IMPACT

We have the courage to succeed,
passion for innovation through science,
and a will to build well-being.

SYSTEM EARTH

Science with a Purpose

We at LUT University seek solutions to global issues with our expertise in technology, business, and social sciences. We are trailblazers in promoting the energy transition and the regenerative use of natural resources, and we help build resilient communities, industry, and businesses through data, research, and education. Our campuses are in Lappeenranta and Lahti, Finland, but our impact is global.

SUSTAINABLE DEVELOPMENT GOALS

We will focus particularly on the following:
6 – 7 – 8 – 9 – 12 – 13 – 17

LUT Scientific Solutions to Sustainability Challenges

- Leading the energy transition - instead of burning fossil fuels, we promote renewable, emission-free energy.
- Power-to-X and the hydrogen economy - instead of releasing emissions, raw materials can be captured from the air for the production of energy and goods.
- Research on clean water - instead of polluting, modern water refinement recycles nutrients, circulates water resources, and stops harmful chemical flows into the environment.
- Sustainable renewal of business - instead of resource exploitation, successful business is based on sustainability.
