementation of energy systems.	
<b>Teaching Methods</b>	Lectures and case exercises 14 h, 1st period, lectures and case exercises 14 h, 2nd period, written assignment, examination.	
<b>Assessment</b>	0-5, written assignment 30%, examination 70%.	

<b>BH50A1300</b>	<b>MAINTENANCE MANAGEMENT</b>	<b>4 ECTS cr</b>
	<b>Maintenance Management</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Lasse Koskelainen	
<b>Aims</b>	The course gives a comprehensive view towards organising, planning and diagnosing maintenance especially in power plants.	
<b>Contents</b>	Terminology. Maintenance strategies and monitoring. Failure mechanisms and reliability. Organisation and functions of maintenance management. Preventive maintenance. Spare part management. Maintenance information systems.	
<b>Teaching Methods</b>	Lectures and case exercises 14 h, 1st period. Lectures and case exercises 6 h, 2nd period. Written assignment.	
<b>Assessment</b>	0-5, written assignment 30%, examination 70%.	
<b>BH50A1400</b>	<b>STEAM BOILERS</b>	<b>6 ECTS cr</b>
	<b>Steam Boilers</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Lasse Koskelainen	
<b>Aims</b>	The course gives a comprehensive view towards steam boilers using different types of fuels. The course concentrates on boilers utilising biofuels.	
<b>Contents</b>	Characteristics of fuels. Combustion and gasification. Design of a steam boiler and its components. Operation and maintenance of boilers: Corrosion, Fouling, Emissions.	
<b>Teaching Methods</b>	Lectures and case exercises 14 h, 3rd period. Lectures and case exercises 14 h, 4th period. Written assignment, examination.	
<b>Assessment</b>	0-5, written assignment 30%, examination 70%.	
<b>BH60A1600</b>	<b>BASIC COURSE ON ENVIRONMENTAL MANAGEMENT AND ECONOMICS</b>	<b>5 ECTS cr</b>
	<b>Basic Course on Environmental Management and Economics</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.), M.Sc. (Tech.) Lassi Linnanen	
<b>Aims</b>	The aim of the course is to introduce students to the challenges that sustainable development poses to business and to the methods that control those challenges.	
<b>Contents</b>	Identifying the influence of sustainable development on business. Identifying corporate stakeholders and their importance. Recognising tools and indicators of environmental management. Knowing the basics of LCA and environmental product design. Recognising eco labels, eco profiles and indicators of environmental load. Knowing the basics of building and maintaining an environmental management system.	
<b>Teaching Methods</b>	Intensive course. Lectures 24 h, written assignment, 1st and/or 2nd period.	
<b>Assessment</b>	Examination, WebCT.	
<b>Course Material</b>	0-5, examination 75%, written assignment 25%. Literature will be announced later.	
<b>BH60A2000</b>	<b>EMISSION TRADING</b>	<b>3 ECTS cr</b>
	<b>Emission Trading</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.), M.Sc. (Tech.) Lassi Linnanen	
<b>Aims</b>	The goal of the course to provide students with the basics of different emission	

<b>Contents</b>	trading schemes and their effects on industry as well as consumers. Topics include: greenhouse effect and climate change, the Kyoto protocol and Kyoto mechanisms, the EU emission trading scheme, the effect of EU emission trading on different industries.
<b>Teaching Methods</b>	Lectures 14 h, 3rd period. Assignment and seminars, 4th period. Examination. WebCT.
<b>Assessment</b>	0-5, examination 100%. An excellent assignment count for additional points for the exam.

<b>BH60A2200</b>	<b>AIR POLLUTION CONTROL</b>	<b>3 ECTS cr</b>
	<b>Air Pollution Control</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Esa Marttila	
<b>Aims</b>	The course gives a comprehensive view towards different types of gas emissions and gas cleaning techniques. Appliance technology, and the design and manufacture of appliances are introduced.	
<b>Contents</b>	Gas emissions from combustion, industry and municipalities. Emission matter collection, treatment and recycling. Cleaning techniques: cyclones, electrostatic precipitators, fabric filters, scrubbers, incinerators, and adsorption.	
<b>Teaching Methods</b>	Lectures 8 h, seminar work and written assignment, written examination.	
<b>Assessment</b>	0-5, 75% exam, 25% seminar work and written assignment.	
<b>Course Material</b>	C. David Cooper, F.C. Alley: Air Pollution Control.	

<b>BH60A2300</b>	<b>WASTE HEAT RECOVERY TECHNIQUES</b>	<b>6 ECTS cr</b>
	<b>Waste Heat Recovery Techniques</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Esa Marttila	
<b>Aims</b>	The course gives a comprehensive view towards different waste heat recovery techniques.	
<b>Contents</b>	Dimensioning the heat recovery heat exchanger. Recuperation ratio of a heat exchanger. Economic optimisation for cross flow gas-to-gas heat exchangers. Optimisation of a heat recovery unit in a ventilation system. Recuperative heat exchangers connected with stream flow.	
<b>Teaching Methods</b>	Lectures 12 h, seminar work, written assignment, written examination.	
<b>Assessment</b>	0-5, 75% exam, 25 % seminar work and written assignment.	
<b>Course Material</b>	Course material will be announced during lectures.	

<b>BH60A2400</b>	<b>SOLID WASTE MANAGEMENT RELATED TO ENERGY PRODUCTION</b>	<b>4 ECTS cr</b>
	<b>Solid Waste Management related to energy production</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Mika Horttanainen	
<b>Aims</b>	The course gives a comprehensive view on the waste-to-energy technologies and utilisation of by-products coming from energy production units.	
<b>Contents</b>	Waste-to-energy in Finland and other countries, properties of waste as a fuel, waste handling before thermal conversion, preparation of recycled fuel, mass combustion of waste, combustion of recycled fuel, gasification of waste, energy recovery in combustion of waste, emission reduction during combustion, flue gas treatment, utilisation and treatment of ash, utilisation and treatment of other flue gas residues, anaerobic digestion of waste, landfill gas utilisation in energy production.	

<b>Teaching Methods</b>	Lectures 14 h, exercises 14 h, 1 practical assignment, examination.
<b>Assessment</b>	Practical assignment 30%, exam 70%.
<b>Course Material</b>	Will be announced later.
<b>Prerequisites</b>	Basic knowledge on thermodynamics, chemistry and power plant technology.
<b><i>BH60A2500</i></b>	<b><i>RESEARCH SEMINAR</i></b> <span style="float: right;"><b><i>2 ECTS cr</i></b></span>
	<b>Research Seminar</b>
<b>Year and Period</b>	M.Sc. (Tech.) 2, Period 3-4
<b>Lecturer(s)</b>	Lecturer(s) responsible: Professor, D.Sc. (Tech.) Esa Marttila
<b>Contents</b>	International students will present and defend their own thesis work, be opponents and follow other presentations.
<b>Teaching Methods</b>	Seminars 8 h, 3rd period (2+3+3), project plan 10 h, prepare for presentation and act as an opponent. Seminars 9 h, 4th period (3+3+3), prepare for presentation and act as an opponent.
<b>Assessment</b>	Pass/fail grade based on participation.
<b><i>BH80G0000</i></b>	<b><i>BIOENERGY</i></b> <span style="float: right;"><b><i>3 ECTS cr</i></b></span>
	<b>Bioenergy</b>
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 1
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Tapio Ranta
<b>Aims</b>	The course gives a comprehensive view into the whole bioenergy chain – biofuel production, refining and end use. Students will gain an overview of the biofuel-based energy systems.
<b>Contents</b>	The role of bioenergy in the EU energy policy, incentive programmes and future plans. Raw-material sources of bioenergy, resources and current use. Biomass supply systems and biofuel refining technologies, logistics and international trade. Quality control and standards. Biogas, solid and liquid biofuels.
<b>Teaching Methods</b>	Lectures 14 h.
<b>Assessment</b>	Written examination.
<b>Course Material</b>	Examination 100%. Energy Visions 2030 for Finland, VTT Energy, 2001. Additional material will be announced later during lectures.
<b><i>BH80G0100</i></b>	<b><i>BIOENERGY TECHNOLOGY SOLUTIONS</i></b> <span style="float: right;"><b><i>6 ECTS cr</i></b></span>
	<b>Bioenergy Technology Solutions</b>
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 2-3
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Tapio Ranta
<b>Aims</b>	The course gives a detailed view into the technological solutions used in the bioenergy sector, the fuel production and bioenergy end-use technologies. Students will learn about the fundamental aspects of the technology for using biofuels in the energy system.
<b>Contents</b>	Technological solutions and case studies from biomass supply and biofuel refining, end-use technologies of biofuels in different sectors.
<b>Teaching Methods</b>	Lectures 14 h, study excursion. Teamwork assignment, seminar presentation. Written examination.
<b>Assessment</b>	Examination 60%, teamwork assignment 40%.
<b>Course Material</b>	Energy Visions 2030 for Finland, VTT Energy, 2001. Additional material will be announced later during lectures.
<b>Prerequisites</b>	BH80G0000 Bioenergy

# 11 Degrees in Business Administration

## General Information

The following lower and higher university degrees can be obtained at the LUT, School of Business:

- Bachelor of Science (Economics and Business Administration) (B.Sc. (Econ. & Bus. Admin.)), workload 180 ECTS credits, duration approximately 3 years (=lower university degree)
- Master of Science (Economics and Business Administration) (M.Sc. (Econ. & Bus. Admin.)), workload 120 ECTS credits, duration approximately 2 years (=higher university degree)

Students complete the Bachelor's degree first and continue then to Master's degree studies.

In Master's degree programmes only the degree of Master of Science (Economics and Business Administration) is completed. Students admitted into Master's degree programmes are selected through a special application system.

Degree studies are completed in accordance with the Government Decree on University Degrees (794/2004) and the LUT Administrative Regulations on Teaching and Studying. The degree entered into force on 1 August 2005 and the LUT Administrative Regulations entered into force on 1<sup>st</sup> January 2007.

## Study Modules

The B.Sc. (Econ. & Bus. Admin.) degree consists of the following study modules: general studies obligatory for all, basic and intermediate studies in the student's major subject, minor studies, language and communication studies and elective studies. Each study module has its own objectives, which determine the different forms of teaching applied.

The M.Sc. (Econ. & Bus. Admin.) degree consists of advanced studies, minor studies, language and communication studies and elective studies.

## General Studies

General studies provide basic, general information regarding the field. They aim at providing an extensive basis for the degree, and the knowledge and skills required for other study modules. General studies are obligatory and required of all students.

## Basic and Intermediate Studies

Basic and intermediate studies develop the student's scientific and professional knowledge and skills and concentrate on disciplines important for the major subject. Intermediate studies in the student's major subject include a Bachelor's thesis (10 ECTS credits) and a related maturity test.

## Advanced Studies

Advanced studies develop previously acquired problem recognition and solving skills by integrating and applying knowledge. The student continues his or her specialisation in selected areas. Advanced studies in the student's major subject include a Master's thesis (30 ECTS credits) and a related maturity test.

## Elective Studies

The degree also includes elective studies. The amount of elective studies depends on the student's individual study plan. Elective studies are included in the Bachelor's and Master's degrees in order to obtain the required 180 and 120 ECTS credits, respectively. Elective studies may include any

university-level courses, e.g. any courses given at LUT, including those in the field of technology or languages.

### **Course**

A course is the basic unit of studies. It is an independent entity with specific learning outcomes. Courses included in the student's major subject are determined on the basis of the objectives and contents of the major subject. A course may include different forms of teaching and studying, such as literature, lectures, assignments, tutorials, independent research and combinations of the above. Courses can be obligatory, optional or elective in accordance with the curriculum.

### **Study Module**

Major or minor subject study modules are composed of courses from one discipline or more. Each study module is on a specific, coherent topic or field.

### **Measurement of Studies**

Studies are measured in credits, which indicate the input required for each course. The average annual workload of a student is 1600 hours of work, which is worth 60 ECTS credits. One credit refers to an average input of 26 hours of work by a student.

## **Major Subjects and Learning Outcomes**

At Lappeenranta University of Technology there are nine major subjects that lead to a Master's degree in Economics and Business Administration:

- Supply Management
- Management and Organizations
- International Marketing
- Accounting
- Finance
- Technology Research
- Knowledge Management
- Business Law
- International Technology and Innovation Management (an international master's degree program)

### **Supply Management**

When modern businesses focus on their core know-how, they acquire more goods from outside and increasingly outsource services. Therefore, the importance of the management of supplies and external resources is emphasized as a success factor.

The aim of Supply Management is to provide students with the basic knowledge and skills required in supply planning and management in companies. The learning outcomes include the ability to manage challenges related to acquisitions in the corporate world. A supply management professional should understand the escalating internationalization and its demands with regard to international trade, and the possibilities opened up by electronic commerce. Flexible businesses that operate in the network economy require a new approach to supply relations. Supply management training provides a basis for logistics and supply management and professional tasks in different businesses in trade and industry and for teaching and research in the field.

### **Management and Organizations**

Management and Organizations provides professional expertise in the management and development of a corporate organization from the human resources viewpoint. The subject especially focuses on human resource management and SME management. Entrepreneurship is also emphasized throughout the studies. In addition, the subject underlines knowledge of

organizational culture and values and its application as well as organizational psychology. Another objective is to give students theoretical and methodological knowledge and skills for research and postgraduate studies and for applying research results to the development of a company's activity.

Students of Management and Organizations find employment in various management tasks, e.g. consulting, which requires an understanding of the overall dynamics of business activity and administration, or management tasks in SMEs. The studies provide information on launching a business and developing internal entrepreneurship in large-scale business organizations. Due to the contents of the studies, employment in tasks requiring expertise in human resources and education is also possible.

### **International Marketing**

The learning outcomes of International Marketing include the ability to work in tasks related to international business. The studies emphasise the marketing of high technology products and industrial products, international experience and extensive language skills. Some of the courses are in English and are sometimes given by international visiting lecturers.

A degree in International Marketing can include minor studies in not only business administration but also e.g. Industrial Engineering and Management or technology. The studies contain a great deal of practical assignments, case work and projects for companies. The curriculum also includes an obligatory student exchange period in one of the university's many cooperation universities abroad. The number of optional courses is rather high, which along with studies abroad contributes to a flexible and diverse study programme.

International Marketing graduates have extensive marketing know-how combined with technological expertise and international experience. Consequently, graduates have good possibilities to find employment in demanding tasks related to marketing and international business. Graduates have traditionally found positions in their own field of expertise.

### **Accounting**

Major studies in Accounting provide students with the skills and knowledge to produce, analyse and utilise financial information needed in decision-making. In their studies, students may focus on management accounting (e.g. cost accounting, investment accounting, budgeting and financial management) or financial reporting (e.g. accounting, financial statement planning and analysis, taxation and auditing). Accounting studies are organized in cooperation with the Department of Industrial Engineering and Management. Minor studies in especially Business Law and Finance support major studies in Accounting. In addition to professional skills, major studies in Accounting provide skills and knowledge required in research and postgraduate studies.

Accounting graduates are usually employed in management positions and tasks requiring expertise in businesses and public organizations. They are often employed as accounting officers, financial directors, controllers, financial managers, management consultants, internal auditors and independent auditors. Those who have carried out their major studies in Accounting may also find work in various educational positions and as independent entrepreneurs in the field.

### **Finance**

Major studies in Finance are a well coordinated combination of courses on corporate finance and investments. Courses on corporate finance include the following issues: corporate finance planning, investment accounting and decision-making, decision-making concerning capital structure and dividends and related effects. Courses on investments deal with e.g. financial markets and their activity, valuation models and processes of securities, management of an investment portfolio, pricing of derivative instruments and risk management.

The learning outcomes of the studies in Finance include sufficient, extensive and practical basic knowledge on all of the areas of finance and the competence for demanding professional tasks in the field in both Finland and abroad. The most potential employers are investment and commercial banks, brokerages, consulting and industrial companies, investment funds and insurance companies

---

and other investment services, general government, businesses involved in trade, and research and education institutes.

### **Technology Research**

Students majoring in Technology Research start by carrying out intermediate studies in economics, where the impact of technological development plays a key role, and proceeding to advanced studies in Technology Research. This degree programme is unique in Finland, and its aim is to provide students with the ability to analyse the impact of technological development on the economy as well as on private companies. Emphasis is on processes through which technological development boosts the productivity of the economy and thereby the well-being of citizens. Special focus is on information as a special production factor and a source of innovation profit. Advanced studies concentrate on the analysis of micro-level mechanisms which help businesses organize their activity with the view to derive the maximum profit from their core know-how.

### **Knowledge Management**

The Master's degree studies in Knowledge Management provide the tools to respond to the challenges of the technological transition and global competition. Converting organizational knowledge and expertise into financial value is considered the most important source of competitive edge. The aim of the Knowledge Management degree programme is to train professionals and leaders who can combine business skills, intellectual capital and information technology into a competitive edge for a company. The studies will also allow students to grasp how human resources can be utilized most efficiently in knowledge-intensive business. Students will also learn about the dynamics of a knowledge-intensive society and the importance of social capital in a global network economy. This degree programme is one of a kind in Finland, and the students will carry out minor studies in both Information Technology and Industrial Engineering and Management.

### **Business Law**

Legislation has become increasingly important in the activity of businesses. The reliable management of legal risks is a prerequisite for efficient and cost-effective business activity.

Business Law covers the areas of law that are the most closely related to the economic activity of a company. The objective of the studies is to teach students to recognise and manage legal risks in business decision-making.

Students are taught to recognize and manage the legal risks involved in decision-making in business, such as concluding agreements, liabilities in a commercial transaction, selecting and using marketing and competition strategies, protecting industrial rights, decision-making and liabilities in different company forms, agreeing on the terms of an employment relationship, the credit and collateral investment functions in a company, and corporate tax planning.

Students majoring in Business Law acquire a solid understanding of the legal basis of a company's activity and the legislative tools for managing and controlling this activity. Minor subjects provide knowledge of the core areas of business administration education, which is a good combination with the extensive knowledge of legal issues acquired in the major subject.

Students who obtain their Master's degree in Business Law have good employment prospects in management positions or tasks requiring expertise in financial administration or human resources or the sales and marketing sector in trade and industry, depending on their minor studies. In addition, combined with certain continuing professional training these studies offer knowledge and skills for tasks that require expertise in auditing. Furthermore, the studies provide a basis for independent entrepreneurship.

## **Master's Degree Program (CBU) in International Technology and Innovation Management (MITIM)**

The new MITIM program is a result of cooperation between two business schools. Lappeenranta University of Technology, School of Business (LSB) and The Graduate School of Management (GSOM) of St. Petersburg State University.

The MITIM program is designed to give future managers the analytical and managerial skills necessary to succeed in the international business field of technology and innovations. Graduates are trained to understand the specifics of international business environments, cross-border movement of goods, people and technology, and the management of technologically oriented organizations in the global markets.

The MITIM program focuses on close cooperation between business education and the business community, integrating knowledge and best practices. All students will receive the unique opportunity to complete their summer internships in leading international technology oriented companies in Russia and Finland.

The program leads to the degree of Master of Science in Economics and Business Administration at Lappeenranta University of Technology, School of Business (LSB) and the degree of Master of Management at St. Petersburg State University, School of Management (GSOM).

### **Internship**

Both the Bachelor's and Master's degree in Economics and Business Administration may include an optional or an obligatory internship worth a maximum of 5 ECTS credits. Two consecutive weeks of internship are worth one credit.

Advanced studies for students majoring in Management and Organizations include an obligatory internship worth 5 ECTS credits. In other major subjects, the internship is included in elective studies.

Before the internship begins, students must contact the professor in charge of the major subject to find out what kind of internship can be included in the degree. After the internship students prepare a report on the internship, what it was like and how it was connected with the studies. The report, an informal application for including the internship in the studies and a work certificate is submitted to the professor in charge of the subject or someone assigned by the professor, who will then decide on the inclusion.

### **Business Administration Degree Structure**

#### **Bachelor of Science (Economics and Business Administration) 180 ECTS credits**

- Compulsory general studies (min. 60 ECTS cr)
- Language and communication studies (16-25 ECTS cr)
- Basic and intermediate studies in the major subject, including a Bachelor's thesis and a related maturity test (min. 60 ECTS cr)
- Minor studies (min. 25 ECTS cr)
- Elective studies (10-19 ECTS cr)

#### **Master of Science (Economics and Business Administration) 120 ECTS credits**

- Advanced studies in the major subject, including a Master's thesis and a related maturity test (min. 60 ECTS cr)
- Language and communication studies (11 ECTS cr)
- Minor studies (min. 25 ECTS cr)
- Elective studies (24 ECTS cr)

---

## Important Information on Preparing an Individual Study Plan

- **Important!** Either the B.Sc. or M.Sc. (Econ. & Bus.Adm.) degree must include one university-level minor subject in economics (= Accounting, Finance, Supply Management, Int. Marketing, Business Law, Management and Organizations, Knowledge Management, Economics, SME Development).
- In a minor subject students must first carry out basic studies before they can take intermediate studies.
- In the B.Sc. (Econ. & Bus.Adm.) degree, part of the general studies will be transferred to the major studies where they will be included in the total number of credits. One course in general studies can only be included in one part of the study plan (e.g. Introduction to Accounting and Finance is transferred to the Accounting study module) This applies also to other studies.
- If you can not otherwise obtain the required number of credits (180/120), you need to include elective studies into your degree (any courses at LUT are acceptable, including language courses). The amount of elective studies depends on your individual study plan.
- Further information on the degree structure is available in Finnish at [http://www.lut.fi/kati/opiskelu\\_ohjeita.php](http://www.lut.fi/kati/opiskelu_ohjeita.php)
- Postgraduate degrees (Licentiate and Doctor of Science (Economics and Business Administration)) can only include courses that have not yet been included in the person's undergraduate degree.

## 12 Master's Degree Program (CBU) in Business and Administration - *International Technology and Innovation Management (MITIM)*

The Master's Degree Program in International Technology and Innovation Management is the result of cooperation between two universities in Finland and Russia: the Graduate School of Management (GSOM) of St. Petersburg State University and Lappeenranta University of Technology's School of Business (LSB).

The Master's degree program titled as "International Technology and Innovation Management", takes two years, corresponds to 120 ECTS credits and leads to the degrees of Master of Science in Economics and Business Administration at LSB and Master of Management at GSOM. Thus students admitted into the program receive a degree certificate from both universities. Three semesters include obligatory lectures and exercises, as well as a summer internship and essay and elective courses. The fourth semester is devoted to the Master's thesis. The language of tuition in the program is English. In the autumn of 2007 students will study at GSOM in St. Petersburg.

### The Degree Structure

#### Master of Science in Economics and Business Administration

General Studies	6	ECTS cr
Major Subject	66	ECTS cr
Minor Subject	30	ECTS cr
Elective Studies	18	ECTS cr
<i>Credits</i>	<i>120 (min.)</i>	<i>ECTS cr</i>

#### Major Subject (66 ECTS cr)

##### International Technology and Innovation Management

## Course Descriptions

<b>AB30A0400</b>	<b>VENTURE CAPITAL AND PRIVATE EQUITY INVESTING</b>	<b>4 ECTS cr</b>
	<b>Venture Capital and Private Equity Investing</b>	
	<b>Lectured intensively every other year. Next time during the academic year 2008-2009. The language of teaching is English.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period Spring	
<b>Lecturer(s)</b>	LL. Lic. Jari Lauriala	
<b>Aims</b>	Lecturer(s) responsible: Professor, D.Sc. (Econ. & Bus. Adm.) Eero Pätäri	
	The objective of the course is to give the participants an understanding of the key areas of VC and PE investing through lectures and real life cases that are solved in small groups and presented and discussed during seminar sessions.	
<b>Contents</b>	The course introduces fund structures (limited partnerships), the investment process, due diligence, valuation, instrumentation of debt and equity, formulating and drafting investment agreements, exit strategy and risk management throughout the investment cycle.	
<b>Teaching Methods</b>	Intensive lecturing 18 h + case exercises. Exam. Elective M.Sc. course in Finance. Elective course in the Master's Degree Programme (CBU) in Business and Administration.	
<b>Assessment</b>	Graded 0–5 on the basis of a written exam and case exercises.	
<b>Course Material</b>	<ol style="list-style-type: none"> <li>Lauriala, Jari: Pääomasijoittaminen, Edita, 2004.</li> <li>Gladstone, David - Gladstone, Laura: Venture Capital Handbook: An Entrepreneur's Guide to Raising Venture Capital, 1988 or newer edition, selected parts.</li> <li>Gladstone, David - Gladstone, Laura: Venture Capital Investing: The Complete Handbook for Investing in Private Businesses for Outstanding Profits, 2003 or newer edition, selected parts.</li> <li>Handouts in the class and all additional material required by the lecturer.</li> </ol>	
<b>Prerequisites</b>	B.Sc. studies in Finance (except Bachelor's thesis).	

<b>AB30A0550</b>	<b>INTERNATIONAL FINANCIAL MANAGEMENT 6 ECTS cr</b>
	<b>International Financial Management</b>
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 3
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Minna Martikainen
<b>Aims</b>	The aim of the course is to provide an analytic framework for understanding how cross-border financing, valuation, risk management, and investment decisions are influenced by a variety of factors including exchange rates, legislation, international tax considerations and country risks. The course provides an understanding of how firms can create, measure, and sustain value across borders.
<b>Contents</b>	The course consists of the four areas of international financial management. The part including currencies and asset prices concentrates on the mechanisms of exchange rates. The area of multinational financial decision making considers several of the central financial decisions multinational firms must make. The part of cross-border valuation and financing considers how the valuation and financing decisions must be modified in a cross-border setting. The Institutions and Finance part discusses investors' behavior and risk management.
<b>Teaching Methods</b>	Lectures 24 h, 3rd period. Course work (Assignment on a topic of mutual agreement which can be written individually or in groups of up to three members). Exam. Obligatory course in the Master's Degree Program (CBU) in Business and Administration. Elective advanced course in Finance.
<b>Assessment</b>	Graded 0–5 based 80% on an exam and 20% on course work.
<b>Course Material</b>	1. Madura, J., International Financial Management, 8th edition, or later version 2. Handouts in the class and all additional material required by the lecturer.
<b>Prerequisites</b>	Compulsory B.Sc. courses in Finance (except Bachelor's thesis)
<b>AB30A0600</b>	<b>EMPIRICAL RESEARCH IN ACCOUNTING AND 7 ECTS cr FINANCE</b>
	<b>Empirical Research in Accounting and Finance</b>
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 3-4
<b>Lecturer(s)</b>	Professor N.N.
<b>Aims</b>	The course has the following three objectives. First, the course provides an overview of recent relevant research issues in accounting and finance, thereby extending and deepening students' knowledge in the area of accounting and finance. The second aim of the course is to get students to think actively and critically about research, and third, the course is intended to prepare students for empirical research in accounting and finance.
<b>Contents</b>	Relevant research issues related to financial reporting; corporate governance; agency relationships; managerial incentive plans; market efficiency; information content of asset prices; accounting, capital markets and financial institutions; international financial markets.
<b>Teaching Methods</b>	Lectures/seminar 21 h. Over the course of the term there will be two to three assignments, such as an article analysis or a referee report. The aim of these assignments is to get students to think actively and critically about research. The main course requirement is to write a term paper from the area of accounting or finance containing at minimum a detailed well-developed research proposal. Elective advanced course in Accounting and in Finance. Elective course in the Master's Degree Programme (CBU) in Business and Administration.
<b>Assessment</b>	Graded 0–5 on the basis of the term paper.
<b>Course Material</b>	There is no textbook. Issues covered in class will be based on research papers and articles.

<b>Prerequisites</b>	Compulsory B.Sc. courses in Accounting or in Finance (except Bachelor's thesis). AB40A0000 Tilastollisen analyysin perusteet (Basic Course in Statistical Analysis Method) and AB40A0100 Monimuuttujamenetelmät (Multivariate Analysis Methods or Ka6710100 Quantitative Research Methods I)
<b>AC40A0100</b>	<b>CROSS-CULTURAL MARKETING STRATEGIES 5 ECTS cr</b>
<b>Year and Period</b>	<b>Cross-Cultural Marketing Strategies</b> B.Sc. (Econ. & Bus. Adm.) 2, Period 2
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Econ. & Bus. Adm.) Liisa-Majja Sainio
<b>Aims</b>	To familiarize the students with the factors in the cultural environment of business and to help them understand how these factors affect international marketing strategies.
<b>Contents</b>	Central concepts in understanding culture and its role in business: dimensions and categorizations of culture, sense of time and space, communication and negotiation styles. Understanding the effects of globalization on culture. Using cultural concepts to analyze how firms adapt their marketing strategies to foreign cultures.
<b>Teaching Methods</b>	10 hours of lectures, group assignments, oral group exam, term paper. Obligatory course in International Marketing basic studies. Elective course in the Master's Degree Programme (CBU) in Business and Administration.
<b>Assessment</b>	0-5, Oral group exam 40%, term paper 40%, case report 20%.
<b>Course Material</b>	1. Selected chapters of Usunier (2000): Marketing Across Cultures, Prentice Hall. 2. Assigned reading.
<b>Prerequisites</b>	AC40A0000 Kansainvälisen markkinoinnin perusteet or Ka6720000 Markkinoinnin ja hankintatoimen perusteet
<b>AC40A0150</b>	<b>INTEGRATED MARKETING COMMUNICATION 5 ECTS cr</b>
	<b>Integrated Marketing Communication</b>
<b>Year and Period</b>	B.Sc. (Econ. & Bus. Adm.) 3, Period 4
<b>Lecturer(s)</b>	Researcher/Teacher, D.Sc. (Econ. & Bus. Adm.) Liisa-Majja Sainio
<b>Aims</b>	To familiarize the student with the concept and process of marketing communication. To give the students basic skills in the design, implementation and management of communication as part of the marketing process.
<b>Contents</b>	The role of marketing communication in the marketing strategy of an enterprise. The concept and implementation of integrated marketing communication. The design, implementation and management of advertising, sales promotion and public relations. The introduction of electronic and print media, media choice, the creative process and execution of a promotion campaign. The services in campaign planning, the advertising business and the advertiser-agency relationship. Legal and ethical issues in advertising. The course focuses especially on mass communication because there is a separate course available in personal selling and sales management.
<b>Teaching Methods</b>	28 hours of lectures, 14 hours of exercises, groupwork and an individual ad analysis report, 4th period. Written exam. Obligatory intermediate course in International Marketing. Elective course in the Master's Degree Programme (CBU) in Business and Administration.
<b>Assessment</b>	0-5, written exam 50%, individual ad analysis 30%, groupwork 20%.
<b>Course Material</b>	1. Percy, Rossiter & Elliott (2001): Strategic Advertising Management, Oxford University Press. 2. Assigned reading.
<b>Prerequisites</b>	AC40A0000 Kansainvälisen markkinoinnin perusteet, CS10A0000 Markkinoinnin peruskurssi or Ka6720000 Markkinoinnin ja hankintatoimen perusteet

<b>AC40A0200</b>	<b>INTERNATIONALIZATION OF THE FIRM</b>	<b>5 ECTS cr</b>
	<b>Internationalization of the Firm</b>	
	<b>All instruction will be in English.</b>	
<b>Year and Period</b>	B.Sc. (Econ. & Bus. Adm.) 3, Period 2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Sami Saarenketo, Doctoral Student, M.Sc. (Econ. & Bus. Adm.) Mika Ruokonen	
<b>Aims</b>	To familiarize the students with the characteristics of the international market environment and theories of internationalization. To provide strategic views on market choice and market entry.	
<b>Contents</b>	Internationalization theories: e.g. the Uppsala model. The Network Model and Born Globals. Growth strategies of the firm. Characteristics and risks of the international economic, political and sociocultural environment. International market selection process and market entry modes. Implementation and coordination of an international marketing program with supporting market research and analyses.	
<b>Teaching Methods</b>	21 hours of lectures and 14 hours of practical exercises. Obligatory intermediate course in International Marketing. Elective course in the Master's Degree Programme (CBU) in Business and Administration.	
<b>Assessment</b>	0-5 Active class participation. Exercises: oral and written project reports (30% of final grade). A written final examination (70% of final grade).	
<b>Course Material</b>	1. Hollensen, S.: Global Marketing – A Decision-oriented approach, 2004. 2. Assigned reading.	
<b>Prerequisites</b>	AC40A0000 Kansainvälisen markkinoinnin perusteet or Ka6720000 Markkinoinnin ja hankintatoimen perusteet. AC40A0050 Vienti- ja tuontitoiminta is recommended.	
<b>AC40A0650</b>	<b>INTERNATIONAL BUSINESS STRATEGIES</b>	<b>5 ECTS cr</b>
	<b>International Business Strategies</b>	
	<b>The course will be lectured for the first time in 2008-2009.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Olli Kuivalainen, Doctoral Student, M.Sc. (Econ. & Bus. Adm.) Anssi Tarkiainen	
<b>Aims</b>	The aim of the course is to familiarize the students with strategic planning for international business in general and the management and execution of international business strategies within the context of multinational corporations in particular. To help the students to develop an understanding of various international or global strategies and their advantages and disadvantages. The assignment aims to expose the students to actual management challenges in an international context.	
<b>Contents</b>	International business planning. International and global business strategies. Strategic tools for analyzing the internal and external environment, for example resource and product positions. Organization of resources and capabilities within a multinational corporation. Implementation of an international business strategy.	
<b>Teaching Methods</b>	14 h of interactive lectures, 1st period. 14 h of interactive lectures, 2nd period. Group assignment/project work. Exam. Obligatory advanced course in International Marketing. Elective course in the Master's Degree Programme (CBU) in Business and Administration.	

<b>Assessment</b>	0-5. Active class participation. Assignment: oral and written project work, 80%. Exam (has to be passed), 20%.
<b>Course Material</b>	Assigned reading.
<b>Prerequisites</b>	Basic understanding of international business.

<b>AC60A0000</b>	<b>CROSS-CULTURAL MANAGEMENT AND CORPORATE SOCIAL RESPONSIBILITY IN THE INFORMATION AGE</b>	<b>6 ECTS cr</b>
	<b>Cross-Cultural Management and Corporate Social Responsibility in the Information Age</b>	
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration. The course will be lectured at GSOM.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Janne Tienari Associate Professor, Dr. Yuri E. Blagov	
<b>Aims</b>	The objective of the course is to present students with a theoretically and practically grounded understanding of how multinational firms operate. The course pays particular attention to questions related to managing and organizing a cross-cultural workforce. Course themes also include presentation skills, ethics and social responsibility, image building, and the use of management consultants in international business.	
<b>Contents</b>	Session (1) Introductions, overview and organization of course work. Working across borders: presentation skills. How multinational firms function. Instructions for teamwork assignment 1. Session (2) Ethics and social responsibility in global business. Teamwork assignment presentations 1. Managing the cross-cultural firm: Image building. Instructions for teamwork assignment 2. Session (3) Ethical and responsible decision-making. Teamwork assignment presentations 2. Managing the cross-cultural firm: When cultures meet. Instructions for reading assignment. Instructions for case assignment. Session (4) Reading assignment seminar. Managing the cross-cultural firm: Using consultants. Session (5) Managing the cross-cultural firm: Focus on Russia and Finland. Session (6) Case assignment presentations. Course summary and preparation for the exam.	
<b>Teaching Methods</b>	Exam. Lectures 6 X 3 hours. Teamwork assignments. Exam. Obligatory course in the Master's Degree Program (CBU) in Business and Administration.	
<b>Assessment</b>	0–5; exam 50% and assignments 50% of course grade.	
<b>Course Material</b>	Available in the first course session.	
<b>Prerequisites</b>	Basic knowledge of management and organizations.	

<b>AC60A0050</b>	<b>KNOWLEDGE MANAGEMENT AS A THEORY AND PRACTICE</b>	<b>6 ECTS cr</b>
	<b>Knowledge Management as a Theory and Practice</b>	
	<b>Only for students of the Master's Degree Program (CBU) in Business and Administration. The course will be lectured at GSOM.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Kirsimarja Blomqvist	

	<p>Professor, D.Sc. (Econ. &amp; Bus. Adm.) Aino Kianto  Assistant Professor, Dr. Tatiana Andreeva  Lecturer(s) responsible: Tatiana Andreeva</p> <p><b>Aims</b>  In modern times, both managers and management theorists are increasingly challenged by the changing circumstances and contexts where the competitive advantage of firms greatly depends on their ability to create and use knowledge.  The aim of the course is to provide students with the understanding of knowledge as an organizational phenomenon and source of competitive advantages for contemporary organizations and to introduce them to key issues of managing knowledge in an organization. The course covers current conceptual frameworks in the field of knowledge management, including notions of knowledge, knowledge economy, the knowledge organization and the knowledge worker, and problems of knowledge creation, sharing and measurement (intellectual capital). Discussing these issues, the course aims to answer the key question: how the company should be organized and managed to be competitive in this knowledge-intensive era.</p> <p><b>Contents</b>  Part I. Introduction to knowledge management (10 h).  Topic 1. Introduction. Basic definitions and concepts (4 h).  The role of knowledge in organizations and society. Knowledge economy, knowledge society, knowledge organizations. Data, information, knowledge and wisdom. Tacit and explicit knowledge. Personal and organizational, internal and external knowledge. Various attributes of knowledge. Controversies and myths about knowledge management.  Topic 2. Knowledge management as a scientific discipline (6 h) (visiting lecturers).  Evolution of KM as a scientific discipline. Theoretical roots and generations of KM. Paradigms and perspectives of KM. Emerging future topics in KM. Knowledge-based view of the firm, its underlying assumptions and implications for management. The role of knowledge and knowledge-based interaction in a firm's competitiveness.  Part II. Managing knowledge in organizations: key challenges (24 h).  Topic 3. Key knowledge-related processes: key concepts and key problems (8 h).  Knowledge creation: stages and tools. SECI model. Improvization as a process of knowledge creation. Knowledge sharing: key barriers and solutions. Knowledge hoarding and motivation for knowledge sharing. Organizational learning and a learning organization. External knowledge acquisition and absorptive capacity.  Topic 4. The human factor in KM (6 h).  Knowledge workers: a new type of employee or just a prestigious title? Specific issues of managing knowledge workers: attraction, motivation, development, retention. Managing knowledge teams. Communities of practice.  Topic 5. Organizational infrastructure for KM (6 h).  Creating a knowledge organization: key tasks. New requirements for organizational leaders. Influence of the organizational structure, communications and culture on knowledge processes. Best practices and failures around the world. Knowledge management and strategy.  Topic 6. Cross-cultural issues in KM (4 h).  Cultural influences on key knowledge-related processes. Revising the SECI model from a cross-cultural point of view. KM in MNCs.  Part III. Finale. Current KM problems in organizations and future research questions (10 h) (visiting lecturers).  Student group project presentations of knowledge management practices in different companies: problem analysis and development of recommendations.  Future research questions and course review.</p> <p><b>Teaching Methods</b>  Lectures 36 h.  Student project 50 h.  Student project presentations 8 h.  Independent work (reading course material) 60 h.  Exam 3 h.</p>
--	---

<b>Assessment</b>	Obligatory course in the Master's Degree Program (CBU) in Business and Administration. Students' work for the course will be assessed on 2 key aspects: group research paper and knowledge of the course topics (exam). The group project will be dedicated to the analysis of knowledge management practices in a particular company. Details of the group project assignment will be provided at the beginning of the course. The exam is a written test. It is based on all course issues and material. The final assessment is composed as follows:
<b>Course Material</b>	<ul style="list-style-type: none"> <li>• Final exam – 60%</li> <li>• Student group project – 40%</li> </ul> Compulsory reading: <ul style="list-style-type: none"> <li>• A selection of up-to-date articles will be provided at the beginning of the course.</li> </ul> Basic textbooks (these books are recommended solely as additional basic reading). <ul style="list-style-type: none"> <li>• Davenport, T. and Prusak, L. Working Knowledge: How Corporations Manage What They Know. Boston: Harvard Business School Press. 1998.</li> <li>• Nonaka, I. and Takeuchi, H. The Knowledge-Creating Company: How Japanese Companies Create the Dynamics of Innovation. Oxford: Oxford University Press. 1995.</li> </ul>
<b>Prerequisites</b>	None.

<b>AC60A0100</b>	<b>QUALITATIVE AND QUANTITATIVE METHODS 6 ECTS cr FOR BUSINESS RESEARCH</b>
	<b>Qualitative and Quantitative Methods for Business Research</b>
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration. Course will be lectured at GSOM.</b>
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1-2
<b>Lecturer(s)</b>	Associate Professor, Dr. Irina Merkuryeva Professor, D.Sc. (Tech.) Kaisu Puumalainen
<b>Aims</b>	The objective of the course is to give the students an understanding of research process and methodology, especially in the context of international business research. The course provides the students with skills in the practical research design, analysis and reporting issues, especially in the context of cross-cultural studies. After the course the students should be able to: <ul style="list-style-type: none"> <li>- understand the meaning of scientific research</li> <li>- write a research proposal</li> <li>- use databases to search for existing publications and empirical data</li> <li>- critically evaluate the research design and results of empirical studies</li> <li>- design an empirical study</li> <li>- evaluate the validity and reliability</li> <li>- recognize the main problems in cross-cultural studies</li> <li>- understand the applicability of the most typical qualitative and quantitative analysis methods</li> </ul>
<b>Contents</b>	1) What is scientific research? Basic issues of the philosophy of science, research process, requirements for a Master's thesis 2) Using databases: finding research publications, introduction of secondary data sources available for SOM and LUT students 3) Qualitative methods 4) Quantitative methods: sampling, collecting secondary data, designing surveys (soliciting responses, analyzing non-response bias, survey data collection methods, questionnaire design, pre-testing, typical problems with survey data), reliability and validity, observational and experimental research designs, overview to the methods of analysis 5) Special challenges and issues in international business research: typical methods applied, main problems, role of culture in research design

<b>Teaching Methods</b>	6) Reporting: Research proposal, conducting a literature review, reporting the methodology, presenting the results Participation in lectures, 30 hours Evaluation of a research proposal and a Master's thesis Written exam based on the lectures and course books Obligatory course in Master's Degree Program (CBU) in Business and Administration.
<b>Assessment</b>	Evaluation of research proposal and master's thesis accepted vs. not accepted Written exam is graded from 0-5. The maximum points in the exam will be 50, and 25 points (50%) are required for passing the exam.
<b>Course Material</b>	1. Kumar, V. (2000) International marketing research. Upper Saddle River, NJ: Prentice-Hall 2. Cooper, D.R. & Schindler, P.S. (2001) Business Research Methods. New York: McGraw-Hill. Parts I – III (Chapters 1-14) 3. A book on qualitative research methods
<b>Prerequisites</b>	None

<b>AC60A0150</b>	<b>STRATEGIC MANAGEMENT OF GROWTH</b>	<b>6 ECTS cr</b>
	<b>Strategic Management of Growth</b>	
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 3	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Timo Pihkala Lecturer(s) responsible: Professor, D.Sc. (Econ. & Bus. Adm.) Timo Pihkala	
<b>Aims</b>	The objective of the course is to provide students with up-to-date insights into business growth strategies and their implications on management and on research. The course deals with the concept of strategy, the models of business growth, the relationship between growth and strategy, the barriers to growth, traditional routes of growth, external growth models and business growth analysis.	
<b>Contents</b>	Objectives of firms. The connection between business growth and strategy. Dimension and directions of growth and development. External growth.	
<b>Teaching Methods</b>	Lectures and assignments 20 h. Exam.	
<b>Assessment</b>	Obligatory course in the Master's Degree Program (CBU) in Business and Administration. 0-5. Assignment 50%, exam 50%.	
<b>Course Material</b>	Articles, lecture notes and material announced during lectures.	
<b>Prerequisites</b>	Introduction to Management	

<b>AC60A0200</b>	<b>SUPPLY AND INNOVATION MANAGEMENT</b>	<b>6 ECTS cr</b>
	<b>Supply and Innovation Management</b>	
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Veli-Matti Virolainen Researcher/Teacher, D.Sc. (Tech.) Jukka Hallikas Professor N.N. (GSOM)	
<b>Aims</b>	The objective of the course is to address the methods and frameworks for analyzing changing business models as a part of enterprise-wide supply and value networks. The aim is to deepen the understanding about the strategic role of supply management. It is designed to meet the requirements for using purchasing and supply management as a source of competitive advantage in organizations.	

<b>Contents</b>	The course examines the structure and role of innovation management in complex supply/demand business systems. The course covers the following topics: inter-firm learning and change management, the principles of systems thinking, methods for assessing customer value, mapping of business processes and value streams, systematic innovation of business models, the role of technology in supply networks, and risk management of supply/demand processes. Purchasing and supply strategy as a part of a business strategy and issues of external resource management are covered during the course.
<b>Teaching Methods</b>	28 h of lectures and exercises in the 3rd and 4th periods. Obligatory course in the Master's Degree Program (CBU) in Business and Administration.
<b>Assessment</b>	Exam 0-5. Approved exercise reports.
<b>Course Material</b>	1. Hughes, J., Ralf, M., and Michels, B.: Transform Your Supply Chain. International Thomson Business Press, 240 p., 1998. 2. Cox, A.: Business Success. Earlsgate Press, 325 p., 1997. 3. Journal articles. Assigned reading (will be announced later).

<b>AC60A0250</b>	<b>INTERNATIONAL HIGH TECHNOLOGY MARKETING</b>	<b>6 ECTS cr</b>
	<b>International High Technology Marketing</b>	
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Sanna-Katriina Asikainen Associate Professor, Dr. Sergey P. Kouchtch Professor, D.Sc. (Econ. & Bus. Adm.) Sami Saarenketo Professor, D.Sc. (Econ. & Bus. Adm.) Olli Kuivalainen	
<b>Aims</b>	The aim of the course is to provide students an understanding of high-technology marketing challenges and opportunities. To help the participants to understand the advantages and limitations of traditional marketing thinking and tools in emergent, international high technology markets. After the course, students will have skills to analyze the market environment and plan and organize marketing activities in international high-technology markets.	
<b>Contents</b>	The course will include lectures, guest lectures, presentations, assignments and discussions on selected topics and practical problems. Current insights into challenges and opportunities in international high technology markets. The concepts of technology and "high-tech". Innovations and new products in high-tech markets. Industry structure, industry changes and marketing implications. Marketing research in international high-tech markets. Partnering. Entry timing. Strategic planning and marketing strategies in international high technology markets. Organizing marketing activities in international high-tech markets.	
<b>Teaching Methods</b>	28 h of interactive lectures, 4th period Active participation. Independent and class assignments, project work. Exam.	
<b>Assessment</b>	Obligatory course in the Master's Degree Program (CBU) in Business and Administration. 0-5. Active class participation and assignments, including project work (40% of the final grade). Written exam (60% of the final grade).	
<b>Course Material</b>	All assignments have to be passed. 1. Mohr, Jakki, Sanjit Sengupta, and Stanley Slater (2005). Marketing of High-Technology Products and Innovations. Second Edition. Pearson Prentice Hall. 2. Assigned reading.	

<b>AC60A0300</b>	<b>ECONOMICS OF INNOVATION AND INTELLECTUAL CAPITAL</b>	<b>6 ECTS cr</b>
	<b>Economics of Innovation and Intellectual Capital</b>	
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Kalevi Kyläheiko Associate Professor, Dr. Vasily K. Dermanov Professor, D.Sc. (Econ. & Bus. Adm.) Ari Jantunen Visiting lecturers	
<b>Aims</b>	To familiarize students with basic concepts of the economics of innovation and intellectual capital, and provide an overview of theoretical perspectives on the economics of information goods, knowledge and innovation.	
<b>Contents</b>	Knowledge-based economy, technological development and productivity, theoretical foundations and contemporary challenges of science and technology policies, innovation and competition, competitiveness of firms, profiting from innovation, pricing information goods, network externalities, economics of intellectual property rights, economics of innovation.	
<b>Teaching Methods</b>	Lectures 28 h, 4th period. Exam. Obligatory course in the Master's Degree Program (CBU) in Business and Administration.	
<b>Assessment</b>	0-5	
<b>Course Material</b>	Assigned literature to be announced later.	
<b>AC60A0350</b>	<b>MULTIVARIATE AND ECONOMETRIC ANALYSIS METHODS</b>	<b>6 ECTS cr</b>
	<b>Multivariate and Econometric Analysis Methods</b>	
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 2, Period 1-2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Tech.) Kaisu Puumalainen	
<b>Aims</b>	The course will familiarize students with basic multivariate and econometric methods of analysis. Empirical cross-sectional, time series and panel data from various fields of economics and business is used, and the students should be able to conduct both descriptive, predictive and explanatory research, and present the results of the analyses.	
<b>Contents</b>	Multiple linear regression analysis, factor analysis, cluster analysis, general linear models. Special issues in regression modeling: dummy variables, non-linear models, simultaneous equations, probit/logit-models, limited dependent variables, instrumental variables. SAS, SPSS and/or E-Views software will be used.	
<b>Teaching Methods</b>	Lectures 21 h, exercises 21 h, 1st–2nd period. Seminars 8 h, 2nd period. Written seminar report and presentation. Elective course in the Master's Degree Program (CBU) in Business and Administration.	
<b>Assessment</b>	0-5 based on seminar work, written report 75%, presentation 25%.	
<b>Course Material</b>	Hair, Joseph Jr. et al.: Multivariate data analysis. Prentice Hall, 1998. Hill, R. Carter – Griffiths, William E. – Judge, George G.: Undergraduate Econometrics, 2nd edition. 2001.	
<b>Prerequisites</b>	Basic courses in statistics and economics.	

<b>AC60A0400</b>	<b>INTERNATIONAL ACCOUNTING AND ANALYSIS</b>	<b>6 ECTS cr</b>
	<b>International Accounting and Analysis</b>	
	<b>To be lectured during the academic year 2008-2009.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 2, Period 1/2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Minna Martikainen Doctoral Student, M.Sc. (Econ. & Bus. Adm.) Sanna Tilli Visiting lecturer	
<b>Aims</b>	The objective of the course is to enrich students' understanding of international accounting and financial reporting. Particular emphasis is on comparative and international aspects of accounting together with financial analysis. The objective of the course is also to instruct students how to interpret financial information and assess the performance and prospects of the firm and how to use financial statement information to prepare a valuation.	
<b>Contents</b>	The course provides students knowledge of the main international differences in financial accounting, harmonization, financial reporting by individual companies, international financial analysis, financial statement analysis, valuation, assessment of accounting quality and the link between accounting and finance.	
<b>Teaching Methods</b>	Lectures 28 h. Term paper, exam. Elective course in the Master's Degree Program (CBU) in Business and Administration.	
<b>Assessment</b>	Graded 0-5 on the basis of the exam (60%) and the term paper (40%).	
<b>Course Material</b>	1. Nobes and Parker: Comparative International Accounting, 2006 2. Penman: Financial Statement Analysis and Security Valuation, 2007	

<b>AC60A5000</b>	<b>MANAGERIAL ECONOMICS</b>	<b>6 ECTS cr</b>
	<b>Managerial Economics</b>	
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration. The course will be lectured at GSOM.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1-2	
<b>Lecturer(s)</b>	Senior Lecturer Ekaterina V. Sokolova Lecturer(s) responsible: Senior Lecturer Ekaterina V. Sokolova	
<b>Aims</b>	The course aims to introduce a practical approach to economics theory. It attempts to bridge the gap between purely analytical problems that intrigue many economic theorists and the day-to-day decisions that managers face. It includes analysis of different tools and approaches for managerial policy-making.	
<b>Contents</b>	The course covers the economic analysis for such concepts as cost, demand, profit, and competition. Students will also examine some theoretical points of industrial innovation and technological change, oligopoly and strategic behaviour, and international competitiveness.	
<b>Teaching Methods</b>	Lectures, discussions, presentations, case studies. Lectures 34 h. Seminars 17 h.	
<b>Assessment</b>	Obligatory course in the Master's Degree Program (CBU) in Business and Administration. Home assignments – 30% Mid-term exam – 10% Final exam – 60%	
<b>Course Material</b>	Nick Wilkinson: Managerial Economics, Cambridge University Press, 2005. E. Mansfield: Managerial Economics; W.W. Norton & Company, 1990.	
<b>Prerequisites</b>	Introductory microeconomics	

<b>AC60A5050</b>	<b>INTERNATIONAL ECONOMICS AND TRADE</b>	<b>6 ECTS cr</b>
	<b>International Economics and Trade</b>	
	<b>Only for the students of the Master's Degree Program (CBU) in Business and Administration. The course will be lectured at GSOM.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1-2	
<b>Lecturer(s)</b>	Associate Professor, Dr. Vasily K. Dermanov Lecturer(s) responsible: Associate Professor, Dr. Vasily K. Dermanov	
<b>Aims</b>	The aim of the course is to provide students with advanced knowledge of the main issues in international economics and trade. They study how countries are integrated in world markets and how their economy is affected by international transactions. Students develop an understanding of the principle frameworks of international trade theory that will help them to analyze a number of real world issues.	
<b>Contents</b>	Every week students attend a lecture (2 hours) and take part in seminar work (2 hours). The course consists of 16 topics covering the issues of comparative advantages, specific factors and income distribution, resources and trade, trade models, economies of scale and imperfect competition, international factor movements, instruments of trade policy, trade policy in developing countries, industrial policy in advanced countries, national income accounting and the balance of payments, exchange rates and the foreign exchange market, the global capital market. The focus is on the international exchange of goods, services and factors of production. Some important aspects of international finance (e.g. exchange rate determination, international debt) are also discussed.	
<b>Teaching Methods</b>	The course is conducted on a lecture-discussion basis. Lectures are supplemented by reading. Students should also read recommended articles and use Internet resources. The seminar format combines case exercises and discussion on readings. Lectures 34 h. Seminars 17 h.	
<b>Assessment</b>	Obligatory course in the Master's Degree Program (CBU) in Business and Administration. Mid-term examination, November. Final written exam, January The mid-term examination test covers the main topics studied during the first part of the course. The final written exam is based on all course issues and materials.	
<b>Course Material</b>	Thomas Pugel, International Economics, 12th ed., 2004	
<b>CS10A0600</b>	<b>DOING BUSINESS IN TRANSITIONAL ECONOMIES</b>	<b>7 ECTS cr</b>
	<b>Doing Business in Transitional Economies, Liiketoiminta siirtymätalouksissa</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1, Period 3-4	
<b>Lecturer(s)</b>	Professor, Ph.D. Tauno Tiusanen Assistant, Anna Karhu	
<b>Aims</b>	Students are able to evaluate the emerging markets and choose the right modes of operations in TEs.	
<b>Contents</b>	Must know: Country profiles of European transitional economies (TEs). The communist legacy in TEs. Macro-economic framework of the transitional process. Post-communist region in the global economy. Risks and opportunities in the TE markets. Investment climate and foreign direct investment in the TEs. Should know: EU's enlargement process.	
<b>Teaching Methods</b>	Lectures 42 h 3. period, exercises 14 h 3. period and 14 h 4. period.	

---

<b>Assessment</b>	0-5, examination 50 %, exercises 25 %, research report 25 %.
<b>Course Material</b>	Lecture handouts. Tiusanen, Tauno: Foreign Investors in Transitional Economies: Cases in Manufacturing and Services, Northern Dimension Research Centre, Publication n:o 27, Lappeenranta University of Technology 2006. Tiusanen Tauno: Transitional Economies and International Competitiveness, Northern Dimension Research Centre, Publication n:o 31, Lappeenranta University of Technology 2006. Tiusanen Tauno: Poland, the Largest New EU Country., Northern Dimension Research Centre, Publication n:o 4, Lappeenranta University of Technology 2004. Tiusanen Tauno: Development of the Russian Rouble - The Crisis of 1998 and Its Aftermath, Northern Dimension Research Centre, Publication n:o 3, Lappeenranta University of Technology 2003.
<b>Prerequisites</b>	CS10A0550 International Business Methods.

---

## 13 The International Business and Technology Management Programme IBTM

IBTM programme is a non-degree programme intended for international exchange and Finnish students. All the courses are taught in English and offered on several aspects of international business, technology management and transitional economies. Students can select the most desirable courses from a total selection of approximately 20 different courses per semester. About 30 ECTS credits represent the workload of a semester. The curriculum is managed by the School of Business, the Department of Industrial Management and the International Services.

The duration of the IBTM programme is one academic year, but a student can choose whether to come for one semester or two semesters.

The deadline for application for the autumn semester / academic year is June 1 and November 1 for the spring semester.

More information on schedule and courses can be found at the following web site:  
[www.lut.fi/exchange](http://www.lut.fi/exchange)

Inquiries should be addressed to the following e-mail address:  
[incomingexchange@lut.fi](mailto:incomingexchange@lut.fi)

### Autumn Semester 2007

#### August 29 – December 21

1<sup>st</sup> period/August 29 - October 26

2<sup>nd</sup> period/October 29 - December 21

#### Orientation Day, August 29

**Course Descriptions for Autumn 2007**

<b>AB30A0200</b>	<b>ASSET PRICING THEORY AND PORTFOLIO MANAGEMENT</b>	<b>7 ECTS cr</b>
	<b>Asset Pricing Theory and Portfolio Management</b>	
	<b>Language of teaching is English</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Mika Vaihekoski	
<b>Aims</b>	This course represents advanced course on asset pricing and portfolio management. The aim is to deepen students' skills and knowledge in asset pricing theory and recent empirical studies.	
<b>Contents</b>	Theoretical and empirical research on asset pricing theory, modern portfolio theory, interest rates, bonds, term structure, portfolio management and behavioral finance.	
<b>Teaching Methods</b>	Lectures/seminar 24 h, 2. period. Exercises 14 h, 2. period. Term paper (In written form, paper is presented by students in the seminar). Home assignments. Exam. Compulsory advanced studies -level course in Finance. WebCT.	
<b>Assessment</b>	Graded 0–5 on the based on 80% exam and 20% term paper. Bonus points available from the home assignments.	
<b>Course Material</b>	1. Elton, Edwin J. et. al.: Modern Portfolio Theory and Investment Analysis, 2003 or newer. Selected parts. 2. Copeland, T., Weston, J. F. - Shastri, K.: Financial Theory and Corporate Policy, 2003 or newer. Selected parts. 3. Handouts in the class and all additional material required by the lecturer.	
<b>Prerequisites</b>	Compulsory B.Sc. courses in Finance (except Bachelor's thesis)	
<b>AB30A0300</b>	<b>INTERNATIONAL FINANCE AND EMERGING MARKETS</b>	<b>5 ECTS cr</b>
	<b>International Finance and Emerging Markets</b>	
	<b>Language of teaching is English.</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 2	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Mika Vaihekoski, visiting lecturers	
<b>Aims</b>	The aim of the course is to introduce international finance theory as well as to deepen student's knowledge of the special issues of corporate finance and asset pricing related to international finance. Furthermore, the course introduces various emerging markets and their special characteristics as well as deepens student's knowledge of the special issues of corporate finance and asset pricing related to emerging markets.	
<b>Contents</b>	Foundations of international finance theory, asset pricing, foreign exchange rates, interest rates, international financial markets. Emerging financial markets. Especially markets in Russia. Recent development and future directions.	
<b>Teaching Methods</b>	Lectures 21 h. Written term paper. Exam. Elective advanced studies -level course in Finance. WebCT.	
<b>Assessment</b>	Graded 0-5 on the basis of the exam 80% and term paper 20%.	
<b>Course Material</b>	1. Literature will be decided later 2. Reading package 3. Handouts in the class and all additional material required by the lecturer.	
<b>Prerequisites</b>	Basic studies in Finance required except Bachelor's thesis.	

<b>AB30A0350</b>	<b>PROJECT WORK IN FINANCE</b>	<b>4 ECTS cr</b>
	<b>Project Work in Finance</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Eero Pätäri	
<b>Aims</b>	To develop student's abilities to apply finance theory in practice to solve problems faced by companies.	
<b>Contents</b>	Learning and understanding client company's financial problem and presenting a solution to the problem.	
<b>Teaching Methods</b>	Written project report (20-30 pages). Students can choose freely the timing of project work. Professor's approval to the subject of the project has to be asked beforehand.	
<b>Assessment</b>	Elective advanced studies -level course in Finance. Graded 0-5 on the basis of written report.	
<b>Prerequisites</b>	B.Sc. studies in Finance (except Bachelor's thesis).	
<b>AB30A0500</b>	<b>FINANCIAL ECONOMETRICS</b>	<b>5 ECTS cr</b>
	<b>Financial Econometrics</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1	
<b>Lecturer(s)</b>	Docent, Ph.D. (Psych) Tomi Seppälä	
<b>Aims</b>	This course deepens students' knowledge on empirical research methods in financial econometrics. The focus is on the empirical techniques used most often in the analysis of financial markets and how they are applied to actual market data.	
<b>Contents</b>	Empirical tests of market efficiency, tests of asset pricing models, event studies, time series models, modeling volatility and correlation, co-integration analysis, maximum likelihood estimation.	
<b>Teaching Methods</b>	Lectures and exercises 24 h, 1. period. Exam.	
<b>Assessment</b>	Elective advanced studies -level course in Finance. Grade 0–5 based on exam 80% and home assignments 20%.	
<b>Course Material</b>	1. Brooks, Chris: Introductory econometrics for finance. Cambridge, 2002 or newer. 2. Other material required by the lecturer.	
<b>Prerequisites</b>	Compulsory B.Sc. courses in Finance (except Bachelor's thesis).	
<b>AC30A6000</b>	<b>ORGANIZATIONAL CULTURE AND GENDER ASPECTS IN MANAGEMENT</b>	<b>5 ECTS cr</b>
	<b>Organizational Culture and Gender Aspects in Management</b>	
	<b>Language of instruction is English</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 2	
<b>Lecturer(s)</b>	Professor, Ph.D. Albert J. Mills, Saint Mary's University, Halifax Professor, D.Sc. (Econ. & Bus. Adm.), B.Soc.Sc. Iiris Aaltio	
<b>Aims</b>	Managers and other experts working in organizations need nowadays skills to work with the multiple questions related to gender equality. The course will provide students with understanding the interrelationships between organizational culture, management, and gendered practices at the workplace. The focus is in the question, how the managers will be able to identify, assess and address the organizational processes that lead to discriminatory outcomes for women and men at work. Organizational cultures with multiple values and practices that both women and men find comfortable to work with are crucial for every modern organization.	
<b>Contents</b>	1. Understanding organizational culture. Its definition, discussion and methods of analysis. 2. Gender and organizational culture. An overview of an organizational culture approach to understanding the development of discriminatory practices of men	

	and women in the corporation. 3. Examination of selected issues to be drawn from corporate image-making, communication, structure, organizational rules, discourse analysis, group dynamics and interpersonal relations, studied in relation to the questions about gendered practices in the organization. 4. Equality practices in Finland. 5. Managing gender at work - issues and debates. Intensive course (November 26 - 30). 24 hours of lectures, case exercises and group work. An important element of the course will involve small groups of 3-4 students analyzing and discussing assigned cases.
<b>Teaching Methods</b>	
<b>Assessment</b>	Graded 0-5 on the basis of active class participation and group reports
<b>Course Material</b>	Articles, book chapters and cases to be specified by the lecturers and read before the course
<b>Prerequisites</b>	Basic courses in Human Resource Management advisable

<b>AC40A0100</b>	<b>CROSS-CULTURAL MARKETING STRATEGIES 5 ECTS cr</b>
	<b>Cross-Cultural Marketing Strategies</b>
<b>Year and Period</b>	B.Sc. (Econ. & Bus. Adm.) 2, Period 2

## Course Descriptions for Spring 2008

<b>AB30A0250</b>	<b>THEORY OF CORPORATE FINANCE</b>	<b>7 ECTS cr</b>
	<b>Theory of Corporate Finance</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Minna Martikainen	
<b>Aims</b>	The course is providing advanced knowledge in the area of corporate finance. Latest relevant research in the area is incorporated taking to account the practical aspects of combining theoretical aspects to practice. Moreover, the focus is also to learn how to deepen the knowledge in some specific area with the help of research articles.	
<b>Contents</b>	Specific issues of corporate finance include dividends, valuation, mergers and acquisitions, listings, IPOs, ownership structures, corporate governance, asymmetric information and international finance.	
<b>Teaching Methods</b>	Lectures/seminar 21 h, 4. period. Term paper (In written form, paper is presented by students in the seminar). Exam.	

<b>Assessment</b>	Compulsory advanced studies -level course in Finance.	
<b>Course Material</b>	Graded 0–5 on the based on 80% exam and 20% term paper 1. Ross, S.A., Westerfield, R.W. – Jaffe, J.: Corporate Finance, 7th edition, selected parts 2. Copeland, T., Weston, J.F. - Shastri, K.: Financial Theory and Corporate Policy, 2003, selected parts. 3. Handouts in the class and all additional material required by the lecturer.	
<b>Prerequisites</b>	Compulsory B.Sc. courses in Finance (except Bachelor's thesis)	
<b>AB30A0350</b>	<b>PROJECT WORK IN FINANCE</b>	<b>4 ECTS cr</b>
	<b>Project Work in Finance</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1-4	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Eero Pätäri	
<b>Aims</b>	To develop student's abilities to apply finance theory in practice to solve problems faced by companies.	
<b>Contents</b>	Learning and understanding client company's financial problem and presenting a solution to the problem.	
<b>Teaching Methods</b>	Written project report (20-30 pages). Students can choose freely the timing of project work. Professor's approval to the subject of the project has to be asked beforehand.	
<b>Assessment</b>	Elective advanced studies -level course in Finance. Graded 0-5 on the basis of written report.	
<b>Prerequisites</b>	B.Sc. studies in Finance (except Bachelor's thesis).	
<b>AB30A0550</b>	<b>INTERNATIONAL FINANCIAL MANAGEMENT</b>	<b>6 ECTS cr</b>
	<b>International Financial Management</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 3	
<b>Lecturer(s)</b>	Professor, D.Sc. (Econ. & Bus. Adm.) Minna Martikainen	
<b>Aims</b>	The aim of the course is to provide an analytic framework for understanding how cross-border financing, valuation, risk management, and investment decisions are influenced by a variety of factors including exchange rates, legislation, international tax considerations and country risks. The course provides an understanding of how firms can create, measure, and sustain value across borders.	
<b>Contents</b>	The course consists of the four areas of international financial management. The part including currencies and asset prices concentrates on the mechanisms of exchange rates. The area of multinational financial decision making considers several of the central financial decisions multinational firms must make. The part of cross-border valuation and financing considers how the valuation and financing decisions must be modified in a cross-border setting. The Institutions and Finance part discusses investors' behavior and risk management.	
<b>Teaching Methods</b>	Lectures 24 h, 3rd period. Course work (Assignment on a topic of mutual agreement which can be written individually or in groups of up to three members). Exam. Obligatory course in the Master's Degree Program (CBU) in Business and Administration. Elective advanced course in Finance.	
<b>Assessment</b>	Graded 0–5 based 80% on an exam and 20% on course work.	
<b>Course Material</b>	1. Madura, J., International Financial Management, 8th edition, or later version 2. Handouts in the class and all additional material required by the lecturer.	
<b>Prerequisites</b>	Compulsory B.Sc. courses in Finance (except Bachelor's thesis)	

<b>AB30A0600</b>	<b>EMPIRICAL RESEARCH IN ACCOUNTING AND 7 ECTS cr FINANCE</b>
	<b>Empirical Research in Accounting and Finance</b>
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 3-4
<b>Lecturer(s)</b>	Professor N.N.
<b>Aims</b>	The course has the following three objectives. First, the course provides an overview of recent relevant research issues in accounting and finance, thereby extending and deepening students' knowledge in the area of accounting and finance. The second aim of the course is to get students to think actively and critically about research, and third, the course is intended to prepare students for empirical research in accounting and finance.
<b>Contents</b>	Relevant research issues related to financial reporting; corporate governance; agency relationships; managerial incentive plans; market efficiency; information content of asset prices; accounting, capital markets and financial institutions; international financial markets.
<b>Teaching Methods</b>	Lectures/seminar 21 h. Over the course of the term there will be two to three assignments, such as an article analysis or a referee report. The aim of these assignments is to get students to think actively and critically about research. The main course requirement is to write a term paper from the area of accounting or finance containing at minimum a detailed well-developed research proposal.
<b>Assessment</b>	Graded 0–5 on the basis of the term paper.
<b>Course Material</b>	There is no textbook. Issues covered in class will be based on research papers and articles.
<b>Prerequisites</b>	Compulsory B.Sc. courses in Accounting or in Finance (except Bachelor's thesis). AB40A0000 Tilastollisen analyysin perusteet (Basic Course in Statistical Analysis Method) and AB40A0100 Monimuuttujamenetelmät (Multivariate Analysis Methods or Ka6710100 Quantitative Research Methods I)
<b>AB40A0500</b>	<b>INNOVATION AND COMPETITIVENESS 5 ECTS cr</b>
	<b>Innovation and Competitiveness</b>
<b>Year and Period</b>	B.Sc. (Econ. & Bus. Adm.) 1-2, Period 3
<b>Lecturer(s)</b>	Ph.D. Hannes Toivanen
<b>Aims</b>	Lecturer(s) responsible: Professor, D.Sc. (Econ. & Bus. Adm.) Ari Jantunen This course explores the relationship between innovation and competitiveness of firms, industries, and nations. Assigned literature, lectures, and class work consider critical issues in competitive strategy and public policy. The course provides an accessible overview of major theoretical perspectives on innovation and key methods employed to measure and assess the impact of innovation.
<b>Contents</b>	What is innovation, the innovation process and firm, industrial organization and innovation, national systems of innovation, measurement of innovation, special aspects of innovation, contemporary challenges of innovation.
<b>Teaching Methods</b>	21 h of lectures. Exam.
<b>Assessment</b>	Obligatory course in Strategy Research subject studies.
<b>Course Material</b>	0-5 Will be announced later, see web-pages.

<b>AC30A6050</b>	<b>SMALL AND MEDIUM SIZE ENTERPRISE MANAGEMENT AND BUSINESS DEVELOPMENT</b>	<b>3 ECTS cr</b>
	<b>Small and Medium Size Enterprise Management and Business Development</b>	
	<b>Language of instruction is English</b>	
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 4

## Course Descriptions

<i>FV11A0200</i>	<i>ACTIVATION OF ENGLISH SKILLS</i>	<i>3 ECTS cr</i>
	<b>Activation of English Skills</b>	
	<b>This course will no longer be accepted as part of the compulsory language requirement. This course will not be taught in the academic year 2007–2008.</b>	
<b>CEF Level</b>	Student entry level: B1 or lower according to the Common European Framework	
<b>Aims</b>	During the course, students will: <ul style="list-style-type: none"> <li>- work on and improve their active listening skills - both listening for general understanding and for specific information,</li> <li>- work on their oral communication skills and coping mechanisms,</li> <li>- work on improving basic writing skills,</li> <li>- work on grammar that causes difficulties,</li> <li>- expand their active vocabulary both in general English as well as in more specific areas, such as business and engineering,</li> <li>- work on pronunciation, both on common problems as well as those specific to the individual.</li> </ul>	
<b>Contents</b>	Using topics that they mainly decide on themselves, students go through a variety of exercises to help them gain confidence in their English skills and to prepare them for self-directed learning, as well as other, more difficult English language courses in the future. Language of instruction: English.	
<b>Teaching Methods</b>	56 hours of contact, with 22 hours required for homework and self-study. Completion of the course will be determined through continuous assessment both in class and through assignments. Thus, a minimum active attendance of 75 percent is required.	
<b>Assessment</b>	This course is open to students from all disciplines. Please note that it will no longer be accepted as part of the compulsory language requirement. Pass/Fail	
<b>Course Material</b>	There is no specific book requirement. There will be various sources of information used including textbooks, the Internet, possibly journals and magazines as well as material provided by the teacher and the students themselves.	
<b>Prerequisites</b>	B1 according to the Common European Framework. Students must assess their level of English before applying for the course using an online diagnostic tool called Dialang. It can be found at <a href="http://www.dialang.org">www.dialang.org</a> . Students who have a B2 or higher are not eligible for this course as a rule.	

<b>FV11A1000</b>	<b>ENGLISH FOR MARKETING</b>	<b>3 ECTS cr</b>
	<b>English for Marketing</b>	
	<b>This course will not be taught in the academic year 2007–2008.</b>	
<b>Lecturer(s)</b>	Paula Haapanen	
<b>CEF Level</b>	Student entry level: B2 level according to the Common European Framework.	
<b>Aims</b>	During the course, students will: <ul style="list-style-type: none"> <li>• work on oral communication, active listening and writing skills</li> <li>• learn phrases to use in more specific scenarios such as negotiations, presentations and customer service,</li> <li>• work towards expanding their marketing vocabulary.</li> </ul>	
<b>Contents</b>	Through role plays, case studies and small group work, students will work towards increasing their oral fluency, written accuracy and active listening ability. Students will also have the opportunity for autonomous study through the group project and self-study exercises meant to help students prepare for discussions and exercises.	
<b>Teaching Methods</b>	The language of instruction is English. 48 contact hours, with at least 30 hours required for homework and self-study. This class is oriented towards students in business and marketing and they will be given priority. If there is space available, students from other disciplines will be welcome.	
<b>Assessment</b>	Pass/Fail. Student marks will be determined through continuous assessment as well as self-assessment. For students to be eligible for this option, they must attend a minimum of 75% of the classes. Students who participate between 50 and 75% of the classes will be eligible to sit the final exam, which is made up of a speaking, listening and writing component.	
<b>Course Material</b>	Materials will be provided by the teacher.	
<b>Prerequisites</b>	B2 level according to the Common European Framework. Students should assess their level of English before the course using an online diagnostic tool called Dialang. It can be found at <a href="http://www.dialang.org">www.dialang.org</a> . Students at levels of B1 and lower should consider independent language work to improve their level to the point that they can participate in the course (B2).	
<b>FV11A2200</b>	<b>TECHNICAL ENGLISH READING COURSE 1</b>	<b>2 ECTS cr</b>
	<b>Technical English Reading Course 1</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 1-3, M.Sc. (Tech.) 1, Period 1, 2, 3, 4	
<b>Lecturer(s)</b>	Jukka Taipale N. N.	
<b>CEF Level</b>	The course will be taught at a B2/B2+ level according to the Common European Framework.	
<b>Aims</b>	By the end of the course, students will be expected to know how to learn and master general technical vocabulary through reading general technical texts and be able to read quickly and effectively.	
<b>Contents</b>	Vocabulary exercises, skimming, scanning and affixes, reading comprehension exercises, individual, pair or group work.	
<b>Teaching Methods</b>	The languages of instruction are both Finnish and English. 28 contact hours, with 24 hours required for homework and self-study. 1st period: group A, 2nd period: group B, 3rd period: groups C and D, 4th period: groups E and F. Attendance: 50% of the lessons. Marks are based on a reading comprehension test (duration 90 minutes). Students must do all the course assignments to be eligible for the examination.	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Provided by the teacher.	
<b>Prerequisites</b>	Students with a matriculation exam grade of A, B, C or a short course in	

	English may enroll for the course. Students who have taken course Technical English Reading Course 2 or Business English Reading Course are not eligible for this course.
--	---

<b>FV11A2400</b>	<b>TECHNICAL ENGLISH READING COURSE 2</b> <b>2 ECTS cr</b>
	<b>Technical English Reading Course 2</b>
	<b>This course will not be taught in the academic year 2007–2008.</b>
<b>Lecturer(s)</b>	Jukka Taipale
<b>CEF Level</b>	The course will be taught at a B2/B2+ level according to the Common European Framework.
<b>Aims</b>	By the end of the course, students will be expected to know how to learn and master different types of text material, to utilise a variety of skills necessary for critical and creative reading, to develop the process of understanding not only what a writer says but why he says it and on what basis.
<b>Contents</b>	General technical reading texts. Activities which require both oral and written work in addition to reading. Vocabulary exercises, skimming, scanning. The languages of instruction are both Finnish and English.
<b>Teaching Methods</b>	28 contact hours, with 24 hours required for homework and self-study. Attendance: 50% of the lessons. Marks are based on a reading comprehension test (duration 90 minutes). Students must do all the course assignments to be eligible for the examination.
<b>Assessment</b>	0–5
<b>Course Material</b>	Provided by the teacher.
<b>Prerequisites</b>	Students with a matriculation exam grade of M, E or L may enroll for the course. Students who have taken course Technical English Reading Course 1 or Business English Reading Course are not eligible for this course.

<b>FV11A2600</b>	<b>BUSINESS ENGLISH READING COURSE</b> <b>2 ECTS cr</b>
	<b>Business English Reading Course</b>
<b>Year and Period</b>	M.Sc. (Econ. & Bus. Adm.) 1, Period 1, 2, 3, 4
<b>Lecturer(s)</b>	Jukka Taipale Part-time Untenured Teacher, N. N.
<b>CEF Level</b>	The course will be taught at a B2/B2+ level according to the Common European Framework.
<b>Aims</b>	By the end of the course, students will be expected to know how to learn and master general business vocabulary through reading general business texts, and to be able to read quickly and effectively.
<b>Contents</b>	Vocabulary exercises, skimming, scanning and affixes, reading comprehension exercises, individual, pair or group work. The languages of instruction are both Finnish and English.
<b>Teaching Methods</b>	28 contact hours, with 24 hours required for homework and self-study. 1st period: group A, 2nd period: group B, 3rd period: groups C and D, 4th period: group E. Attendance: 50% of the lessons. Marks are based on a reading comprehension test (duration 90 minutes). Students must do all the assignments to be eligible for the examination.
<b>Assessment</b>	0–5
<b>Course Material</b>	Provided by the teacher.
<b>Prerequisites</b>	Students who have taken course Technical English Reading Course 1 or Technical English Reading Course 2 are not eligible for this course.

<b>FV11A3200</b>	<b>INFORMATION TECHNOLOGY</b>	<b>2 ECTS cr</b>
	<b>Information Technology</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 2-3, M.Sc. (Tech.) 1-2, B.Sc. (Econ. & Bus. Adm.) 2-3, M.Sc. (Econ. & Bus. Adm.) 1-2, Period 1, 2, 3, 4	
<b>Lecturer(s)</b>	Jukka Taipale	
<b>CEF Level</b>	The course will be taught at a B2/B2+ level according to the Common European Framework.	
<b>Aims</b>	By the end of the course, students will be expected to master the language needed to read and talk about issues connected with information technology and to have learned the study skills needed to follow lectures given in English.	
<b>Contents</b>	The Internet / World Wide Web / Video will be used as a resource. A wide variety of teaching methods will be used, including exercises based on reading, writing, speaking and listening skills. The language of instruction is English.	
<b>Teaching Methods</b>	28 contact hours, with 24 hours required for homework and self-study. 1st period: group A, 2nd period: group B, 3rd period: group C, 4th period: group D. Continuous assessment of the student's participation in class, resulting in an oral mark, and written exercises approved by the teacher.	
<b>Assessment</b>	Attendance: 100% of the lessons.	
<b>Course Material</b>	0–5, oral mark 50%, written exercises 50% Provided by the teacher and the students.	
<b>FV11A4200</b>	<b>WRITING FOR BUSINESS</b>	<b>2 ECTS cr</b>
	<b>Writing for Business</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 1-3, B.Sc. (Econ. & Bus. Adm.) 1-3, Period 1, 2, 3, 4	
<b>Lecturer(s)</b>	Paula Haapanen	
<b>CEF Level</b>	B2 and above	
<b>Aims</b>	By the end of the course, students will be able to: <ul style="list-style-type: none"> <li>• use stock phrases and functional language to help them correspond in a number of professional situations in different registers.</li> <li>• differentiate between formal, less-formal and informal business correspondence.</li> <li>• find sources of reference in connection with writing.</li> <li>• critically read and constructively comment on other students' work through peer review.</li> </ul>	
<b>Contents</b>	Using a variety of sources and scenarios, and with guidance from the teacher, students will help each other to learn how to deal with a wide range of business correspondence: from requests and complaints to internal memos and reports. The language of instruction is English.	
<b>Teaching Methods</b>	This class is based on Web Enhanced Language Learning. The course will mainly use the WebCT platform so that students can share ideas, critique each other's work and receive feedback from the teacher in small groups, which the teacher will assign at the beginning of the course. There will be two face-to-face tutor sessions of 2 hours and they will be used to address problems that students have encountered during individual study and virtual group work. Students will have 4 hours of contact and 48 hours of individual study, virtual group work and peer evaluation. 1st period: Group A 2nd period: Group B 3rd period: Groups C and D 4th period: Groups E and F Students of all disciplines are welcome.	
<b>Assessment</b>	The marks are based on assignments, a portfolio and a learning journal. Pass/Fail. Students will be assessed at the B2 level.	
<b>Course Material</b>	There is no specific book requirement. However, students are advised to obtain	

<b>Prerequisites</b>	Andrew Littlejohn's book Company to Company. B1+ according to the Common European Framework. Students should assess their level of written English before the course using an online diagnostic tool called Dialang. It can be found at <a href="http://www.dialang.org">www.dialang.org</a> . Students with a writing skill level of B1 or lower should consider independent language work to work on basic writing skills and to improve their level to the point that they can participate on the course.
----------------------	---

<b>FV11A4600</b>	<b>ENERGY ISSUES</b>	<b>3 ECTS cr</b>
	<b>Energy Issues</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 2-3, M.Sc. (Tech.) 1-2, B.Sc. (Econ. & Bus. Adm.) 2-3, M.Sc. (Econ. & Bus. Adm.) 1-2, Period 3–4	
<b>Lecturer(s)</b>	Lecturer, Peter Jones	
<b>CEF Level</b>	B2 and above	
<b>Aims</b>	To develop speaking, listening and reading skills based on the theme of energy.	
<b>Contents</b>	Language practice and exercises based on various energy issues – ranging from technological challenges to economic and environmental considerations. Language of instruction: English.	
<b>Teaching Methods</b>	Contact hours: 48 (24+24) Homework 30+ Periods 3–4: Groups A and B Attendance required (75%). Written test and continuous assessment/oral test.	
<b>Assessment</b>	0–5, written test (50%), continuous assessment/oral test (50%)	
<b>Course Material</b>	Provided by the teacher.	

<b>FV11A4900</b>	<b>FINANCIAL ENGLISH</b>	<b>2 ECTS cr</b>
	<b>Financial English</b>	
<b>Year and Period</b>	Period 1, 2	
<b>Lecturer(s)</b>	Lecturer, Peter Jones Lecturer, Timothy Fowler	
<b>CEF Level</b>	B2 and above	
<b>Aims</b>	To improve English skills in the field of financial management.	
<b>Contents</b>	The language of finance, including business finance, taxation, investment etc. Language of instruction: English.	
<b>Teaching Methods</b>	Contact hours: 24 Homework: 15+ Attendance required. Written test. Period 1: Groups A and B Period 2: Groups C, D and E	
<b>Assessment</b>	0–5, written test (100%).	
<b>Course Material</b>	Provided by the teacher.	

<b>FV11A5200</b>	<b>ENGLISH FOR ACADEMIC SEMINARS</b>	<b>3 ECTS cr</b>
	<b>English for Academic Seminars</b>	
	<b>Students who have attended Scientific and Technical Writing Course or Academic Seminar for International Programs are not eligible for this course.</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, M.Sc. (Tech.) 1-2, B.Sc. (Econ. & Bus. Adm.) 3, M.Sc. (Econ. & Bus. Adm.) 1-2, Period 1–2, 3–4	
<b>Lecturer(s)</b>	Lecturer, Timothy Fowler	
<b>CEF Level</b>	B2 and above	
<b>Aims</b>	To learn and practise basic skills needed to research and give an academic seminar in English.	

<b>Contents</b>	Students will study features of English for academic and scientific writing. Students will research and hold a seminar in English.
<b>Teaching Methods</b>	Language of instruction: English. Contact hours: 24 (Period 1 and 3) Homework: 55+ Seminar: (Period 2 and 4) Attendance required (80%). Seminar paper and presentation.
<b>Assessment</b>	Students who have attended Scientific and Technical Writing Course or Academic Seminar for International Programs are not eligible for this course.
<b>Course Material</b>	0–5, seminar paper and presentation (100%). Provided by the teacher.
<b>Prerequisites</b>	The course is primarily meant for students of chemical technology. The course in periods 1–2 is exclusively for those students majoring in applied chemistry. Students of other departments are welcome to apply to the course in periods 3–4.

<b>FV11A5800</b>	<b>ASPECTS OF WORK</b>	<b>3 ECTS cr</b>
	<b>Aspects of Work</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 2-3, M.Sc. (Tech.) 1-2, B.Sc. (Econ. & Bus. Adm.) 2-3, M.Sc. (Econ. & Bus. Adm.) 1-2, Period 1–2, 3–4	
<b>Lecturer(s)</b>	Lecturer, Hwei-Ming Boey Lecturer, Timothy Fowler	
<b>CEF Level</b>	B2 and above	
<b>Aims</b>	<ul style="list-style-type: none"> <li>• To develop the student's speaking, listening and reading skills</li> <li>• To discuss various types of CVs and letters of application</li> </ul>	
<b>Contents</b>	Issues concerning work. Language of instruction: English.	
<b>Teaching Methods</b>	48 contact hours + 30 hours independent study 1st–2nd period (groups A and B), 3rd–4th period (groups C, D and E) 75% attendance required. Tests: 1) A reading comprehension and writing test 2) An oral expression test (Students whose speaking skills can be continuously assessed in class will be exempted from the oral expression test.)	
<b>Assessment</b>	0–5, reading comprehension and writing test 50%, oral expression or continuous assessment 50%.	
<b>Course Material</b>	Provided by the teacher.	

<b>FV11A6200</b>	<b>ENGLISH FOR NEGOTIATING</b>	<b>3 ECTS cr</b>
	<b>English for Negotiating</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 3, M.Sc. (Tech.) 1-2, B.Sc. (Econ. & Bus. Adm.) 3, M.Sc. (Econ. & Bus. Adm.) 1-2, Period 3–4, 5	
<b>Lecturer(s)</b>	Lecturer, Hwei-Ming Boey Lecturer, N. N.	
<b>CEF Level</b>	B2 and above	
<b>Aims</b>	To practise the language needed for participating in negotiations.	
<b>Contents</b>	Discussion and practice of the language for effective negotiating, participation in simulations of negotiations. Language of instruction: English.	
<b>Teaching Methods</b>	48 contact hours + 30 hours independent study 3rd–4th period: groups A and B 5th period: group C (intensive course) Continuous assessment. 80% attendance required.	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Provided by the teacher.	

<b><i>FV11A6500</i></b>	<b><i>PRESENTING IN ENGLISH</i></b>	<b><i>2 ECTS cr</i></b>
	<b>Presenting in English</b>	
	<b>Previously English for Presentations.</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 2-3, M.Sc. (Tech.) 1-2, B.Sc. (Econ. & Bus. Adm.) 2-3, M.Sc. (Econ. & Bus. Adm.) 1-2, Period 1, 2	
<b>Lecturer(s)</b>	Lecturer, Peter Jones	
<b>CEF Level</b>	B2 and above	
<b>Aims</b>	To improve the ability to construct and deliver spoken presentations in English.	
<b>Contents</b>	The language of presentations: <ul style="list-style-type: none"> <li>• Starting a presentation, controlling the flow, the language of diagrams, summing up, handling questions etc.</li> <li>• Delivering presentations in a supportive context.</li> <li>• Analysing one's own performance and establishing areas in need of further development.</li> </ul>	
<b>Teaching Methods</b>	Language of instruction: English. Contact hours: 24 Homework: 25+ Period 1: Groups A and B Period 2: Groups C and D Classroom exercises, presentation practice, and homework. 75% attendance required.	
<b>Assessment</b>	Pass/Fail. Evaluated presentation (100%).	
<b>Course Material</b>	Provided by the teacher.	
<b><i>FV11A7400</i></b>	<b><i>TECHNOLOGY AND THE ENVIRONMENT</i></b>	<b><i>3 ECTS cr</i></b>
	<b>Technology and the Environment</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 2-3, M.Sc. (Tech.) 1-2, B.Sc. (Econ. & Bus. Adm.) 2-3, M.Sc. (Econ. & Bus. Adm.) 1-2, Period 1–2	
<b>Lecturer(s)</b>	Lecturer, Hwei-Ming Boey	
<b>CEF Level</b>	B2 and above	
<b>Aims</b>	To develop the student's speaking, listening and reading skills.	
<b>Contents</b>	Issues concerning the environment. Language of instruction: English.	
<b>Teaching Methods</b>	48 contact hours + 30 hours independent study 1st–2nd period: Groups A and B 75% attendance required.	
<b>Assessment</b>	A listening comprehension and an oral expression test. Students whose speaking skills can be continuously assessed in class will be exempted from the oral expression test.	
<b>Assessment</b>	0–5, listening comprehension 50% of final mark, oral expression/continuous assessment 50%.	
<b>Course Material</b>	Provided by the teacher.	
<b><i>FV11A8500</i></b>	<b><i>MACHINES AND PROCESSES</i></b>	<b><i>3 ECTS cr</i></b>
	<b>Machines and Processes</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 1-3, Period 1–2	
<b>Lecturer(s)</b>	Paula Haapanen	
<b>CEF Level</b>	B2–C1	
<b>Aims</b>	By the end of the course, students will be expected: <ul style="list-style-type: none"> <li>• to describe machines and their functions.</li> <li>• to describe processes.</li> <li>• to identify and construct a classic scientific definition.</li> <li>• to carry out clear and well organized presentations for a variety of stakeholders.</li> </ul>	

<b>Contents</b>	<ul style="list-style-type: none"> <li>• to compile a glossary specific to their fields of study.</li> <li>• to show effective summarizing skills.</li> <li>• to show an improvement in spoken fluency.</li> <li>• to demonstrate ability to actively work in groups.</li> <li>• to show effective critical feedback skills.</li> </ul> <p>Using technically-oriented materials, students will mainly work on their oral communication skills, with some concentration on active listening skills and summary writing skills.</p>
<b>Teaching Methods</b>	48 hours, with at least 30 hours required for homework and self-study. 1st–2nd period: Groups A and B.
<b>Assessment</b>	This class is for students in engineering. If there are spaces available, students from other disciplines are welcome. Pass/Fail will be determined through continuous assessment as well as self-assessment. For students to be eligible for this option, they must attend a minimum of 75% of the classes.
<b>Course Material Prerequisites</b>	Students who participate between 50 and 75% of the classes will be eligible to sit the final exam, which is made up of a speaking (50%), listening (25%) and writing (25%) component. Materials will be provided by the students and the teacher. B2 level according to the Common European Framework. Students must assess their level of English before the course using an online diagnostic tool called Dialang. It can be downloaded at <a href="http://www.dialang.org">www.dialang.org</a> . Alternatively, students can access Dialang in Origo, in Sini and Cosini. Students are also expected to know the following before coming to class: <ul style="list-style-type: none"> <li>• the names of basic shapes and their adjective forms,</li> <li>• how to read numbers and decimals in English.</li> </ul> Self-study materials are available online and in the self-access room (1410B) for review.

<b>FV11A9000</b>	<b>ACADEMIC SEMINAR FOR INTERNATIONAL PROGRAMS</b> <b>6 ECTS cr</b>
<b>Year and Period</b>	<b>Academic Seminar for International Programs</b>
<b>Lecturer(s)</b>	Period 2–4 Lecturer, Barbara Miraftabi Lecturer, Peter Jones
<b>CEF Level</b>	Students should have a B2 or C1 level according to the Common European Framework.
<b>Aims</b>	By the end of the course, students will be able to: <ul style="list-style-type: none"> <li>• demonstrate an ability to take lecture notes</li> <li>• analyze weaknesses in their spoken English</li> <li>• demonstrate skills for participating in seminar discussions</li> <li>• write an acceptable seminar paper</li> <li>• present an oral report on the seminar paper</li> </ul>
<b>Contents</b>	During the second period of the autumn semester, concentration will be on listening and oral skills. Students will work in small groups to critique each other's language skills and help each other to develop. Short presentations will be given to practice presentation skills, and this will be a period with a great deal of independent study. During the third and fourth periods, writing theory will be presented and students will write for peer group review. In order to pass the course, each student must submit a paper written about a subject assigned by a department instructor. After peer review (in order to monitor, critique and support each other's work) and consultation with the writing instructor, the paper may have to be rewritten until grammar, unity, cohesion, etc are acceptable. The course will also include an oral presentation of the paper as if it were to be presented at a conference. The language of instruction and all activities is English.

<b>Teaching Methods</b>	72 hours contact lessons, 84 hours independent study 2nd–4th periods: groups A and B The course is offered once during the academic year for the departmental international master's degree programs. It is wise to remember that attendance is important. Since this is a 6 ECTS course, student responsibility will be noted and a student may fail if not attending the classes regularly.
<b>Assessment</b>	Pass/Fail
<b>Course Material</b>	No required book; handouts from various books, material developed by language teachers, and information on the Internet will all be used.
<b>Prerequisites</b>	Acceptance by a department of LUT into an International Master's Degree program. Students should have a B2 or C1 level according to the Common European Framework.
<b>FV11A9100</b>	<b>GOING INTERNATIONAL AND INTERCULTURAL COMMUNICATION</b> <span style="float: right;"><b>3 ECTS cr</b></span>
	<b>Going International and Intercultural Communication</b>
<b>Year and Period</b>	Period 1–2
<b>Lecturer(s)</b>	Lecturer, Barbara MirafTabi
<b>CEF Level</b>	Teaching level: C2; language will not be taught and students will gain in fluency at B2/C1 levels.
<b>Aims</b>	At the end of the course, a student will be expected: <ul style="list-style-type: none"> <li>• to demonstrate understanding of the concept of culture and how it is learned.</li> <li>• to explain the iceberg analogy of culture in contrast to other analogies of culture.</li> <li>• to demonstrate an ability to use the DIE observation skills model, e.g. with pictures.</li> <li>• to show they can work effectively in small groups.</li> <li>• to show they can risk new behaviour by sharing in large groups.</li> <li>• to explain cultural learning in areas like ideas, sentiments, values, etc by using Finland as an example.</li> <li>• to explain the basic principle of culture related to semiotics.</li> <li>• to put oneself on the Milton Bennett model of intercultural sensitivity chart.</li> </ul>
<b>Contents</b>	Through the principles of experiential learning and general interculturalist theories, students will analyze their own cultures, practise observation of culture by using Finnish situations, and learn more about self as a cultural being. Students will write response papers both individually and in groups regarding different aspects of the course to show a grasp of the principles and self awareness.
<b>Teaching Methods</b>	48 h contact lessons, 30 h independent study and homework. Periods 1–2, groups A and B, taught once in the academic year. NOTE: Although credits/points are given to fulfil language requirements, the course is a content course studying culture and not a language course studying language. The language of instruction and all student activities is English, and many activities will involve students in activities outside of the classroom. Students (with a level of at least B2) from all departments are welcome. Preference will be given to students applying to be exchange students or planning to work abroad. Since experiential learning techniques are important for the course, do not take this course if you plan a lengthy vacation during the class period. Any absence lasting longer than three consecutive class meetings will require additional work on the part of the student.
<b>Assessment</b>	Pass/Fail
<b>Course Material</b>	No required book; handouts will be given and Internet sources used.

<b>FV11A9150</b>	<b>ENGLISH FOR BACHELOR'S THESIS</b>	<b>3 ECTS cr</b>
	<b>English for Bachelor's Thesis</b>	
	<b>The course is aimed only at students of Supply Management and International Marketing doing their bachelor's thesis in English at the Lappeeranta University of Technology, School of Business at the time of the course.</b>	
<b>Year and Period</b>	B.Sc. (Econ. & Bus. Adm.) 3, Period 1–2	
<b>Lecturer(s)</b>	Riitta Gröhn	
<b>CEF Level</b>	teaching level: B2/C1	
<b>Aims</b>	To write a draft of a bachelor's thesis and to present the thesis in the context of the Bachelor's Thesis Seminar.	
<b>Contents</b>	The course is integrated in the bachelor's thesis seminar and consists of two parts: academic writing and oral presentation skills. There will be two lectures, three hours each: a short introduction to academic writing in the beginning and an introduction to presentation skills. Each student will get the support of the teacher during their writing process, as well as feedback and evaluation in the end. The course will also include an oral presentation of the thesis, which will be evaluated by the teacher.	
<b>Teaching Methods</b>	The course is optional and it consists of 6 contact hours, 2 hours of individual tutorials per student and 70 hours of independent work monitored by the teacher. The maximum number of students accepted to the course is 10. In case of more applicants, there will be a selection made according to the criteria based on the individual student's needs.	
<b>Assessment</b>	0–5 is done on the basis of development shown in the writing process and oral presentation skills.	
<b>Course Material</b>	Savage, Alice & Shafiei Masoud. <i>Effective Academic Writing 1</i> . Oxford University Press. Handouts from various sources, including material developed by the teacher.	
<b>FV11A9200</b>	<b>TECHNICAL AND CURRENT ISSUES</b>	<b>2 ECTS cr</b>
	<b>Technical and Current Issues</b>	
<b>Year and Period</b>	B.Sc. (Tech.) 2-3, M.Sc. (Tech.) 1-2, B.Sc. (Econ. & Bus. Adm.) 2-3, M.Sc. (Econ. & Bus. Adm.) 1-2, Period 1–2, 3–4	
<b>Lecturer(s)</b>	Jukka Taipale Lecturer, Timothy Fowler	
<b>CEF Level</b>	Level coming into the course: C1.	
<b>Aims</b>	By the end of the course, students will have increased their fluency in English and improved their understanding of spoken discourse, both technical and general.	
<b>Contents</b>	Language practice and exercises based on audio and video material from a variety of sources concerning topics of interest, both technical and general. Language of instruction: English.	
<b>Teaching Methods</b>	Contact hours: 26 Homework: 25+ 1st–2nd period: Groups A and B 3rd–4th period: Groups C and D Listening comprehension test. Continuous assessment/speaking test. 75% attendance required. Students who have attended the course Current Issues are not eligible for this course.	
<b>Assessment</b>	0–5, listening comprehension test (50%), continuous assessment/speaking test (50%).	
<b>Course Material</b>	Provided by the teacher.	
<b>Prerequisites</b>	Students' spoken ability should be at a C1 level.	

<b>FV11A9300</b>	<b>SCIENTIFIC AND TECHNICAL ENGLISH WRITING COURSE</b>	<b>4 ECTS cr</b>
	<b>Scientific and Technical English Writing Course</b>	
	<b>The course is meant for DI 1–2 NPS students in 2007–2008.</b>	
<b>Year and Period</b>	M.Sc. (Tech.) 1-2, Period 3–4	
<b>Lecturer(s)</b>	Lecturer, Barbara Miraftabi	
<b>CEF Level</b>	By the end of the course, students should be at a C1 level in writing skills.	
<b>Aims</b>	At the end of the course, students will demonstrate their grasp of academic writing theory by: <ul style="list-style-type: none"> <li>• writing a draft of a research paper or some other acceptable paper (related to the fields of study offered at LUT) negotiated with the instructor</li> <li>• presenting the paper orally</li> <li>• rewriting parts of the paper as needed</li> </ul>	
<b>Contents</b>	The draft of the paper must contain acceptable sections as covered in theory classes. Papers may have to be rewritten until grammar, unity, cohesion, etc are acceptable. The course will also include an oral presentation of the paper. The language of instruction is English.	
<b>Teaching Methods</b>	48 hours contact lessons, 56 hours independent study. 3rd–4th period (1 group).	
<b>Assessment</b>	The course is meant for DI 1–2 NPS students in 2007-2008. Students should have a B2 or C1 level of English and some piece of factual material related to their field of study to develop for writing a paper.	
<b>Course Material</b>	Pass/Fail No book required; there will be handouts from various books, including materials developed by the teacher. Information on the Internet will also be referenced.	
<b>Prerequisites</b>	A CEF B2 level in writing and speaking skills.	
<b>FV11A9750</b>	<b>ASPECTS OF CULTURE</b>	<b>3 ECTS cr</b>
	<b>Aspects of Culture</b>	
	<b>This course is for students of the Master's Degree Programme in New Packaging Solutions (KOTE).</b>	
<b>Year and Period</b>	Period 1–2	
<b>Lecturer(s)</b>	Kristiina Karjalainen	
<b>CEF Level</b>	Student level entering the course: B2.	
<b>Aims</b>	At the end of the course students will be expected: <ul style="list-style-type: none"> <li>- to demonstrate understanding of the concept of culture and how it is learned</li> <li>- to explain the iceberg analogy of culture in contrast to other analogies of culture</li> <li>- to demonstrate an ability to use the DIE observation skills model, e.g. with pictures</li> <li>- to explain cultural learning in areas like ideas, sentiments, values, etc by using Finland as an example</li> <li>- to demonstrate understanding of the concepts of intercultural communication</li> <li>- to show they can work effectively in small groups</li> <li>- to adapt some of the learned cultural and intercultural communication concepts in their working life.</li> </ul>	
<b>Contents</b>	Through the principles of experimental learning and general interculturalist theories, students will analyze their own culture, practice observation of culture by using Finnish situations, and learn more about self as a cultural being. Students will write response papers both individually and in groups regarding different aspects of the course to show a grasp of the principles and self awareness.	
<b>Teaching Methods</b>	Language of instruction: English. 27 h contact lessons, 54 h independent study and homework using the WebCT learning management system.	

<b>Assessment</b>	NOTE: Although credits/points are given to fulfill language requirements, the course is a content course studying culture and not a language course studying language. The language of instruction and all student activities is English, and many activities will involve students in activities outside of the classroom. Students also need a working knowledge of basic computer skills, e.g. downloading materials, downloading and listening audiovisual culture lectures, using links, online communication tools etc. Continuous assessment based on 75% attendance, active class participation, the papers, and group and individual presentations. Pass/Fail.
<b>Course Material</b>	Since experimental teaching techniques are important for the course, do not take this course if you plan a lengthy vacation during the class period. Any absence lasting more than 7 hours of class meetings will require additional work on the part of the student. No required book. Course materials consist of downloaded materials from the learning management system (WebCT) and handouts in class.

<b><i>FV12A1200</i></b>	<b><i>GERMAN 1</i></b>	<b><i>3 ECTS cr</i></b>
<b>Year and Period Lecturer(s)</b>	<b>Saksa 1</b> Period 1–2, 3–4 Lecturer, Karita Riekkö Lecturer Sanna Heikkeri (substitute) Lecturer Cornelia Erdmann (substitute)	
<b>CEF Level Aims</b>	Entry level: 0, target level: A1.1 By the end of the course, students are expected <ul style="list-style-type: none"> <li>• to understand spoken language when it is slow, clear and related to topics discussed during the course</li> <li>• to use simple sentences to talk about themselves and their work</li> <li>• to fill out their personal information in a form and write a short and simple text related to topics discussed during the course</li> <li>• to understand key words in a text related to topics discussed during the course</li> <li>• to use polite phrases and expressions typical of the German communication culture</li> </ul>	
<b>Contents</b>	Situations: introducing oneself, studies, tasks and schedules, office, restaurant, family. Structures: verbs in the present tense, negation, word order, the accusative and related prepositions, modal verbs, numerals, personal pronouns. Languages of instruction: German and Finnish.

<b>Prerequisites</b>	Facts about Finland and Germany or equivalent skills.

<b><i>FV12A6200</i></b>	<b><i>LISTENING COMPREHENSION IN GERMAN</i></b>	<b><i>1 ECTS cr</i></b>
<b>Year and Period</b>	<b>Hörkurs Deutsch</b> Period 3	
<b>Lecturer(s)</b>	Lecturer, Jörg Wunderlich	
<b>CEF Level</b>	Entry and target level: B1	
<b>Aims</b>	Students are expected to understand spoken language at a normal pace.	
<b>Contents</b>	Listening comprehension exercises. New vocabulary. Language of instruction: German.	
<b>Teaching Methods</b>	Contact hours: 12, independent work approx. 14 hours. 1st period (1 group). Grade based on continuous assessment and listening comprehension exercises or a listening comprehension test. Continuous assessment requires 75% attendance and active participation.	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Listening comprehension exercises (partly in the WebCT learning environment), material provided by the teacher.	
<b>Prerequisites</b>	Facts about Finland and Germany or equivalent skills.	

<b><i>FV12A6600</i></b>	<b><i>GETTING TO KNOW AUSTRIA AND SWITZERLAND</i></b>	<b><i>2 ECTS cr</i></b>
<b>Year and Period</b>	<b>Die Alpenländer</b> Period 4	
<b>Lecturer(s)</b>	Lecturer, N. N.	
<b>CEF Level</b>	B1	
<b>Aims</b>	To learn about the characteristics of Austria and Switzerland. By the end of the course, students will be able to	
<b>Contents</b>	<ul style="list-style-type: none"> <li>- give a short presentation on one of the topics dealt with in class</li> <li>- recognise differences and similarities between German-speaking countries.</li> </ul> <p>Taking a look behind Austrian and Swiss stereotypes. Learning the essentials of the countries' history, culture, society and business through texts, videos and the Internet. Language of instruction: German.</p>	
<b>Teaching Methods</b>	Contact hours 24, independent work approx. 28 hours. 4th period (1 group). Pair and group work in class, written and spoken assignments. Grade based on successfully completed assignments or a written exam. Continuous assessment requires 75% attendance and active participation.	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Handouts given by the teacher.	
<b>Prerequisites</b>	Facts about Finland and Germany or equivalent skills.	

<b><i>FV12A6800</i></b>	<b><i>GERMAN CULTURE AND HISTORY</i></b>	<b><i>3 ECTS cr</i></b>
	<b>Kultur und Geschichte</b>	
<b>Year and Period</b>	Period 3–4	
<b>Lecturer(s)</b>	Lecturer, Sanna Heikkeri	
<b>CEF Level</b>	B1	
<b>Aims</b>	By the end of the course, students will be able to <ul style="list-style-type: none"> <li>- identify important German personalities from different periods in time and briefly relate what kind of impact they had on culture and society</li> <li>- understand the essential cultural developments in Germany</li> <li>- explain in more detail the developments in Germany after World War II in order to better understand the current societal structure and its main influencing factors</li> <li>- have a discussion in German on important societal and cultural topics and compare the German and Finnish society and culture</li> <li>- critically analyse German literature and movies</li> <li>- independently study texts in German on historical, societal and cultural topics, identify the key information and summarise it in their own words.</li> </ul>	
<b>Contents</b>	A variety of written and spoken assignments related to German culture, history and society, independent and group work, presentations and discussion. Language of instruction: German.	
<b>Teaching Methods</b>	48 contact hours + approx. 30 hours of independent work. Continuous assessment requires 75% attendance and active participation. Grade based on continuous assessment (50%) and presentations and written assignments (50%).	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Material provided by the teacher.	
<b><i>FV12A7000</i></b>	<b><i>INTERCULTURAL GERMAN COURSE</i></b>	<b><i>1 ECTS cr</i></b>
	<b>Interkultureller Kurs</b>	
<b>Year and Period</b>	Period 1–2, 3–4	
<b>Lecturer(s)</b>	Lecturer Sanna Heikkeri (substitute)	
<b>CEF Level</b>	B2	
<b>Aims</b>	By the end of the course, students will be able to <ul style="list-style-type: none"> <li>- easily understand a native German speaker</li> <li>- understand different German dialects</li> <li>- express and explain their opinions in German</li> <li>- talk about Finnish culture and traditions in German</li> <li>- master "small-talk" in German</li> </ul>	
<b>Contents</b>	Topics chosen by the group. Language of instruction: German.	
<b>Teaching Methods</b>	Discussion with both a German native teacher and German exchange students. Contact hours 24 (6 meetings, dates set in the 1st meeting): 1st–2nd period (Group A), 3rd–4th period (Group B). Continuous assessment, requires 75% attendance and active participation.	
<b>Assessment</b>	Pass/fail.	
<b>Prerequisites</b>	Courses at B1 level or equivalent skills.	
<b><i>FV12A7200</i></b>	<b><i>FINNISH INDUSTRY IN GERMAN</i></b>	<b><i>2 ECTS cr</i></b>
	<b>Finnische Industrie</b>	
<b>Year and Period</b>	Period 4	
<b>Lecturer(s)</b>	Lecturer, Jörg Wunderlich	
<b>CEF Level</b>	B1	
<b>Aims</b>	By the end of the course, students will be expected to be able to tell and write	

<b>Contents</b>	about Finnish industry and products. Students are also expected to be able to give a presentation on Finnish industry in German. Exploring material on Finnish industry available in German. The course is suitable for students from any department.
<b>Teaching Methods</b>	Language of instruction: German. Contact hours 24, independent work approx. 28 hours. 4th period (1 group). Continuous assessment requires 75% attendance and active participation.
<b>Assessment</b>	0–5
<b>Course Material</b>	Material provided by the teacher and Finnish company web sites in German.
<b>Prerequisites</b>	Facts about Finland and Germany or equivalent skills.

<b>FV12A7400</b>	<b>GERMAN FOR FOREST INDUSTRY</b>	<b>2 ECTS cr</b>

<b>Assessment</b>	A written examination. 0–5
<b>Course Material</b>	Handouts given in class.
<b>Prerequisites</b>	No previous knowledge of the Finnish language is expected.
<b><i>FV18A9200</i></b>	<b><i>FINNISH FOR FOREIGNERS 2</i></b> <span style="float: right;"><b><i>2 ECTS cr</i></b></span>
<b>Year and Period</b>	<b>Finnish for Foreigners 2</b> Period 2, 4
<b>Lecturer(s)</b>	Lecturer, N. N.
<b>CEF Level</b>	A1.1
<b>Aims</b>	After the course the student is able 1. to communicate orally in very simple everyday situations 2. to understand simple spoken Finnish 3. to read simple texts with the help of a dictionary 4. to write simple sentences in Finnish
<b>Contents</b>	The course will broaden the already learnt grammar and increase the vocabulary (for example expressions).
<b>Teaching Methods</b>	Simple literary texts will be studied both in class and as homework. In the classroom the newly learnt language material will be practiced by means of pair and group work plus other similar activities. Lessons 28, homework 26 hours. Period 2: group A (for the departmental international master's degree programs), group B (for the exchange students) Period 4: Group C
<b>Assessment</b>	A written examination. 0–5
<b>Course Material</b>	Handouts given in class.
<b>Prerequisites</b>	Finnish for Foreigners 1 or corresponding knowledge.

<b><i>FV18A9300</i></b>	<b><i>FINNISH FOR FOREIGNERS 3</i></b>	<b><i>2 ECTS cr</i></b>
	<b>Finnish for Foreigners 3</b>	
<b>Year and Period</b>	Period 3-4	
<b>Lecturer(s)</b>	Lecturer, N. N.	
<b>CEF Level</b>	A1.2	
<b>Aims</b>	After the course the student is able to 1. cope orally also in a simple conversation 2. understand also more advanced Finnish conversations 3. use more grammatical structures, e.g. past tense.	
<b>Contents</b>	The course includes new grammatical topics and gives the students more tools to have a conversation in Finnish. The previously learnt vocabulary will be broadened.	
<b>Teaching Methods</b>	Texts with some new vocabulary and grammatical structures will be studied in class and as homework. Different kinds of spoken situations will be practiced. There will be lectures on grammar as well as different written grammar exercises. Lessons 28, homework 26 hours. A written exam.	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Handouts given in class.	
<b>Prerequisites</b>	Finnish for Foreigners 1 and 2 or corresponding knowledge.	
<b><i>FV18A9800</i></b>	<b><i>GERMAN-FINNISH LINGUAL AND CULTURAL TANDEM</i></b>	<b><i>1 ECTS cr</i></b>
	<b>German-Finnish Lingual and Cultural Tandem</b>	
<b>Year and Period</b>	Period 1, 3	
<b>Lecturer(s)</b>	Lecturer, Karita Riekkö Part-time Untenured Teacher, Elina Häkkinen	
<b>CEF Level</b>	A1–C2	
<b>Aims</b>	By the end of the course - the student will be able to discuss and reflect on cultural aspects between the German and Finnish cultures - it is hoped that the student has developed his/her Finnish language skills.	
<b>Teaching Methods</b>	Contact teaching 4 hours. Work in pairs 24 hours. The course can be completed during either one or two semesters. A learning diary will be required. The teacher will announce the time of the first meeting by e-mail.	
<b>Assessment</b>	Pass/Fail.	
<b><i>FV19A1000</i></b>	<b><i>CHINESE 1</i></b>	<b><i>3 ECTS cr</i></b>
	<b>Chinese 1</b>	
<b>Year and Period</b>	Period 1–2, 3–4	
<b>Lecturer(s)</b>	Matina Ma	
<b>CEF Level</b>	A1.1	
<b>Aims</b>	By the end of the course students will be able • to read and write Chinese phonetics, • to make simple sentences, • to produce simple everyday greetings, • to use a Chinese dictionary.	
<b>Contents</b>	Students will learn Chinese phonetics through speaking and listening in the first period. In the second period, students will work on Chinese characters and develop a basic knowledge of sentence structure. Topics include greetings, numbers and time, introduction of self and family. Language of instruction: English and Chinese.	
<b>Teaching</b>	56 contact hours, meeting three times a week. Each lesson lasts one full hour.	

<b>Methods</b>	1st–2nd period, groups A and B 3rd–4th period, groups C and D 75% attendance and written exams or oral exams are the basis for assessment.
<b>Assessment</b>	0–5
<b>Course Material</b>	Provided by the teacher.
<b>Prerequisites</b>	The course is meant for beginners.

<b>FV19A2000</b>	<b>CHINESE 2</b>	<b>3 ECTS cr</b>
	<b>Chinese 2</b>	
<b>Year and Period</b>	Period 1–2, 3–4	
<b>Lecturer(s)</b>	Matina Ma	
<b>CEF Level</b>	A1.2	
<b>Aims</b>	By the end of the course students will <ul style="list-style-type: none"> <li>• be able to deal with basic modern Chinese grammar,</li> <li>• have the ability to understand and write simple passages,</li> <li>• be able to read Chinese with satisfactory intonation,</li> <li>• be able to understand short dialogues provided that the speakers speak slowly,</li> <li>• be able to speak independently on simple topics.</li> </ul>	
<b>Contents</b>	Topics include traveling and shopping in Chinese communities, personal information and employment, daily schedule, family and interests. Language of instruction: English and Chinese.	
<b>Teaching Methods</b>	56 contact hours, meeting three times a week. Each lesson lasts one full hour. 1st–2nd period (group A), 3rd–4th period (group B). 75% attendance and written exams or oral exams are the basis for assessment.	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Provided by the teacher.	
<b>Prerequisites</b>	Successful completion of FV19A1000 Chinese 1 / Ki7190100 Beginning Chinese 1, or possession of equivalent skill level.	

<b>FV19A3000</b>	<b>CHINESE FOR WORKING LIFE 1</b>	<b>3 ECTS cr</b>
	<b>Chinese for Working Life 1</b>	
<b>Year and Period</b>	Period 1–2, 3–4	
<b>Lecturer(s)</b>	Matina Ma	
<b>CEF Level</b>	A2.1	
<b>Aims</b>	By the end of the course students will <ul style="list-style-type: none"> <li>• be able to read articles on topics dealt with in the course</li> <li>• know essential Chinese modern grammar</li> <li>• be able to exchange ideas with native speakers on topics concerning school and social life provided that the speech is relatively slow and clear</li> <li>• understand some aspects of Chinese culture.</li> </ul>	
<b>Contents</b>	Topics include Chinese table manners, an introduction to business Chinese, a Chinese modern wedding and Finland in Chinese. Language of instruction: English and Chinese.	
<b>Teaching Methods</b>	56 contact hours, meeting three times a week. Each lesson lasts one full hour. 1st–2nd period (group A), 3rd–4th period (group B). 75% attendance and written exams or oral exams are the bases for assessment.	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Provided by the teacher.	
<b>Prerequisites</b>	Successful completion of FV19A2000 Chinese 2 / Ki7190200 Beginning Chinese 2, or possession of equivalent skill level.	

<b>FV19A4000</b>	<b>CHINESE FOR WORKING LIFE 2</b>	<b>3 ECTS cr</b>
	<b>Chinese for Working Life 2</b>	
<b>Year and Period</b>	Period 3–4	
<b>Lecturer(s)</b>	Matina Ma	
<b>CEF Level</b>	A2.2	
<b>Aims</b>	<p>By the end of the course students will</p> <ul style="list-style-type: none"> <li>• have a sufficient command of understanding points of advertisements, short and simple everyday texts from Chinese magazines and newspapers.</li> <li>• be able to communicate with native speakers on topics concerning social life and travel in China.</li> <li>• know essential Chinese modern grammar</li> <li>• be able to write personal letters describing self relevant matters.</li> <li>• further understand some aspects of Chinese culture.</li> </ul>	
<b>Contents</b>	<p>Topics include Chinese communities, cities and local geography, introduction of essential Chinese values, the impact of religion in China.</p> <p>Language of instruction: English and Chinese.</p>	
<b>Teaching Methods</b>	<p>56 contact hours, meeting three times a week. Each lesson lasts one full hour. 3rd–4th period (1 group).</p> <p>75% attendance and written exams or oral exams are the bases for assessment.</p>	
<b>Assessment</b>	0–5	
<b>Course Material</b>	Provided by the teacher.	
<b>Prerequisites</b>	Successful completion of FV19A3000 Chinese Language and Culture 1 / Ki7190300 Beginning Chinese 3, or equivalent knowledge of Chinese.	

## 15 How to Prepare a Master's Thesis in Technology

The following instructions on preparing a Master's thesis, issued by the vice-rector, are observed at Lappeenranta University of Technology. The instructions have been updated on 11 June 2007.

**Faculties may also give their own instructions for the Master's thesis.**

**The Master's thesis is the final project of the Master's degree studies. It demonstrates the student's knowledge of a scientifically or socially important topic related to his or her professional field. It is an advanced research assignment which requires approximately 6 months of work and is worth 30 ECTS credits or 20 credit units in the old degree (for students who complete the old 180-credit unit degree, the thesis is entered into the records in credit units). The student must demonstrate the ability to carry out the project independently and following a plan. The student also takes a maturity test on the topic of the Master's thesis and prepares a written report according to instructions.**

**The Master's thesis can be a collaborative effort of two or more students. In such cases the work of each individual student should be distinguished and evaluated separately.**

### Starting the Work

Students who wish to start working on their Master's thesis should read these instructions carefully and meet with the professor in charge of the field (usually a professor of the student's major subject). The student discusses the topic of the thesis with the professor to make sure it meets the scientific requirements for a Master's thesis.

Especially the following points should be reviewed:

- the prerequisites for starting the Master's thesis (completed studies)
- the topic and objective of the thesis
- the supervising professor
- public access to the thesis
- examiners of the thesis (the supervising professor is always the 1st examiner)
- topic application to the head of the degree programme
- an initial outline of the work
- funding (by the student, a grant or an employer) and
- matters to be discussed with the funding community and the supervisor representing it.

### Topic, Supervisors and Examiners of the Master's Thesis

The Master's thesis is related to the student's major subject and its topic is agreed on by the supervisor and the student together. The student applies for the approval of the Master's thesis topic and the appointment of the supervising professor and examiners from the head of the degree programme. The student's individual study plan is attached to the application. The form is available on the university web site.

The head of the degree programme will appoint an LUT professor or adjunct professor as the supervisor for the thesis. The supervisor must specialise in the student's major subject. The head of the degree programme will also appoint two examiners, the first of which is always the supervising (adjunct) professor. The second examiner can be appointed from outside LUT. If the second examiner is not a professor or an adjunct professor, he/she must have at least a higher university degree.

In addition, the thesis usually has a supervisor who represents the company or university that commissioned the thesis. This supervisor is approved by the supervising professor (1<sup>st</sup> examiner) on signing the application for the topic.

The following requirements for the approval the thesis topic apply to **students who complete the old M.Sc. (Tech.) degree (180 credit units)**:

- a minimum of 140 credit units completed for the degree
- **basic studies completed**
- compulsory internship 6 credit units
- the student must have received a grade of 3 or higher for the intermediate or advanced course related to the research field of the thesis, **or** in the Department of Industrial Management, a grade of 3 or higher for an advanced course in the student's field of specialisation included in the degree.

The following requirements for the approval the thesis topic apply to **students who complete the new M.Sc. (Tech.) degree (120 ECTS credits)**:

- a completed Bachelor's degree (if the student has been admitted to complete both the Bachelor's and Master's degrees)
- possible complementary studies completed (if the student has been admitted to complete only the Master's degree)
- the compulsory internship for the Master's degree completed
- a minimum of 15 ECTS credits of the major studies for the Master's degree completed
- other studies possibly required by the faculty or degree programme.

Applying for Master's thesis work at a company is the student's responsibility. If the student wishes to start preparations for the thesis before the topic is officially approved, this should be discussed with the professor of the major subject (the possible supervisor).

The topic application can be submitted when the required studies are completed and thesis work has been obtained from a company and discussed with the supervising professor.

### **Language of the Master's Thesis**

The Master's thesis is written in Finnish, Swedish or English. The student may, in connection with the topic application, also apply for permission from the head of the degree programme to write it in another language. The author of the thesis is responsible for its the language revision. Students of degree programmes organised in English also write their Master's thesis in English.

### **Employee Inventions**

The research work for a Master's thesis may result in an invention that can be patented or otherwise protected by industrial law. An invention may be a new or improved technical devise or method with industrial or commercial importance.

Inventions must be discussed with all parties involved (the student, supervisors at the university and the commissioning company). Measures should be taken to protect the invention before the thesis is published.

If the invention has ensued under an employment relationship, the Act on the Right in Employee Inventions (656/1967) is applied to the company. If the employment relationship is between the student and a university or higher education institution, the act on the right in employee inventions at higher education institutions (369/2006) is applied to the school.

General patenting legislation is applied to the patenting of an invention, and general copyright legislation to copyright issues unless otherwise agreed by the parties involved (the commissioner, university and student).

Further information is available from the university's research and innovation services.

## Maturity Test

Students must take a written maturity test to demonstrate their language skills and how well they know the topic of their thesis. The maturity test is taken in the language in which the student has received his or her education in Finland. If the student has received his or her education in a language other than Finnish or Swedish, the head of the degree programme determines the language of the maturity test. In such cases only the contents of the maturity test is evaluated, not the language.

If the student has demonstrated his or her Finnish or Swedish skills in connection with the Bachelor's degree or another previous university degree, only the content of the maturity test will be evaluated, and the head of the degree programme may decide to allow the student to substitute the presentation given in the Master's degree seminar for the maturity test. Degree programmes may also have other ways of substituting the maturity test.

If a student has not passed the maturity test in the Bachelor's degree or in another previous university degree (or if the student completes the 180-credit unit Master's degree in accordance with the old degree structure), he or she must take a supervised maturity test. No reference material is allowed and both the contents and language will be evaluated. The contents will be assessed by the 1<sup>st</sup> examiner of the Master's thesis and the language will be evaluated by a language consultant assigned by the university.

The maturity test is evaluated pass/fail.

Details are also available from the Language Centre study guide, the faculty study guidance staff and the university web site.

## Examination and Evaluation of the Master's Thesis

The faculty council will assess the thesis. The assessment is based on the thesis itself and on the examiners' statement. Students must apply for the assessment.

The student provides the examiners each with their own, bound copy. In addition, the student leaves the assessment application, abstracts in Finnish and English and a third bound copy of the Master's thesis with the faculty's administrative staff. Foreign students do not need to prepare an abstract in Finnish. **The faculty decides on the meeting dates and deadlines, by which the student must submit the above-mentioned material to the examiners and faculty administration.**

The examiners prepare a written statement on the thesis along with a grade proposal to the faculty council. If the thesis was a group project, separate statements and grade proposals are given for the sections prepared by each individual student. The statement must individually examine the following points on which the faculty council bases its assessment:

- the theoretical and/or practical results of the work
- originality
- coherence and careful preparation of the text
- language

In addition, the examiners or the faculty may specify other aspects considered in the evaluation.

Master's theses are graded on the following scale:

- excellent (5)
- very good (4)
- good (3)
- very satisfactory (2)
- satisfactory (1).

The title and grade of the thesis are shown in the degree certificate. The grade of the Master's thesis does not affect the overall grade of the degree.

If a student is not satisfied with the evaluation, he or she may leave a request for correction with the faculty council within 14 days of the day the grade was made known. The request for correction should be addressed to the faculty council in question and submitted in writing to the faculty's study affairs administration. Students must submit the request in writing within 14 days of the day the grade was made known. They also have the right to find out why they were given the grade.

Students who are dissatisfied with the decision may bring the matter before the degree board within 14 days of having been informed of the decision. A request addressed to the degree board in writing is to be submitted to the Student Affairs Office.

The faculty council may require that the author of the Master's thesis give a brief (approx. 20 min.) public presentation on the thesis.

## **Public Access to the Master's thesis**

Master's theses submitted to the university for examination are normally public documents.

This must be mentioned to the commissioner when the topic of the thesis is first discussed. If the thesis includes information which the commissioner considers confidential, the university may agree to hold the thesis **confidential for a maximum of two years**. In such cases, the commissioner must provide the university in writing with the reasons for confidentiality.

If the commissioner requires a period of confidentiality which is longer than two years, a version excluding the confidential information must be submitted for publication.

The supervising professor of the thesis must see to it that the commissioner is aware of the restrictions to confidentiality in the very beginning of the discussions.

Confidential theses are handled in the faculty council meeting following normal procedure.

If the thesis includes a public part and a confidential part, both are discussed in the faculty council meeting. The public version of the Master's thesis must mention that the thesis also includes a confidential part.

Faculty council members are liable for keeping the information confidential, and the agenda and minutes of the meeting are not to include anything in violation of this confidentiality. The period of confidentiality shall be mentioned in the minutes of the meeting.

The faculty sees to it that students are aware of the maximum period of confidentiality.

### **Notice of Confidentiality**

If the thesis includes confidential information (held confidential for a maximum of two years), the commissioner of the thesis must submit a written notification of the extent of the confidential information, the reasons for confidentiality and the time the information is to be held confidential (usually in full years). The student is responsible for forwarding the notice to the faculty's study affairs administration. The notice is submitted along with the assessment application, at the latest.

The Master's thesis will include the mention "Confidential" and the date the confidentiality expires.

## **Writing a Thesis**

The Master's thesis is a written report on the research work involved, presenting the stages of the work, the methods, results and explanations. The format of the thesis is based on commonly applied

Finnish standards and guides (e.g. Tirronen K., 1987). In accordance with these instructions, the following format is applied at Lappeenranta University of Technology:

### Covers and Layout

The Master's thesis is bound in black, hard covers, size A4.

On the front cover, printed in gold (*painokulta*), font Times or equivalent:

- MASTER'S THESIS (centred, bottom margin 200 mm, font size 44pt) and
- Author's name and year of publication (lower right-hand corner, bottom and right margin 30-35 mm, font size 22 pt).

Another alternative is the cover recommended by LUT's publication committee, including the university's logo in gold in the upper left-hand corner. Further instructions on the cover format recommended by the publication committee are available on the university web site.

On the spine, printed in gold (*painokulta*), font Times or equivalent:

- MASTER'S THESIS (left alignment, left margin 40 mm)
- Author's name
- Year of publication (right alignment, right margin 30 mm)

The thesis is printed on standard A4 paper sheets. It can be printed on both sides of the paper or on one side only. In a bound thesis the left margin is 35-50 mm. The upper margin is 30-35 mm and the right margin approximately 22 mm. The recommended line spacing is 1.5. If the paper is double-sided, you should remember that odd and even pages have different margins. Each paragraph is aligned to the left, there are no indentations and there is an empty line between paragraphs. For a neat layout, try justified alignment. The margins also apply to appendices; especially the left one is important in book binding.

If drawings are an essential part of the thesis but need not be included in the bound copy, the originals or photocopies of them are enclosed in a separate A4-sized folder.

If the thesis was a group project, the contributions of each student are bound together in order of content. Each part must contain the author's name and a list of references. The common table of contents must indicate the author of each part. Otherwise, the general guidelines apply also to a group project.

### Title and Title Page

The title of the Master's thesis is either the one approved along with the topic, or modified from it. Modifications to the originally approved title are minor details and agreed on with the supervising professor. The title must be well-defined and correspond to the content of the thesis. A key word, which expresses something essential about the thesis and has an explicit and specific meaning, is recommended as the first word. Examples of inappropriate key words: some, review, method, report, study, equipment etc. Abbreviations are not allowed.

Examples of titles:

- Torsion Control in a Permanent Magnetic Synchronous Motor
- Bleaching Plant Waste Water Treatment in the Sulphate Cellulose Process

The title page is the first, unnumbered page of the thesis. **The faculty decides on the information presented on the title page. However, the following is always included:**

- university, faculty, degree programme
- title of the thesis
- examiners and supervisors of the thesis
- date and signature of the author
- author's address and telephone number

The points above are not to be used as headings on the title page, e.g. "University: Lappeenranta University of Technology" is incorrect, but "Lappeenranta University of Technology, Faculty of Technology" is correct. The layout of the title page should be balanced, such as in assignment reports.

### Abstracts in Finnish and English

The abstract is a concise (one A4 sheet), independent summary of the Master's thesis. It should be intelligible as such, without the original document. The abstract presents the key contents and relevance of the thesis. It is written in Finnish and English. Foreign students may write the thesis in English only.

A good abstract is written in complete and concise sentences. The author does not express his or her opinions, but describes the thesis as would an outside reporter. No direct references are made to the original text. The abstract should fit on one A4 paper sheet.

The complete identification information should be included in the beginning of both the Finnish and the English abstract.

Finnish abstract:

#### **TIIVISTELMÄ (in bold font)**

**In addition to these general instructions, the faculties may give further guidelines on e.g. the layout of the abstract (e.g. students may need to fill out a form).**

The abstracts are to be attached to the assessment application, and they will be forwarded to the LUT library by the faculty study affairs staff. The author sends electronic copies of the abstracts to the LUT library. Further instructions and information on the electronic copies of the abstract are available at the LUT library and its web site.

The abstract is a public document, and therefore all confidential information must be excluded from it.

### Table of Contents

The table of contents lists all of the headings and their page numbers in chronological order. The pages are numbered in Arabic numerals starting from the table of contents. A separate list of figures and tables can be included at the end of the table of contents.

Decimals and indentations are used in the table of contents – as well as in the headings in the text – according to the following example. If variables need to be used in the first-level headings, they are to be written out as they are in equations. In such cases the author and the supervising professor

may decide on the most appropriate way to present the headings in order to obtain a neat and legible layout.

### List of Symbols and Abbreviations (if Needed)

Symbols, abbreviations and terms which are not common knowledge are listed in alphabetical order along with their definitions and arranged in groups: e.g. first Roman symbols, then Greek ones and finally abbreviations. The list of symbols and abbreviations is placed immediately after the table of contents.

### Foreword or Acknowledgments (Optional)

In the foreword, the author acknowledges the contribution to the research work made by the examiners and supervisors as well as any help, guidance, advice etc. received from outsiders. The author may also thank sponsors for their financial support and guidance. He or she concludes the foreword by dating and signing it.

### Introduction

The actual research report is opened with an introduction. The purpose of the introduction is to introduce the topic and awaken the reader's interest. The introduction contains a brief presentation of the background, extent and objectives of the research and its relation to other studies and literature in the field. It also describes the key points of the research report. It does not, however, include detailed descriptions of the theory, methods or results.

### Discussion

The discussion is divided into chapters with headings that depict the organisation of the thesis (in exactly the same form as in the table of contents). In this section, the author relates all of the material he or she wishes in reply to the research questions posed, as well as the conclusions based on the material. The discussion must be drawn up in such a way that a professional in the field can repeat the research work e.g. to check the equations, expressions, measurements, calculations or results and conclusions.

The language of the thesis must be grammatically correct and the expression coherent, accurate and concise. The topic must be presented to the reader unequivocally, intelligibly and consistently. The style must be academic and the technical terminology established. In particular, the use of

foreign words should be avoided. They should be replaced with paraphrases or expressions in the language of the thesis.

The presentation and organisation are determined by the topic. A typical way to organise the thesis is to first discuss the material and theory, followed by the methods and finally the conclusions.

In order for the observations to be of use to others, the stages of the research work must be presented in complete and the results of the observations in their original form in tables etc. Long sequences of equations and programming code are appended with headings. It is not necessary to show the derivation of the equations quoted, although the author must make sure the equations are presented correctly. However, the derivation of new expressions and equations introduced in the thesis must be shown, at least in outline.

Equations must be written clearly, each on their own line so that they are separated from the text. They may, for instance, be indented. Equations are numbered either consecutively or by chapter. The number is written in parentheses on the right-hand side of the column. References to an equation can be made only after it has been presented, with certain exceptions. Figures and tables are captioned and numbered similarly to equations. Figures and tables have to be referred to in the text, preferably before they are introduced. The captions of tables are placed above the table and those of figures below the figure. Figures and tables are not to include foreign words.

In mathematical presentation, the author must use standard symbols if such exist and if not, other established symbols. In the absence of established symbols the author may create new ones. The name of a unit symbol, e.g. the electric charge  $Q$ , must be mentioned when it is first introduced in the text and repeated when needed. Standard conventions must be followed when marking variables. For instance, variables in equations, charts and figures are *written in italics*, **vectors in bold italics** (or in italics and topped with an arrow,  $\vec{E}$ ). Subscripts and superscripts or numbers are not italicised, unless they refer to a variable. An example of the correct use of subscripts and variables: There is a relationship between the electric field strength  $E_1$  and the electric flux density  $D_1$ , which depends on permittivity  $\epsilon$

$$D_1 = \epsilon E_1.$$

Mathematical functions and operators are written in normal text type (sin, log, lim, etc.).

Matrices can be handled as regular variables. Equations can be used as parts of sentences with normal punctuation. Punctuation marks are placed immediately after the equation, not its number. Standardised graphic symbols are used in drawings and graphs. Their figures and variables are expressed in the same way as in equations.

### Discussion and Conclusions

Depending on the nature and scope of the study, the report ends either with the chapter "Conclusions", or two separate chapters, e.g. "Discussion" and "Conclusions". The discussion demonstrates e.g. the agreement of the theory and empirical results and what causes it. The need for further research and possible practical applications may also be argued here. The conclusions consist mainly of the final results, what the author has discovered through the research and how they relate to issues discussed in literature. The results should be compared to those previously published in the field.

### References in the Text and List of References

The purpose of a reference is to provide sufficient information on a source used in the study that allows the source to be identified and obtained, if necessary. References should be made to the original sources to avoid possible misinterpretations and misprints appearing in second-hand citations. References are usually made in accordance with the author-date system (the so-called Harvard system) and the numbered referencing system. The student should consult the supervising professor when deciding which system to use.

In the author-date system (the Harvard system) the reference list is alphabetised according to the first author of the source. If several sources by the same author or group of authors are referenced, they are listed in order of publication. When referencing several sources published by an author

within the same year, they are distinguished from each other with a lower case letter after the publication year (1999a, 1999b etc.). If the author is unknown, the abbreviation Anon. can be used instead of the author's name. Alternatively, the name of the publication can be used as the reference.

In the numbered referencing system, the references are listed in the order they appear in the text. The list is numbered consecutively.

Also unpublished reference material and important oral communications must be listed. The reference list must also indicate where rare and less known sources are available.

Electronic sources are referred to according to the SFS 5831 standard. Further information is available on the library web site [www.lut.fi/fi/kirjasto](http://www.lut.fi/fi/kirjasto), in the library's SFS standard collection and from the library administrators. Electronic documents should be referenced only if no other original source exists.

Detailed instructions on the Harvard and numbering systems are available in literature (e.g. Nykänen O., 2002, pp. 76-110).

### Appendices

Supplementary information, such as figures, tables, software code and mathematical derivations, should be appended.

The heading of an appendix is written at the top of the page.

Appendices are numbered. If the number is positioned in the upper right-hand corner of the page, Roman numerals are used (Appendix I, Appendix II). If the number is placed before the heading, Arabic numerals are used (Appendix 1. Heading, Appendix 2. Heading). If the appendix consists of several pages, the pages are marked as follows:

An example of the correct use of subscripts and variables: 1                      Appendix I, 1  
Appendix I, 2 etc.

An example of the correct use of subscripts and variables: 2                      Appendix 1. Heading

- (continued on page x) is written at the bottom of the page
- (Appendix 1 continued) is written in the upper right-hand corner of the following page.

Appendix pages are not numbered.

## Useful Sources for the Author of a Master's Thesis

### Literature

## 16 How to Prepare a Master's Thesis in Business Administration

*The following instructions on preparing a Master's thesis, issued by the vice-rector on 23 May 2007, are observed at Lappeenranta University of Technology.*

The Master's thesis is the final project of the Master's degree studies. It demonstrates the student's knowledge of a scientifically or socially important topic related to his or her professional field. It is an advanced research assignment including a seminar which requires approximately 6 months of full-time work and is worth 30 ECTS credits, or 20 credit units in the old degree (for students who complete the old 160-credit unit degree, the thesis is entered into the records in credit units). The student must demonstrate the ability to carry out the project independently and following a plan. The student also takes a maturity test on the topic of the Master's thesis and prepares a written report according to instructions.

### Starting the Master's Thesis

Students who are starting their Master's thesis should read these instructions carefully and meet with the professor in charge of the field (usually a professor of the student's major subject). The student discusses the topic of the thesis with the professor to make sure it meets the scientific requirements for a Master's thesis.

Especially the following points should be reviewed:

- the prerequisites for starting the Master's thesis (completed studies)
- the topic and objective of the thesis
- supervisor of the Master's thesis
- publicity of the study
- examiners of the thesis (the supervising professor is the first examiner)
- submitting an application for the approval of the topic to the department's study coordinator
- an initial outline of the work
- funding (by the student, a grant or an employer)
- matters to be discussed with the funding community and the supervisor representing it.

### General Comments

The aim of the advanced research seminar is to introduce students to the basics of business research and help them complete their thesis.

The seminar is completed in the second year of the Master's degree studies, and participation requires the completion of a Bachelor's thesis (this applies only to students who are completing the new degree in accordance with the 2005 decree). Major subjects may also have their own, additional requirements, which are listed in the degree requirements. Students should study them carefully. The extent of the thesis and seminar is 30 ECTS credits / 20 credit units.

### Language of the Master's Thesis

The Master's thesis can be prepared in Finnish, Swedish or English. Permission for using other languages is granted by the head of the degree programme. The author of the thesis is responsible for the language revision of the thesis.

In Master's programmes taught in English, also the Master's thesis is prepared in English.

## Applying for a Topic

The degree of Bachelor of Science (Economics and Business Administration) should be completed (this does not apply to students admitted directly into a Master's programme) along with possible complementary studies (this applies only to students completing the new degree in accordance with the 2005 decree).

**The student applies for the approval the Master's thesis topic and the appointment of a supervising professor and examiners from the head of the degree programme. The head of the degree programme appoints a faculty professor or adjunct professor as the supervisor of the thesis, and two examiners, the first of which is the supervisor.** The examiners are usually professors or adjunct professors. The second examiner may also be a person from outside LUT with at least a higher university degree. If one or both of the examiners change, this must be approved by the head of the degree programme.

The student asks the examiners to sign the application and submits it to the study coordinator. The student's individual study plan is attached to the application, which is then reviewed by the study coordinator. The application form, instructions and deadlines are available at [www.lut.fi/kati/opiskelu.php](http://www.lut.fi/kati/opiskelu.php) or from the study coordinator.

The topic is applied for at the beginning of the project when it has been agreed on with the supervising professor. The title does not need to be finalised upon application; it may be modified during the course of the project.

The thesis may also have several authors. In such cases, each student must independently prepare and indicate their own section of the study.

## Maturity Test

Students must take a written maturity test to demonstrate their language skills and knowledge of their thesis topic. The maturity test is evaluated by the supervisor of the thesis and a language reviser approved by the university. The maturity test is taken in the language in which the student has received his or her education in Finland. If the student has received his or her education in a language other than Finnish or Swedish, the head of the degree programme determines the language of the maturity test. In such cases, only the contents of the maturity test is evaluated, not the language.

If a student has demonstrated his or her language skills in connection with the Bachelor's degree or other previous university degree, the language of the maturity test will not be evaluated, only the contents. In such cases, the head of the degree programme may decide to allow the student to substitute the presentation given in the thesis seminar for the maturity test. If a student has not passed the maturity test in the Bachelor's degree or in another previous university degree (or if the student completes the 160-credit unit Master's degree in accordance with the old degree structure), he or she must take a supervised maturity test. No reference material is allowed and both the contents and language will be evaluated.

The maturity test may also be written on a computer. Further details at [www.lut.fi/fi/opiskelu/nykyiset\\_opiskelijat/kuulustelut/kypsyyssnayte.html](http://www.lut.fi/fi/opiskelu/nykyiset_opiskelijat/kuulustelut/kypsyyssnayte.html).

The test must be taken at least four weeks before graduation. The supervisor/examiner will determine the earliest possible date for taking the test. The date is set together with the examiner and the faculty office (practical arrangements by Office Secretary Irma Sihvo). The examiner gives the topic of the test.

The maturity test is evaluated pass/fail.

Further information in the study guide of the LUT Language Centre.

## Assessment of the Master's Thesis

The thesis must be reviewed by the examiners before it is printed.

The student turns in the final, printed version of the Master's thesis bound in black covers to the examiners (one for each) at least 14 calendar days before the faculty council meeting where the thesis is up for approval. Also an application for evaluation, abstracts in Finnish and English, a possible request for confidentiality from the commissioner of the thesis, and a third copy bound in black covers are to be submitted to the study coordinator **at least 14 calendar days before the above-mentioned faculty council meeting**.

The examiners prepare a written statement on the thesis along with a grade proposal for the faculty council. The title of the thesis, the grade and the names of the examiners are indicated in the degree certificate. If the thesis is written by several authors, the sections prepared independently by each author are evaluated separately. The grade of the Master's thesis does not affect the overall grade for the major subject.

The faculty council evaluates and approves the Master's thesis upon application. Forms, deadlines and faculty council meetings are available at: [www.lut.fi/kati/opiskelu.php](http://www.lut.fi/kati/opiskelu.php)

If a student is not satisfied with the evaluation, he or she may leave a request for correction with the faculty council within 14 days of the day the grade was made known. The request for correction should be addressed to the faculty council in question and submitted in writing to the faculty's head of study affairs. Students must submit the request in writing within 14 days of the day the grade was made known. They also have the right to find out why they were given the grade.

Students who are dissatisfied with the decision may bring the matter before the degree board within 14 days of having been informed of the decision. A request addressed to the degree board in writing is to be submitted to the Student Affairs Office.

### Assessment Criteria

#### Purpose and Delimitation of the Research

- Objectives, definitions and delimitation
- Relationship to previous research

#### Stages of the Research

- Formulation of concepts, models, hypotheses and frameworks
- Data collection
- Collection of additional material and analysis
- Discussion, interpretation and conclusions

#### Management of the Research Area

- Balanced organisation of the research
- Methodical and logical approach
- Comprehensive and in-depth study
- Independent, critical and profound analysis

#### Revising the Text

- Layout and presentation
- Language and readability

### Assessment Scale

- improbatur (fail)
- approbatur (lowest passing grade)
- lubenter approbatur
- non sine laude approbatur
- cum laude approbatur

- magna cum laude approbatur
- eximia cum laude approbatur
- laudatur (highest grade)

The student has completed his/her degree **with distinction** if the overall grade is at least 4 and the Master's thesis grade at least eximia cum laude approbatur. In addition to this, at least 40 credits included in the degree must be carried out at LUT and graded on a scale of 1–5.

## Publicity of the Study

Master's theses submitted to the university for examination are normally public documents.

This must be mentioned to the commissioner when the topic of the thesis is first discussed. If the thesis includes information which the commissioner considers confidential, the university may agree to hold the thesis **confidential for a maximum of two years**. The confidentiality starts from the date the faculty council assesses the thesis. In such cases, the commissioner must provide the university with a written, free-form explanation for why confidentiality is required.

If the commissioner requires a period of confidentiality which longer than two years, another version excluding the confidential information must be submitted for publication.

The supervisor of the thesis must see to it that the commissioner is aware of the restrictions for confidentiality at the very beginning of the discussions.

Confidential theses are handled in the faculty council meeting following normal procedure. The faculty council must also have access to the confidential part. The public version of the Master's thesis must mention that the thesis also includes a confidential part. Faculty council members are liable for keeping the information confidential, and the agenda and minutes of the meeting are not to include anything in violation of this confidentiality. The period of confidentiality is to be mentioned in the minutes of the meeting.

In accordance with the faculty council decision of 15 March 2005, this rule can be applied to all Master's theses for which the topic application has been submitted after 1 March 2005.

The only exception are theses with a confidentiality period longer than two years if it was agreed on by the employer and supervising professor (or adjunct professor) at an earlier date. Such cases should always be discussed with the supervising (adjunct) professor.

## Notice of Confidentiality

If the thesis includes confidential information (held confidential for a maximum of two years), the commissioner of the thesis must submit a written notification of the extent of the confidential information, the reasons for confidentiality and the time the information is to be held confidential (usually in full years). The student is responsible for forwarding the notice to the faculty's study coordinator. The notice is given to the study coordinator along with the assessment application.

The Master's thesis will include the mention "Confidential" and the date the confidentiality expires in the lower right-hand corner of the title page.

## Chapters and Layout

The language of the thesis must be grammatically correct and the expression coherent, accurate and concise. It should convey the message to the reader unequivocally and intelligibly, and the organisation should be logical and coherent. Say only what is needed, avoid wordiness. You should particularly avoid buzzwords and unnecessary foreign words.

The Master's thesis is bound in black, hard covers, size A4. The recommended font is Arial 12. The thesis can be printed on both sides of the paper or on one side only. Page margins are as follows: 35 mm at the top, approx. 50 mm on the left, and in one-sided printing approx. 20 mm on the right and at the bottom. Page numbering is at the top of the page, either centred or right-aligned. Spacing is 1.5. If you print on both sides of the paper, the outer margins should be approx. 20 mm and the inner ones approx. 50 mm. Each paragraph is aligned to the left, there are no indentations and there is an empty line between paragraphs. The paragraphs are justified. Avoid long spaces between words: use hyphenation. The thesis should be approximately 80-100 pages.

The text "Master's thesis", the author's name and the year are printed in gold on the spine. The text starts 80 mm from the top and the year is 30 mm from the bottom.

On the front cover, in gold, centred and approx. 100 mm from the top is the word *Master's thesis*. The author's name and the year are in the lower right-hand corner.

LUT's publication committee recommends that the university's logo be printed in gold in the upper left-hand corner of the cover. A cover template recommended by the publication committee is available on the university web site at [www.lut.fi/fi/opiskelu/nykyiset\\_opiskelijat/ohjeita\\_opiskeluun.html](http://www.lut.fi/fi/opiskelu/nykyiset_opiskelijat/ohjeita_opiskeluun.html) and in printing presses in Lappeenranta.

If the thesis was a group project, the contributions of each student are bound together in order of content. Each part must contain the author's name and a list of references. The common table of contents must indicate the author of each part. Otherwise, the general guidelines apply also to a group project.

## Instructions for Layout and Presentation

The parts of the thesis are organised as follows:

### Title page

The title page contains the following information:

University, faculty, major subject  
 Title of the Master's thesis  
 Examiners (supervisor first)  
 Date and signature of the author  
 Address and telephone (optional)

Possible period of confidentiality (lower right-hand corner). The confidentiality period starts from the date the faculty council assesses the thesis.

The title must be well-defined and it must correspond to the content of the thesis. A key word, which expresses something essential about the thesis and has an explicit and specific meaning, is recommended as the first word. Avoid the following words: some, review, method, report, study, equipment etc.

### Abstracts in Finnish and English

The abstract is a concise, objective, independent presentation which can be published separately. It should be intelligible as such, without the original document. It explains the contents of the thesis: the objective, methodologies, results and conclusions. The main method, novel results and observations, practical importance or theoretical novelty should be presented. The organisation does not need to follow that of the thesis; e.g. the most important result can be introduced upfront. The abstract is no longer than one page. Use short, complete sentences.

**The abstract is done in both Finnish and English (equivalent contents). In the Finnish abstract, the title is in Finnish and in the English one in English. Foreign students do not need to prepare an abstract in Finnish.**

The wordcount is approximately 100. Both the Finnish and English abstracts are attached to the thesis. They are also submitted to the study coordinator along with the assessment application.

The abstract is a public document, and therefore all confidential information must be excluded from it.

The author sends electronic copies of the abstracts or the entire thesis to the LUT library. More details available from the library and its web site.

You should favour the passive voice or the 3rd person active in case the abstract is published separately. Unestablished abbreviations, symbols or technical terms should be explained. Tables, equations etc. are used only if they are necessary for the sake of clarity. No direct references are made to the original text.

The information below is given at the beginning of the abstract in the following order:

Author's name  
Title  
Faculty  
Major Subject  
Year of publication  
Master's Thesis. University.  
Number of pages, figures, tables and appendices  
Examiners (supervisor first)  
Keywords in Finnish  
Keywords in English

An example of how to present the bibliographic information in the abstract:

Finnish abstract:

### TIIVISTELMÄ

**Tekijä:** Markkanen, Marja  
**Tutkielman nimi:** Toimintolaskenta palveluyrityksessä  
**Tiedekunta:** Kauppätieteellinen tiedekunta  
**Pääaine:** **Laskentatoimi**  
**Vuosi:** 2000  
**Pro gradu –tutkielma:** Lappeenrannan teknillinen yliopisto  
80 sivua, 26 kuvaa, 4 taulukkoa ja 8 liitettä  
**Tarkastajat:** prof. Timo Tietäväinen  
prof. Tiina Tietäväinen  
**Hakusanat:** toimintolaskenta, palveluyritys, toimintojohtaminen  
**Keywords:** activity based costing, service enterprise, cost management

English abstract:

### ABSTRACT

**Author:** Markkanen, Marja  
**Title:** Title in English  
**Faculty:** LUT, School of Business  
**Major:** **Accounting**  
**Year:** 2000  
**Master's Thesis:** Lappeenranta University of Technology  
80 pages, 26 figures, 4 tables and 8 appendices  
**Examiners:** Prof. Timo Tietäväinen  
Prof. Tiina Tietäväinen  
**Keywords:** activity based costing, service enterprise, cost management

The keywords must be informative and describe the contents of the thesis accurately. Concrete concepts (e.g. equipment) are in plural, abstract ones (e.g. methods) in singular. A good title should include at least some of the most important keywords. The number of keywords should be three to five.

### Acknowledgements

Possible acknowledgements recognise the help, guidance, advice etc. provided by others and give thanks to them. Also the commissioner of the thesis is mentioned.

### Table of Contents

The table of contents lists the headings and sub-headings and their page numbers. The pages are numbered in Arabic numerals from where the text starts. A separate list of figures and tables can be included at the end of the table of contents.

Decimals and indentations are used in the table of contents – as well as in the headings in the text – according to the following example (note the use of upper and lower case lettering and the indentation of sub-headings). The page numbers are aligned to the right.

## **TABLE OF CONTENTS**

<b>1 INTRODUCTION</b>	<b>1</b>
1.1 Background	1
1.2 Research problem, objectives and delimitation	3
1.3 Research methodology	5
1.4 Organisation of the study	7
<b>2 THEORETICAL STARTING POINTS OF THE STUDY</b>	<b>8</b>
2.1 Starting point based on the transaction cost theory	8
2.2 Limitations of the transaction cost theory	10
2.3 Resources and competencies as the reason for competitive edge	14
-----	
<b>5 EMPIRICAL PART: MANAGEMENT OF COOPERATION IN THE ICT SECTOR</b>	<b>53</b>
5.1 Description of material and variables	53
5.1.1 Data collection	58
5.1.2 Descriptive information on the material	61
5.2 Testing of hypotheses	68
5.3 Analysis of the results	77
<b>6 CONCLUSIONS AND SUMMARY</b>	<b>83</b>
<b>REFERENCES</b>	<b>86</b>
<b>APPENDICES</b>	
APPENDIX 1: Statistical results	
APPENDIX 2: Companies interviewed	

### **Explanation of Abbreviations and Symbols**

Abbreviations and variables and their explanations can be listed in alphabetical order, mathematical and other symbols as a list of their own, and identifying letters as yet another list (Latin, Greek etc. each separately).

### Introduction

The introduction contains an introduction to the topic, definition of the research problem, objectives, point of view, delimitation and research methodology. Different parts can be presented as separate subsections.

## Discussion

The discussion is divided into chapters with headings that depict the organisation of the thesis (in exactly the same form as in the table of contents). In this section, the author relates all of the material he or she wishes in reply to the research questions posed, as well as the conclusions based on the material. Repetition should be avoided unless it is necessary for the sake of clarity.

Each citation should be clearly referenced so that the reader may refer to the original source.

The nature of the work determines the form of discussion. The discussion may often be divided into a theoretical part, empirical part and results:

the theoretical background, including the literature and previous research and concepts on which the thesis is based

observations, data collection etc. In order for the observations to have scientific value, the research process should be described in detail.

the discussion on observations and the presentation of the results are often closely connected. All calculations need not be shown, as long as the author explicitly explains how they are done.

Figures, tables, equations etc. make the discussion more concrete and enhance readability. They are captioned and numbered, each as their own group.

On the use of technical and mathematical terms and expressions:

cited expressions and equations must always be referenced unless they can be considered common knowledge. You do not need to show how an equation is derived.

the derivation of new expressions and equations must be presented, or at least its main points. The source of parent equations must be mentioned.

equations are numbered.

## Conclusions and Summary

The conclusions summarise the discussion: the starting point of the research, theoretical and empirical choices, objectives and results, conclusions and possible ideas for further research. You may also voice criticism. There is no need to repeat what has already been said in the discussion. Instead, a more expansive viewpoint can be adopted, explaining which questions were left unanswered, etc. No new information is introduced in the conclusions, nor are direct references made to the discussion.

## References

Listing references and the related ISO 690.2 and SFS 5342/1987 standard are presented in detail by Mälkiä (1994). If you use more than one source by the same author, the older ones are listed first. If more than one of them are from the same year, they are listed in alphabetical order according to the title and a lower-case letter is added after the year (a, b, c...).

The references may not include sources that are not cited. The sources should be described in detail and in the same way.

Sources are usually referenced as follows:

<i>Books</i>	Author(s), editor(s)
	Publication year
	Title
	Edition (if more than one)
	Place of publication
	Publisher (NB: not printing press! Excluding company form abbreviations)

Example of source with one author: Patton, M. Q. 1990. Qualitative evaluation and research methods. London: Sage.

Example of source with two authors: Leino, A. & Leino, J. 1988. Kasvatustieteen perusteet. Jyväskylä: Gummerus.

Sources with many volumes are presented in the same way, and the volume in question is also mentioned.

*Journal papers*      Author(s)  
    Publication year  
    Title of paper  
    Title of journal  
    Volume (annual set)  
    Issue  
    Pages

Example of a source with more than one author: Porter, L. W., Steers, R. M., Mowday, R. T. & Boulian, P. V. 1974. Organizational commitment, job satisfaction, and turnover among psychiatric technicians. *Journal of Applied Psychology*, vol. 59, n:o 2, pages 603-609.

*Publication series*      Author(s)  
    Publication year  
    Title of publication  
    Body in charge  
    Place of publication  
    Publisher  
    Title and number of series

E.g.: Laiho, L. (ed.) 1984. Arctic technology research projects in Finland. Espoo: Valtion teknillinen tutkimuskeskus (VTT). Tiedotteita 331.

*Final theses*      Author  
    Year  
    Title  
    Type of thesis  
    (doctoral dissertation, Master's Thesis etc.)  
    Institution and department

If you reference a compilation, remember to introduce the parent publication with the word "In:" or type it in capital letters.

For example: Rajala, T. 2000. Henkilöstö kunnan voimavarana. In: Hoikka, P. (ed.) *Kunnat 2000-luvun kynnyksellä*. 2nd revised ed. Tampere: University of Tampere.

*Conference papers*  
 Author  
 Publication year  
 Title of paper  
 Name, place and date of conference  
 Place of publication  
 Publisher or conference organiser  
 Pages

For example: Sandström, J. 2001. How to reduce the complexity when formulating cost information for design engineers? 16th International Conference on Production Research (ICPR), July 23 - August 3, Prague, Czech Republic.

### Electronic Publications

Electronic sources are referred to according to the SFS 5831 standard. Further information: the library web site [www.lut.fi/fi/kirjasto](http://www.lut.fi/fi/kirjasto), the library's SFS standard collection and the library administrators. Electronic documents should be referenced only if no other original source exists.

Example of e-mail source:

Bergman, S. 1996. The Iceland Teacher Training School in the field of biology, science education and development work in environmental education. [e-mail]. [stefanb@khi.is](mailto:stefanb@khi.is) 28 June 1996.

Example of Internet source:

Denning, P. 1996. Business Designs of the New University [online document]. [Accessed 5 June 2007]. Available at <http://ene.grnu.edu/pjd/education.html>

### Appendices

Appendices may include equations, diagrams, drawings etc. that do not need to be included in the actual text, but to which you refer. Extensive additional reports, large tables and e.g. tables that are referred to often should be appended. However, figures, equations, tables, etc., which are a key part of the text and are also interpreted, are placed in the body text.

The heading of an appendix is written at the top of the page. Appendices are numbered. Appendix pages, however, are not numbered; only the final numbered pages of the thesis are part of the table of contents. Appendices and their headings may be listed at the end of the table of contents.

### Referencing (citations in the body text)

Citations from books, journals, publication series and theses follow the same guidelines as the list of references. Citations include the following: author(s), year, page(s). Thus referencing can be done as follows: "Williamsson (1995, 23-25) states" or (Teece et al. 1986). Mälkiä also discusses citations.

If there is more than one author, the first author's name is followed only by "et al.". This is also how you should cite electronic sources, for instance (Denning 1996). Do not include the web site address – it should be indicated in the list of references. If several sources are referenced at once, they should be separated with a semicolon in brackets (;). You should pay attention to where you place the reference. If you want the reference to include the entire preceding paragraph, place it in brackets after the final period. If you only want it to include the preceding sentence, place the period after the second bracket. This should also be done within a paragraph. Direct quotations should be in quotes. If you cite the same source twice in a row, the latter can simply be marked: Ibid.

Footnotes are only used for explanations and additional comments on the body text and are numbered separately for each page. Footnotes are placed at the bottom of the page and separated from the actual text with a line approximately 5 cm long. There should be an empty row both above and below the line.

The instructions above are merely guidelines, they are not binding. Referencing can be done in another commonly approved way or following the examiners' instructions. The key to referencing is consistency.

Major subjects may issue their own instructions for authors to follow. Authors must also take into account the requirements set by the language of the thesis.

Further tools in preparing a thesis:

Hirsijärvi - Hurme: Tutkimus ja sen raportointi, 1990.

Hirsijärvi - Remes - Sajavaara: Tutki ja kirjoita, 2002.

Mälkiä, Matti: Teksti- ja kirjallisuusviitteiden laatiminen. Tampere: Tampereen yliopisto, Hallintotiede, 1994 B6.

Lappeenranta, 23 May 2007
